

# EXPLORER YACHT B88 – BERING YACHTS

**Builder:** Bering Yachts

**Model:** EXPLORER YACHT B88

**Category:** Expedition yacht

**LOA:** 88' (26.82 m)

**Displacement:** 225 t

**Fuel Capacity:** 40,000 L

**Range:** 5,000 nm @ 8.5 kn

**Cabins:** 5

**Guests:** 10

**Crew:** 5

**Hull Material:** AH-36 marine steel, aluminum superstructure

**Power:** 2 x 600 hp

# OVERVIEW

---

The Bering Yachts 88 is available for sale—a flagship expedition vessel from Bering Yachts. Designed by an international engineering team, it combines a strong steel hull, transatlantic range, and large internal volume. The vessel is built for world cruises, autonomous expeditions, and comfortable living offshore in any weather.

## Bering Yachts 88 Selection and Brokerage

---

Our brokerage team provides selection of the Bering Yachts 88 with a focus on investment quality. We support the full process: market analysis, off-market search, surveys, and sea trials. We handle technical audit of nav and life-support systems and work for clear documentation and good purchase terms.

## Features of the Bering Yachts 88 Model

---

The Bering Yachts 88 is a powerful displacement vessel with performance comparable to commercial tonnage and the comfort of a megayacht. This research platform is for owners who plan passages to the most remote areas. The expedition yacht offers a strong mix of seakeeping and living space for long autonomous voyages.

## Features of the Bering Yachts 88 Expedition Yacht

---

The Bering Yachts 88 expedition yacht (within this series) has an unlimited navigation area. It can cross oceans safely and look after crew and guests in harsh conditions—a true "mini-icebreaker" in the private fleet.

Key design and operational features of the model:

- **Material and Strength:** The hull is made of AH-36 marine steel, and the superstructure is made of aluminum. The heavy-duty construction and displacement of 225 tons provide stability unavailable to lighter vessels.
- **Ice Class and Protection:** Hull reinforcement allows the yacht to operate in broken ice, making it a full participant in Arctic expeditions.
- **Autonomy:** The total fuel tank capacity is 40,000 liters, providing a range of up to 5,000 nautical miles at a cruising speed of 8.5 knots.
- **Flybridge:** The Bering Yachts 88 is equipped with a spacious flybridge featuring a helm station, BBQ area, dining area, and sunbathing spots.
- **Three-Deck Architecture:** The layout includes 3 main decks, providing clear zoning between the master cabin on the main deck, guest cabins, and technical areas.
- **Capacity:** The vessel is designed for comfortable accommodation of up to 10 passengers in 5 cabins and a crew of 5.

The Bering Yachts 88 is in production but often appears on the used market. A vessel with sea time gives you a fully equipped explorer in stock without a long build wait.

The Bering Yachts 88 is part of the Bering Explorer Series, built around reliability. Solutions include full redundancy of critical systems, a strong power plant, and professional nav gear. The steel hull and stabilisation make ocean passages as comfortable as possible.

Popular models from other builders: Nordhavn 86 - more classic design with lower displacement; Fleming 85 - semi-displacement hull with less range; Selene 80 - oriented toward coastal passages; Outer Reef 880 - lighter construction and less suitable for ice; Arcadia Sherpa 80 - futuristic design at the expense of expedition qualities.

The Bering Yachts 88 outperforms its peers due to its colossal internal volume

and hull strength, allowing the vessel to be used as a full-fledged research hub.

## Technical Specifications of the Bering Yachts 88 Model

The B88's parameters reflect its role as an ocean explorer. Length up to 24 meters and beam give very large interior volume—a salon and cabins on a par with shoreside homes. High bulwarks and drainage protect the decks in heavy weather.

Life-support includes powerful watermakers, fuel cleaning, and backup generators so nav and climate run reliably anywhere.

## Comparing the Bering Yachts 88 to Other Bering Models

Below is a comparison of the main parameters of the B88 model with other popular Bering shipyard yachts.

Model	Length...	Power (hp)	Max Speed (kn)	Guests	Cabins	Purpose
Explorer Yacht B88	88	2 x 600	11	10	5	Transoceanic passages
BC60	61.5	2 x 300	12	12	4	Luxury cruises
B72	72	2 x 330	10	8	3+1	Classic explorer
BC80	80	2 x 450	11	12	4	Long-range catamaran cruises
BERING 92	92	2 x 600	12	10	5	Expedition superyacht

## Bering Yachts 88 – Prices and Ordering via Broker

We invite you to start your Bering Yachts 88 search with a consultation. Our team will analyse the market and provide a report on operating costs and liquidity.

We find sound investments—well below new-build cost and in very good condition. We can support technical oversight and legal registration so your expedition yacht is ready for confident use.

## Questions and Answers

---

**Why choose a B88 steel hull over a composite one?** The AH-36 steel hull offers incomparably higher impact toughness and repairability in field conditions. For a vessel of this displacement, steel is the only material that guarantees safety during collisions with floating objects or ice.

**What is the real cost of a Bering Yachts 88 on the secondary market?** The price depends heavily on the year of construction and installed equipment. We evaluate each vessel individually, helping the buyer avoid overpaying for worn-out components and systems.

**Is it difficult to manage such a vessel without a professional crew?** Despite the size, modern automation systems and thrusters allow an experienced owner to manage the yacht with minimal help. However, to maintain all technical systems in ideal condition, we recommend having a qualified engineer.

**How liquid is this model for future resale?** Bering Explorer yachts maintain high residual value due to their durability. Steel-hulled explorers are always in stable demand among sailors planning circumnavigations.

**How do I know if the B88 is right for me instead of the B72?** If your goal is transoceanic passages with a large family or group of friends where maximum autonomy and space are vital, the Bering Yachts 88 is the best choice. We will help you compare the living area and technical capabilities of both models to make the right decision.
