# OVERVIEW

---

Represented by Andrey Shestakov and Shestakov Yacht Sales, the Adirondack Guide Boat from #1 HULL is a compact motor yacht in the fiberglass and plastic yachts category. Measuring 15 ft overall with a fiberglass deck, it's a no-nonsense, robust option for owners who prioritize straightforward maintenance and uncomplicated ownership.

## Selecting an Adirondack Guide Boat

---

Opting for the Adirondack Guide Boat is a logical choice if you're after a small-footprint motor yacht constructed within the fiberglass and plastic yachts segment, fitted with a fiberglass deck for easier upkeep. Andrey Shestakov and the Shestakov Yacht Sales team are available to advise on availability and whether this model fits your specific boating needs.

## Features of the Model

---

- Compact footprint: 15 ft LOA with a 3 ft beam, designed for efficient storage and straightforward dock handling.
- Robust construction: hull conforms to the fiberglass and plastic yachts grouping with a fiberglass deck that simplifies care routines.
- Purpose-built simplicity: an uncluttered platform intended for owners who prefer minimal complexity.
- Supported by professional brokerage representation from Shestakov Yacht Sales and Andrey Shestakov.

## Technical Specifications

---

- Model: Adirondack Guide Boat
- Builder: #1 HULL
- Classification: motor yacht
- Hull category: fiberglass and plastic yachts
- LOA: 15 ft (4.57 m)
- Beam: 3 ft (1.04 m)
- Deck material: Fiberglass

## Pricing and Ordering

---

To obtain current pricing, check availability, or begin the purchase process for the Adirondack Guide Boat, contact Andrey Shestakov at Shestakov Yacht Sales. Our brokerage will manage the paperwork, logistics, and coordination to deliver a seamless transaction.

## Questions and Answers

---

Q1: What are the exact dimensions of the Adirondack Guide Boat? A1: The **LOA** is 15 ft (4.57 m) and the **beam** is 3 ft (1.04 m).

Q2: What materials define this model's construction? A2: The hull is categorized under **fiberglass and plastic yachts**, and the **deck material** is Fiberglass.

Q3: Who is the builder behind this model? A3: The **builder** is #1 HULL, represented by Andrey Shestakov and Shestakov Yacht Sales.

Q4: How is this model classified? A4: It is a **motor yacht** listed in the **fiberglass and plastic yachts** segment.

Q5: How can I get pricing and start an order? A5: For **pricing** and **ordering**, contact Andrey Shestakov at Shestakov Yacht Sales to review availability and begin the purchasing process.

## Owner Experience Review

---

Originally developed as a guide and transport craft, the Adirondack Guide Boat was intended to operate in shallow water, carry three people plus their equipment, and remain light enough for a single person to portage. Today it most often serves as a fly-fishing platform or a day-boat for scenic outings, equally suited to family row trips. Many owners treat it like a traditional heritage day-boat that can be cartopped or trailered without complication; contemporary variants aimed at anglers often accept small trolling-motor installations.

When propelled by oars, owners regularly praise its speed and the long, effortless glide it offers, along with remarkably straight tracking from a fixed seat; the long, traditional oars encourage an overlapping, cross-hand stroke that quickly becomes instinctive. Comfort is characteristic of an open boat: operators choose between two rowing stations based on load, with a passenger commonly seated aft during guided excursions. The hull provides space for gear on a bottom board. Freeboard is modest on many examples, and several owners advise avoiding conditions rougher than roughly a 9-inch chop, while noting that larger patterns designed for racing or open water can tolerate more. Handling and initial stability depend on the hull pattern and choices of rib/deadrise—some constructions feel very steady, while others may seem tippy or fussy.

Maintenance needs vary with construction type. Traditional wooden hulls require regular varnish or paint and close attention to the bottom board, stem, and protective shoes—areas prone to wear and rot—whereas modern Kevlar

or composite builds significantly reduce routine upkeep. Many owners fit a clamp-on electric or a small outboard for convenience, though the vessel remains fundamentally row-powered. Broker records include a #1 HULL Adirondack Guide Boat listed with a 1966 build year, a useful reference when researching specific hulls.

## Pros and Cons

- Fast when rowed, offering a long glide and reliable tracking.
- Light enough for single-person portage and simple to cartop or trailer.
- Open cockpit accommodates three people and their gear for day trips.
- Low freeboard on many examples restricts comfort and safety past approximately a 9-inch chop.
- Handling and initial stability differ by hull pattern, with some builds feeling tippy or temperamental.
- Traditional wooden versions demand regular varnish/paint and vigilant care of bottom boards and protective shoes.
