Owner Experience Review

At present, the 41M EXP from AEGEAN YACHT is a new build project with development noted for 2027, the first hull expected in 2028, and delivery penciled in for May 2028. As a result, there are no authenticated owner accounts or sea trial narratives specific to this hull available yet; most expectations are derived from broker and press descriptions positioning it as an expedition yacht suited to long range family cruising with potential for charter operations.

Living aboard is described through design specifications rather than firsthand reviews: 340 GT across a 7.5 m beam on three decks, sleeping up to 12 guests in 8 cabins including two full beam owner's suites, and concept imagery showing extensive outdoor spaces with a 2.7 m swimming pool, generous sun decks, a gym, and a spacious communal salon. Collectively, these elements indicate a focus on long range stays and guest centered entertaining.

From a technical standpoint, published sources list a steel hull and twin MAN D2862 LE469 diesels (1,325 hp each), with reported performance in the vicinity of a 12 knot cruise and a top end near 16 knots, and a broker/spec cited range around 3,000 nm. Discussions in owner forums about similar 41 m explorer yachts emphasize heavy displacement behavior, steady cruising characteristics, and a crew emphasis on systems and fuel planning—summed up by the phrase "range is freedom"—which fits the expedition profile. However, specific observations on handling, onboard noise, and maintenance

for the 41M EXP hull have not yet been recorded.

Pros and Cons

• Expedition brief supports long-range family cruising and charter-capable use cases.
• Spacious three-deck layout with expansive exterior areas, a 2.7 m pool, and a gym for extended stays.
• Published spec lists a steel hull, twin MAN D2862 diesels, ~12 kn cruise, ~16 kn top, and ~3,000 nm range.
• No owner reports or independent sea-trial data for 41M EXP are available yet.
• Day-to-day livability, noise levels, and handling for this specific hull remain unverified.
• Heavy-displacement explorer profile prioritizes steady range over high speed or sporty handling.
