OVERVIEW

Purpose-built for confident days on the water with the option to overnight, the 24 Center Console by BIMINI combines a practical layout, efficient performance, and ownership simplicity. As a center console platform within the motor yacht class range, its fiberglass and plastic construction and semi-displacement hull produce a composed, fuel-efficient passage. Shestakov Yacht Sales — led by broker Andrey Shestakov — is available to assist you through evaluation, negotiation, and purchase.

Selecting a 24 Center Console

If you seek a compact footprint that still feels like a proper yacht, the 24 Center Console is a straightforward option. Measuring 24 ft (7.32 m) LOA with an 8 ft (2.59 m) beam, it manages to remain small yet capable; a single inboard powertrain specified by BIMINI and supplied by Volvo Penta keeps systems simple and economical to run. The semi-displacement hull form, a substantial 120-gallon fuel tank, and a well-thought-out deck plan make it adaptable for fishing, day cruising, or family outings, while modest overnighting is enabled by accommodations for 2 and one head.

Features of the Model

- Semi-displacement hull in fiberglass and plastic engineered to deliver a smooth, efficient ride
- Hull and interior designed by the BIMINI Design Team
- Single inboard Volvo Penta diesel engine providing reliable torque and economical operation
- Typical cruise of 25 kn (28.77 mph) with a top speed of 31 kn (35.67 mph)
- LOA 24 ft (7.32 m); beam 8 ft (2.59 m); draft range 4.921–6.562 ft (1.5–2 m)

- Overnight capacity for 2 with 1 head to support short-term stays aboard
- 120 gal fuel capacity to enable longer days on the water
- A genuine motor yacht layout packaged in a nimble center console format

Technical Specifications

- Model: 24 Center Console
- Builder: BIMINI
- Category: motor yacht; center console
- Hull material: fiberglass and plastic
- Deck material: Fiberglass
- Hull configuration: Semi-Displacement
- LOA: 24 ft (7.32 m)
- Beam: 8 ft (2.59 m)
- Draft: 4.921–6.562 ft (1.5–2 m)
- Engines: 1 x Volvo Penta, Inboard, Diesel
- Speed (cruise/max): 25 kn / 31 kn (28.77 / 35.67 mph)
- Designers: BIMINI Design Team (hull and interior)
- Accommodations: 2; Sleeps: 2; Heads: 1
- Fuel capacity: 120 gal

Pricing and Ordering

To obtain up-to-date pricing, check availability, or discuss how the 24 Center Console by BIMINI fits your boating objectives, reach out to Andrey Shestakov at Shestakov Yacht Sales. Our brokerage team will offer clear guidance, full specification details, and comprehensive support through offer presentation, survey coordination, and closing.

Questions and Answers

Q: What type of boat is the 24 Center Console? A: It is a center console yacht within the broader motor yacht category, constructed from fiberglass and plastic and employing a semi-displacement hull to provide efficient, seakindly performance. Its primary strengths are the **layout** , **hull** , and correct category fit for versatile use.

Q: What are the key dimensions and draft? A: The vessel's **LOA** is 24 ft (7.32 m) and the **beam** measures 8 ft (2.59 m). The **draft** varies between a minimum of 4.921 ft (1.5 m) and a maximum of 6.562 ft (2 m).

Q: What engine and fuel does it use? A: Propulsion is provided by a single **engine** from Volvo Penta, configured **Inboard** and running on **Diesel** , a setup chosen for straightforward maintenance and efficient operation.

Q: How fast does it go? A: The boat's **cruising speed** is approximately 25 knots (28.77 mph), while its **maximum speed** is around 31 knots (35.67 mph).

Q: What onboard accommodations are provided? A: The yacht includes **accommodations** for 2, **sleeps** 2, and features **1 head** , making it suitable for brief overnight trips. The interior layout, crafted by the BIMINI Design Team, focuses on efficient, practical use in a compact center console footprint.

Owner Experience Review

Owners and brokers consistently describe the 24 Center Console by BIMINI as a tough East Coast sportfishing platform with design lineage linked to Topaz. On the water, its semi-displacement / deep-V hull with roughly 17° transom deadrise provides stable tracking; listings commonly report a cruise in the 23–25-knot range with a top end near 31 knots. It is frequently characterized as a “fishing machine” and regularly used for offshore day trips.

The design emphasizes cockpit working space—the roughly 8–8.5 ft beam gives an unusually large working deck for a boat of this size—while cabin accommodations are intentionally compact. In cuddy-cabin or Palm Beach variants, the small cabin typically offers two berths and a single head that are adequate for short overnight stays rather than prolonged cruising.

Owner habits tend to be pragmatic: many boats are trailered for coastal moves and haul-outs and undergo periodic refits. Listings often note repowers (upgrading older inboards to newer options such as a Volvo Penta D4-320 or high-output outboards) and common improvements like Seakeeper installations, updated electronics, fresh upholstery, new batteries, and water pump replacements. On single-inboard examples, routine service access is through standard panels, and used boats generally require typical attention to upholstery, electrical systems, and the engine room; sensible upgrades can significantly improve comfort for longer passages.

Pros and Cons

- Rugged sportfishing pedigree with steady tracking from the semi-displacement/deep-V hull and approximately 17° transom deadrise.
- Real-world cruising speeds commonly fall in the 23–25 knot band with seller-reported top speeds near 31 knots.
- Refit-friendly and trailerable; many boats show upgrades such as Seakeeper units, modern electronics, and repowers.
- Cuddy cabin is compact and best suited to brief overnighting rather than extended cruising.
- Variability in powerplant choices—between original inboards and later outboard or inboard repowers—can complicate surveys and maintenance.
- Interior sleeping and living spaces are modest because the layout prioritizes a large working fishing cockpit.
