OVERVIEW

The Estrella from HCB pairs the thrust of five Yamaha gas outboards with a 65 ft (19.81 m) platform. Built as a motor yacht in a center console layout on a fiberglass hull, it maintains a comfortable cruise at 30 knots (34.52 mph) and can sprint to 50 knots (57.54 mph).

Selecting a Estrella

Opting for the Estrella is a natural choice when you want an outboard-driven motor yacht that combines a practical center console layout with the durability of fiberglass construction. Its operational profile — a 30-knot cruise with the ability to reach 50 knots — appeals to owners prioritizing speed and reliable passage-making under outboard power.

For bespoke advice on build options and delivery timing, consult Andrey Shestakov and the specialists at Shestakov Yacht Sales to match specifications and schedules to your program.

Features of the Model

- LOA of 65 ft (19.81 m) providing a substantial presence on the water
- Propelled by five Yamaha gas outboards for immediate throttle response and robust acceleration
- Designed to cruise at 30 knots with a maximum capability up to 50 knots (34.52 / 57.54 mph)
- Constructed with a Fiberglass hull and a fiberglass deck for structural integrity and quality finish
- Classified as a motor yacht featuring a center console configuration for open-deck operation

Technical Specifications

- Length overall (LOA): 65 ft | 19.81 m
- Cruise speed: 30 knots | 34.52 mph
- Maximum speed: 50 knots | 57.54 mph
- Engines: 5 × Yamaha
- Engine type: Outboard
- Fuel type: Gas
- Hull material: Fiberglass and Plastic Yachts
- Deck material: Fiberglass

Pricing and Ordering

Availability, build slots, and purchase conditions change frequently. For current information on acquiring the Estrella from HCB, contact Andrey Shestakov at Shestakov Yacht Sales for customized assistance and a comprehensive proposal.

Questions and Answers

Q: What type of yacht is the Estrella? A: It's a **motor yacht** configured as a **center console** on a **fiberglass hull**.

Q: What engines power the yacht? A: Five **Yamaha gas outboard** engines provide propulsion, delivering strong acceleration and relatively straightforward maintenance.

Q: How fast does it go? A: The **cruise speed** is 30 knots (34.52 mph), while the **maximum speed** can reach up to 50 knots (57.54 mph).

Q: What is the length overall? A: The **LOA** measures 65 ft (19.81 m).

Q: Who can help me order or buy one? A: Contact **Andrey Shestakov** and the team at **Shestakov Yacht Sales** for help with **ordering**, availability, and transaction support tailored to your needs.

Owner Experience Review

Buyers are drawn to the Estrella by HCB for offshore sportfishing, extended day cruising, and as a more yacht-like center-console suitable for owner-operators or charter operations. The design supports very high horsepower and extended range — listings and owner posts reference 3,000–3,135 hp builds and large fuel tanks. Broker materials have noted top speeds approaching 65 knots on certain high-performance setups, and owners praise the ZF joystick for easing tight-docking and maneuvering in shallow slips.

Aboard, owners describe genuinely yacht-caliber comfort for a center-console platform. Testimonials reference a “huge” lounge area, and a 2022 listing highlights accommodations such as two guest cabins and two heads, plus a “super console” helm loaded with navigation and electronics and expansive deck social spaces ideal for family offshore outings.

Running costs are a recurring consideration. The array of large outboards — examples include banks of five 627s or clusters of Verado 600XXXL engines — leads to significant service and fuel expenses; one forum estimate placed a full tank fill at roughly \$10,000. Additionally, some owner reports criticize HCB’s build quality, including allegations of major hull delamination on recent builds, so owner experiences vary by hull and build year.

Pros and Cons

- Very high horsepower and a long-range design enable rapid offshore

passages, with brokers reporting top speeds up to ~65 kn on certain configurations.

- ZF joystick control provides accurate handling for getting in and out of tight, shallow slips.
- Yacht-level comfort with a large lounge, a “super console” helm, and documented examples offering two guest cabins and two heads.
- Multiple substantial outboards generate elevated service and fuel expenses, with a forum estimate of about \$10,000 to fill the tanks.
- Some owners have reported substandard build quality from HCB.
- Reports of significant hull delamination on recent builds have surfaced online.

Comparison with Other Models

Model	LOA	Beam	Draft	Speed (Cruising/Max)	Gross Tonnage
Estrella	65' 0" (19.81 m)			30 kn / 50 kn
