OVERVIEW

The WAKESETTER 24 MXZ from MALIBU is a compact, performance oriented motor yacht built on a sturdy fiberglass hull foundation. Offered through Shestakov Yacht Sales, Andrey Shestakov and our brokerage team stand ready to assist with selection, survey coordination, and worldwide delivery.

Selecting a WAKESETTER 24 MXZ

Picking the right 24 foot platform hinges on balancing quick performance, nimble handling, and straightforward ownership. At 24 ft (7.32 m) LOA with an 8 ft (2.59 m) beam and powered by a single INDMAR inboard, the WAKESETTER 24 MXZ delivers uncomplicated ownership in a true motor yacht package. Its economical cruise of 26.07 kn (30 mph) and a top speed of 35.63 kn (41 mph) suit quick lake hops and energetic day boating.

Features of the Model

• Single inboard power: 1 x INDMAR; engine type Inboard; fuel Unleaded.
• Confident performance: cruise 26.07 kn (30 mph); maximum 35.63 kn (41 mph).
• Construction you can trust: fiberglass and plastic hull with a fiberglass deck.
• Balanced proportions: 24 ft LOA, 8 ft beam; max draft 8.76 ft (2.67 m).
• Practical range for day use with a 73 gallon fuel capacity.
• Hull configuration noted as “Other,” matching the official specification.

- Q: Which engine powers this motor yacht? A: It is equipped with a **single inboard** (1 x INDMAR); **fuel type** is Unleaded.

• Q: How big is it? A: **LOA** is 24 ft (7.32 m); **beam** is 8 ft (2.59 m); **max draft** is 8.76 ft (2.67 m).
• Q: What is the construction and fuel capacity? A: The **hull** is fiberglass and plastic with a **fiberglass deck** ; **fuel capacity** is 73 gal.
• Q: How do I purchase through Shestakov Yacht Sales? A: Contact **Andrey Shestakov** at Shestakov Yacht Sales to discuss **pricing** , **availability** , and next steps for the WAKESETTER 24 MXZ by MALIBU; we coordinate **survey** and **delivery** globally.

Owner Experience Review

Owners and industry reviewers frequently describe the WAKESETTER 24 MXZ from MALIBU as primarily tailored for surf and wakeboard activities. In everyday family use it often doubles as a roomy cruiser for large groups thanks to its generous bow and social seating arrangement, and many owners use it for towing tubes, casual instruction, and teaching newcomers using the adjustable surf and wake controls.

On the water, Surf Gate combined with the Power Wedge gives riders a high degree of control to “shape the wake” for varying skill levels. Feedback from the community also points out that the resulting wave can feel somewhat “mushy,” tending toward a narrower or skim style profile with more lateral energy versus the down press systems of some competitors; careful adjustment of ballast, speed, and wedge settings is important, and aggressive wedge/ballast combinations can produce noticeable bow rise.

Comfort and onboard amenities receive positive notes for overall space, storage capacity, flip up seating, a large bow area, a flip down swim step, and a 12 inch command touchscreen, although some owners find the seating on the firmer side and report intermittent electronics or display problems. Maintenance reports include failures such as water and fuel pump issues, a

broken pulley, software faults, a failed wedge motor, stereo malfunctions, and delaminating displays; additionally, there is a fuel system/fuel pump recall for certain model years, so confirming recall compliance is recommended. Some engine and drive repairs require special tools and are made difficult by tight access, prompting many owners to rely on dealer service, which can be costly.

Pros and Cons

Pros:

• Surf Gate and Power Wedge provide broad adjustability to tailor surf and wake profiles for different riders and teaching beginners.
• Spacious 24-foot layout with abundant seating and storage suits large crews and family day trips.
• Useful conveniences include flip-up seats, a large bow, a flip-down swim step, and a 12-inch command touchscreen.

Cons:

• Some owners describe the wave as narrower and “mushy” compared with down-press systems from other brands.
• Aggressive wedge/ballast settings can cause noticeable bow rise, requiring careful tuning of speed and weight.
• Owner-reported failures and a fuel-system/fuel-pump recall on certain years can lead to costly dealer service and demand diligence on maintenance.
