## OVERVIEW

---

The NX41 Horizon by NX BOATS is a modern motor yacht designed around a secure, social walkaround yacht deck arrangement and built on a resilient fiberglass and plastic hull. Presented through Shestakov Yacht Sales with broker Andrey Shestakov, it offers an owner-friendly footprint while accommodating up to six people comfortably.

## Selecting a NX41 Horizon

---

When prioritizing unobstructed bow-to-stern circulation and safe side-deck passage, the NX41 Horizon distinguishes itself as a genuine walkaround yacht in a compact, easy-to-manage motor yacht package. Its twin diesel propulsion and an 11 ft (3.5 m) beam make it a practical choice for confident handling and relaxed weekend cruising.

## Features of the Model

---

- A true walkaround yacht deck layout that promotes secure movement around the vessel
- Twin Volvo Penta I/O diesel engines providing balanced performance and responsive maneuvering
- A practical maximum draft of 5.741 ft (1.75 m) suitable for varied coastal cruising areas
- Overnight accommodation configured for up to 6 guests
- Low-maintenance fiberglass decking installed over a sturdy fiberglass and plastic hull construction
- Fuel capacity of 185 gal and fresh water capacity of 79 gal, sized for short coastal voyages

## Owner Experience Review

---

Owners stepping aboard the NX41 Horizon from NX BOATS will appreciate a layout geared toward family use and sociable day boating. The arrangement typically includes a forward master, a mid-cabin, and a convertible salon berth that together are marketed for up to six overnight guests, while the roomy cockpit beneath a fixed hardtop, expansive glazing, and a direct route from the helm to the swim platform simplify entertaining.

Published listings commonly cite a daytime capacity near 18 people and sleeping arrangements for 6, with tankage around 185 gal of fuel and 79 gal of fresh water to support extended coastal hops.

On the water, reviewers summarize the boat as balanced and sure-footed in ordinary coastal sea states. Reported performance numbers indicate an economical cruise near 27.8 knots and a top speed roughly 43.4 knots, subject to the chosen propulsion fit. The availability of inboard or outboard installations allows owners to prioritize speed, range, or serviceability.

As a model introduced recently (2024–2026), there is limited long-term owner

feedback. Typical power options seen in dealer listings include Mercury Verado outboards and Volvo Penta D4 inboards, so buyers can expect OEM service schedules and parts costs consistent with those manufacturers. Factory and dealer option lists often show joystick controls, generators, air conditioning, and shore power; independent reports flagging restricted engine-room access or recurring build defects were not identified during this research, and purchasers are advised to confirm serviceability and system access during a professional survey.

## Pros and Cons

- Balanced, confident handling in typical coastal conditions.
- Choice of inboard or outboard propulsion to tailor priorities for speed, range, or upkeep.
- Generous cockpit under a fixed hardtop with a clear flow to the swim platform, ideal for entertaining and daytime cruises.
- Limited independent long term ownership data due to the model's recent introduction (2024–2026).
- Actual performance numbers depend on the selected engine package.
- No independent reports of engine room access problems or recurring build faults were found in this research.
