OVERVIEW

Meet the 250SOLARIS by PREMIER YACHTS — a multi-purpose motor yacht arranged in a pontoon layout and built on an aluminum platform. Its overall length is 26 ft (7.92 m) with an 8 ft (2.59 m) beam, and it is propelled by a single MERCURY outboard using unleaded fuel.

Selecting a 250SOLARIS

If you need a small, low-maintenance vessel with uncomplicated systems and economical propulsion, the 250SOLARIS is worth considering. As a motor yacht in a pontoon layout built on an aluminum hull, it offers a practical mix of longevity and ease of operation. For personalized advice on availability and option packages, consult Andrey Shestakov and the team at Shestakov Yacht Sales — they will match configurations to how you plan to use the boat.

Features of the Model

- Classification: motor yacht; pontoon configuration; aluminum hull
- Length overall (LOA): 26 ft (7.92 m)
- Beam: 8 ft (2.59 m)
- Power: 1 x MERCURY Outboard
- Fuel type: Unleaded
- Fuel capacity: 57 gal
- Deck material: Aluminum
- Hull configuration: Other

Technical Specifications

- Builder: PREMIER YACHTS
- Model: 250SOLARIS
- LOA: 26 ft / 7.92 m

Questions and Answers

Q: What type of yacht is the 250SOLARIS? A: Its **type** is a motor yacht with a **pontoon layout** and an **aluminum hull** .

Q: What are the dimensions of the model? A: It measures **LOA 26 ft (7.92 m)** with a **beam 8 ft (2.59 m)** .

Q: What engine and fuel does it use? A: A **single MERCURY Outboard** running on **Unleaded** fuel.

Q: What is the fuel capacity? A: **Fuel capacity: 57 gal** .

Q: How do I get pricing and place an order? A: Reach out to **Andrey Shestakov** at **Shestakov Yacht Sales** to review pricing and timelines with PREMIER YACHTS for the 250SOLARIS.

Owner Experience Review

Owners of the 250SOLARIS from PREMIER YACHTS commonly report it as a roughly 25-foot platform tailored for family outings and social days afloat, with a recorded sea trial in 2013 and dealer/catalog listings extending into 2026–2027. The layouts typically feel roomy for a pontoon/tritoon of this size, featuring social Revolution Booth seating, an expansive bow area, and in some 25' configurations a high passenger rating (reports cite capacities up to 17). Many proprietors keep their boats on lifts or in slips; while trailering is feasible, the broad, heavy tritoon arrangement makes routine towing less frequent.

When underway, the craft receives compliments for delivering a stable, dry, and well-planted ride when fitted with the PTX tritoon package; a documented sea trial highlighted steady handling in gusts around 20 mph. Owners stress that configuration affects performance: the hull feels substantial and weighty at cruise, and acceleration and overall responsiveness change notably with different outboard and propeller setups, with installations reported in the rough range of 200 to 450 hp.

Comfort and finish are cited as strengths: features such as Cool-Touch upholstery, upgraded cabin furniture, refrigerated cupholders, and enhanced helm packages combine with sensible Captain-First helm ergonomics. Option choices vary significantly between individual boats, so examining the build sheet for electronics, audio systems, and shade options is recommended. Maintenance is typical for aluminum tritoons—saltwater operators note the need for antifouling/bottom paint and routine tube cleaning—and auxiliary

electrical loads benefit from a dual-battery arrangement and vigilant care. A small number of owners have encountered engine high-temperature incidents caused by blocked cooling outlets, and warranty/service responsiveness appears to be inconsistent by region, so confirming local support for PREMIER YACHTS is advisable.

Pros and Cons

• Stable, dry ride with the PTX tritoon package and confident handling reported in windy chop.
• Spacious, social floorplans (including Revolution Booth and a roomy bow) suit family cruising and entertaining with high capacity on some 25' layouts.
• Premium comfort touches include Cool-Touch upholstery, refrigerated cupholders, and an ergonomic Captain-First helm.
• Real-world performance varies significantly with outboard and prop selection, and the boat feels heavy at cruise.
• Electrical and lighting/audio accessories place real demands on batteries, making a dual-battery system and regular upkeep advisable.
• Warranty and service support can be inconsistent by region, with some owners reporting difficulty obtaining timely work.
