OVERVIEW

The VX 24 Q DH from STARCRAFT is a flexible motor yacht built on a comfortable pontoon layout with a rugged aluminum hull. For assistance selecting or purchasing this model, contact Shestakov Yacht Sales; broker Andrey Shestakov is available to support your search and transaction.

Selecting a VX 24 Q DH

If you prefer a simple outboard arrangement and the durability of aluminum construction, the VX 24 Q DH is a noteworthy choice. Its LOA of 24 ft (7.32 m) and beam of 8 ft (2.59 m) make it manageable yet spacious for day use, and the single YAMAHA outboard keeps operation straightforward. As a pontoon craft within the motor yacht class, it follows a time tested layout and benefits from a durable aluminum build.

Features of the Model

- Classification: motor yacht built on a pontoon platform
- Hull and deck: aluminum construction hull; deck material — Aluminum
- Propulsion: 1 x YAMAHA Outboard; fuel type — Unleaded; fuel capacity — 38 gal
- Dimensions: LOA 24 ft (7.32 m); beam 8 ft (2.59 m)
- Builder: STARCRAFT
- Hull configuration: Other

Q: How can I order through Shestakov Yacht Sales? A: Contact **Andrey Shestakov** and the team at **Shestakov Yacht Sales** to review the VX 24 Q DH by STARCRAFT, confirm the spec sheet, and complete purchase steps.

Owner Experience Review

Dealer listings currently show the VX 24 Q DH from STARCRAFT as a new 2026 model—marketed as a 24 foot pontoon designed for family outings and entertaining—and long term owner feedback on this precise floor plan remains limited. Drawing from broader owner commentary on STARCRAFT pontoons and the VX series, typical uses include family day cruising, relaxed social gatherings, and light watersports such as tubing. The Q DH arrangement prioritizes flexibility, featuring roomy bow and aft seating plus a flip back aft lounge that quickly converts the layout between cruising, lounging in the sun, and face to face conversation; similar configurations are also favored by anglers for leisurely fishing trips.

On the water, owners report that STARCRAFT pontoons generally manage choppy or rough conditions adequately for their class. The boat tends to get on plane quickly without being aimed at top speed, and its on water behavior is closely tied to the chosen outboard; many current listings pair the model with a Yamaha F150, which will influence acceleration, cruising manner, and towing capability.

Feedback on comfort is largely positive: seating and deck materials are noted for holding up well under prolonged sun exposure. Conversely, some owners would prefer a beefier stock audio system and a more robust bimini, and they observe that overall fit and finish is more modest when compared to premium manufacturers. Routine maintenance is typically straightforward—regular oil services, winterizing, and standard outboard care—although occasional upholstery stitching issues have been reported and

resolved under STARCRAFT warranty without significant difficulty. Bimini/top fittings and small trim pieces are common items owners address as minor service tasks or upgrades over time.

Pros and Cons

• Versatile Q DH seating layout with abundant bow and aft zones plus a flip back rear lounge ideal for family outings and entertaining.
• Manages choppy water reasonably well for a pontoon in this class.
• Seats and deck surfaces demonstrate good durability, and routine maintenance demands are typically light.
• Not designed as a high speed craft; it planes promptly but is not a “speed demon.”
• Factory audio, bimini, and some aspects of fit and finish are modest compared with higher end competitors.
• Performance is strongly influenced by the selected outboard; many listings are equipped with a Yamaha F150.
