OVERVIEW

Shestakov Yacht Sales presents the 26M Flybridge by TUZLA ISTANBUL TURKEY — a made-to-order motor yacht built on a wooden hull. Represented by Andrey Shestakov and our brokerage team, this 26 metre monohull marries traditional craftsmanship with practical cruising capability.

Selecting a 26M Flybridge

Opting for the 26M Flybridge puts emphasis on artisanal build quality, well-proportioned naval architecture, and proven diesel propulsion. As a motor yacht produced by TUZLA ISTANBUL TURKEY, the 26M Flybridge combines twin MTU inboard engines with the warmth of a handcrafted interior and a wooden hull. Accommodation for up to 10 guests across five cabins with five heads supports extended stays aboard, while the vessel's LOA of 26 m (85 ft), beam of 6.3 m (20 ft), and maximum draft of 2.48 m (8.136 ft) deliver versatile proportions for a variety of cruising plans.

Features of the Model

- Construction: wooden hull with Wood Epoxy deck; monohull arrangement
- Powertrain: Twin MTU inboard diesel engines offering dependable thrust and serviceability
- Volume and capacities: 115 gross tons; fuel capacity 1003.85 gal; fresh water capacity 303.8 gal
- Liveability: Configured to sleep 10 across five cabins with five heads for comfortable longer cruises
- Proven pedigree: Conceptualized and constructed by TUZLA ISTANBUL TURKEY as a refined motor yacht

Questions and Answers

Q: What is the yacht type of the 26M Flybridge? A: **Yacht type:** It is a motor yacht built by TUZLA ISTANBUL TURKEY with a wooden hull and a monohull layout.

Q: What engines power the 26M Flybridge? A: **Engines:** 2 x MTU, inboard diesel units delivering reliable propulsion and straightforward maintenance.

Q: How many guests can the 26M Flybridge accommodate? A:

Accommodations: Sleeps 10 with five heads, arranged to support comfortable multi day cruising.

Q: What are the principal dimensions and draft? A: **Dimensions:** LOA 85 ft (26 m), Beam 20 ft (6.3 m), Max Draft 8.136 ft (2.48 m), Gross Tonnage 115.

Q: How do I get pricing and proceed with purchase? A: **Ordering:** Contact Andrey Shestakov at Shestakov Yacht Sales for up to date pricing and to arrange inspections, surveys, and transaction management for the 26M Flybridge.

Owner Experience Review

Owners and brokers describe the 26M Flybridge from TUZLA ISTANBUL TURKEY as a five cabin, five head layout that accommodates 10 people, commonly employed for private family cruising and frequently listed as 'charter capable'.

The expansive flybridge and dedicated on deck tender stowage are repeatedly praised for weekend entertaining and guest comfort, making the yacht well suited to social cruising and hosting.

There is no published performance data in the available materials; verified cruise speed or full performance figures are not provided in brochures or listings. From technical survey notes, the rudder was operable by hand force, and the gearbox coupling and propeller shafts were reported in good condition.

Built with a laminated wooden hull, Tuzla-built wooden yachts are reported by

owners to perform well when maintained, but they require routine care. The survey observed the interior condition as 'ACCEPTABLE CONDITION'. The engine room is located beneath the main deck with access through the aft/back cabin, indicating internal service access though limited direct deck level entry.

Maintenance items highlighted to budget for include corroded exhaust pipe connections that need replacement, portable fire extinguishers past their service dates, and a liferaft requiring re service, all in addition to the regular higher upkeep and periodic refit demands typical of wooden hulled vessels.

Pros and Cons

- Five cabin, five head arrangement sleeps 10, suitable for private family use or charter operations.
- Generous flybridge and on deck tender storage enhance weekend leisure and guest entertainment.
- Survey findings show the rudder could be moved by hand and gearbox coupling/shafts were in good condition.
- No published cruise speed or performance metrics are available in public listings.
- Laminated wooden hull necessitates regular maintenance and occasional refit, leading to higher annual upkeep.
- Survey identified rusted exhaust pipe connections and out of date safety equipment that require servicing.

Comparison with Other Models
