OVERVIEW

The 255X by YAMAHA is a flexible 25 ft (7.62 m) twin engine motor yacht constructed on a proven fiberglass and plastic platform. Listed through Shestakov Yacht Sales with broker Andrey Shestakov, the specification prioritizes dependable performance and straightforward ownership.

Selecting a 255X

For buyers seeking a compact 25 foot craft suited to day trips and family outings, the twin engine layout, gasoline fueling, and robust fiberglass and plastic hull are appealing attributes. As a model from YAMAHA, the 255X benefits from brand recognition and accessible service networks. If you prefer the simplicity of an unleaded fuel powertrain in a nimble motor yacht, this yacht fits that brief.

Features of the Model

- LOA of 25 ft (7.62 m) for confident handling and convenient storage options
- Twin engine propulsion (2) installed by YAMAHA
- Fuel type: Unleaded, for straightforward refueling and availability
- Hull construction: fiberglass and plastic construction
- Category: motor yacht class
- Deck material listed as "Other"
- Hull configuration listed as "Other"
- Professional brokerage and sales support provided by Shestakov Yacht Sales and Andrey Shestakov

- Hull configuration: Other

Pricing and Ordering

To obtain up to date pricing, confirm availability, or map out the purchase timeline — including survey coordination and delivery logistics — reach out to Shestakov Yacht Sales. Broker Andrey Shestakov can walk you through the full specification, required paperwork, and the next steps to secure the 255X from YAMAHA.

Questions and Answers

Q: What is the LOA of the 255X? A: The **LOA** measures 25 ft (7.62 m), offering a compact yet capable footprint for a small motor yacht.

Q: How is the boat powered? A: Propulsion comes from two **engines** manufactured by YAMAHA (engine type indicated as **Other**) and the system uses **Unleaded** fuel.

Q: What is the hull made of? A: The **hull material** is listed as fiberglass and plastic.

Q: What category does this model belong to? A: It is categorized as a **motor yacht** , suited for versatile dayboating and family cruising activities.

Q: Who can help me purchase this model? A: Contact **broker** Andrey Shestakov at **Shestakov Yacht Sales** for personalized assistance with the 255X by YAMAHA.

Owner Experience Review

Owners commonly refer to the 255X from YAMAHA as a do it all platform: it handles family outings, sandbar gatherings, and a mix of watersports with minimal fuss. For casual wakesurfing and wakeboarding, owners make use of the integrated ballast and wake shaping features to deliver family friendly sessions, while noting it's not designed as a purpose built V drive surf boat. Dayboat users praise the easy docking, the practical swim platform, and many cite the onboard head as a decisive comfort factor for family trips. A number of owners report the factory audio can sound thin on bass until amp gains are adjusted by a dealer or owner—a relatively simple correction.

On the water, testers highlight that Docking Assist provides steadier low speed handling with reduced twitchiness. Performance checks show quick planing in roughly three seconds, a comfortable slow cruise near 33 mph at 5700 RPM, and reported top speeds around 52–55 mph. Several owners emphasize that slow speed behavior differs from traditional outboards or stern drives, so there is a learning curve and DriveX doesn't eliminate all handling differences. In ownership, common maintenance notes include tracking DriveX faults back to low battery voltage or loose electrical connections; Connext screen reboots have been mitigated through dealer recalls or software updates; drain hoses are prone to clogging; and debris

entering the jet pump can produce vibration. Regular pump cleanouts and impeller checks are typical owner tasks, and overall upkeep is described as fairly straightforward.

Pros and Cons

• Versatile platform for family cruising, sandbar outings, and a variety of watersports.
• Fast to plane with a relaxed cruise speed of about 33 mph and top end in the low to mid 50s.
• The onboard head delivers genuine convenience for family day trips compared with pure surf focused boats.
• Storage capacity is reduced because ballast tanks occupy locker volume.
• Low speed handling requires adjustment compared to outboards or stern drives, even when using DriveX/Docking Assist.
• Some owners encounter Connext reboots and DriveX faults related to low battery voltage or poor connections, necessitating checks or dealer software updates.

Comparison with Other Models

Model	LOA	Beam	Draft	Speed (Cruising/Max)	Gross Tonnage
