OVERVIEW

PERSISTENCE makes a refined return to the marketplace following an extensive 2025–26 mechanical and cosmetic refit, during which every system onboard received careful inspection, servicing and selective upgrades; the full extent of the work is described in the brochure. She is maintained under full yacht management, with a highly experienced captain overseeing her operational program. Configured to welcome 10 guests across five staterooms, she features an impressive full-beam master suite positioned forward on the main deck, complemented by four spacious guest cabins on the lower deck. Built as a full-displacement steel-hull luxury motor yacht with a composite superstructure, PERSISTENCE registers 297 gross tons and delivers the internal volume and commanding presence of a vessel exceeding 40 metres. The expansive main salon exudes understated elegance, while the skylounge serves as an exceptional retreat, furnished with sumptuous seating, a full-service bar and a generous pantry/service area ideal for sophisticated entertaining. On the boat deck the principal feature is a 3-ton davit; she currently carries a 7m AB tender and two jet skis with ease and retains capacity for additional watersports equipment. A dedicated beach club enhances guest enjoyment, appointed with a day head, washer/dryer, a mini-bar and extra storage for toys. Presented in excellent condition with all maintenance current, this bluewater superyacht is offered turnkey.

DETAILED DESCRIPTION

Walkthrough

The main salon greets you with a generous U-shaped settee, a double-sized chair, and formal dining for ten, all presented against a dramatic backlit stone feature wall and complemented by custom artwork and integrated storage cabinets to port and starboard at either end of the dining table. A discreet passage to port provides direct access to the galley and crew zones. The galley is laid out for serious culinary work, offering abundant refrigeration and freezer capacity, a dumbwaiter serving both the sky lounge and the sundeck, twin ovens, a coffee machine, dishwasher, ice maker, and expansive countertops that give the chef ample space to prepare and plate service. Forward to port, stairs lead down to the crew quarters, where a substantial crew mess, a dedicated desk area, and three cabins accommodate up to 5/6 crew members, each with its own ensuite. An additional crew galley area supplies extra refrigeration and freezer space plus a microwave.

Proceeding forward on the main deck to starboard, the guest foyer features a central staircase that channels natural light between decks, a convenient day head, and the entrance to the full-beam master suite. The master is appointed with a centerline king bed, custom closets, and a full-beam bathroom with his-and-hers sinks, a separate shower, and a tub, all beautifully accented in blue and white stone. On the lower deck are four further guest cabins: three with queen berths and one arranged with two twins, each generously proportioned and fitted with private ensuites.

Rising the floating glass stairs brings you to the bridge deck, where the wheelhouse sits forward with a captain’s chair, a comfortable sitting area, and direct outboard access to port and starboard via wing stations. A day head inside precedes the inviting sky lounge, which first reveals a built-in desk area

that seats four—perfect for guests or children—before opening into the lounge proper featuring a centerline bar with three stools and a backlit feature wall for bottle storage and stemware. A folding card table stows to starboard when not in use while a leather L-shaped settee to port invites relaxation. Forward off the sky lounge to port, an expansive stewardess pantry houses the dumbwaiter and a dishwasher and provides abundant storage and counter space.

Aft, sliding doors reveal a massive boat deck equipped with a 3-ton davit, opening a world of possibilities for tenders and toys. Forward to port on this deck is a section that terminates—there is no full walkaround to port, only to starboard—making it an ideal location for stowing inflatables, paddle boards, jerry cans, and similar gear. Continuing forward to starboard, the bow displays an impressive sheer height that stands above comparable yachts. A centerline seating area with a collapsible table is flanked by sunpads to port and starboard, and a centerline hatch accesses a very large chain locker with generous room for lines, fenders, and spares; the ground tackle completes this purposeful foredeck.

The upper sundeck is a beloved retreat, centered on a table flanked by sunpads to port and starboard, each with built-in storage, while aft a comfortable seating area is furnished in teak. Beneath the hardtop to port are the dumbwaiter, storage, and counter surfaces, and to starboard an ice maker, refrigerator, sink, and additional counters ensure seamless service. All the way forward on centerline, a second helm station completes this versatile deck.

PERSISTENCE is finished in a striking metallic blue that conveys understated elegance. Meticulously maintained since new and showing low hours, she is offered with the remainder of extended Platinum warranties on her engines and generators, presenting a truly turn-key vessel ready to sail as soon as her new owner steps aboard.

Completed improvements, April 2025–September 2026

Between April 2025 and September 2026 the yacht underwent an extensive program of upgrades that modernized navigation, communications, comfort and safety while preserving a level of refinement befitting an owner of distinction. At the heart of the bridge renewal was a full navigation-electronics overhaul that replaced the helm suite with new Furuno plotters paired with three Seatronx monitors and a single Nobeltec navigation computer, integrated dual radars, a Simrad autopilot, two Icom VHF radios, a satellite compass, remote controls, transducers and a weather station, all tied together with fresh cabling and a thoughtfully reworked helm console to accept the new equipment. The vessel's onboard network was reconceived with Starlink configured as the primary LAN, supported by a Pepwave Max HD and an enterprise-grade Ubiquiti installation, while the audiovisual experience was elevated through a new system that designates Apple TV as the principal video source and Sonos as the master controller for audio distribution and zoned listening.

Comfort and environmental control were advanced through targeted mechanical work that included upgrading the raw-water supply pumps and their arrangement, renewing controls and air-handler components, reinforcing pipe supports, adding chilled-water manifold insulation and replacing one chiller to ensure efficient, reliable climate performance. The yacht's exterior was refreshed with a comprehensive new canvas package that renews protective covers for all exterior furniture and equipment, renews the flybridge enclosure panels and provides tailored covers for seating, tables, tenders and personal watercraft, and two new Yamaha Jet Skis — YAMAHA VX1050F-B 2025 VX models — were added for on-water enjoyment.

Shore-power capability was strengthened by inspecting and megger-testing

every shore power cord, repairing or replacing components as required, improving connection options to accommodate common shore-power configurations and fitting brand-new shore power cords along with a second cord receptacle for greater redundancy and convenience. Freshwater distribution was improved by replacing the fresh water pumps and filtration with two Headhunter Aquabox units, while the laundry was renewed with new washers and dryers and an optimized onboard layout. Operational awareness received a leap forward through an upgraded vessel alarm-monitoring system, resolution of prior network issues, the addition of a portable tablet interface for machinery-space monitoring and remote vendor access to support diagnostics and ongoing monitoring.

Access and handling systems were thoroughly refreshed: the tide-rise boarding stairs were fully refitted with renewed teak treads, replaced hardware and stabilized handrails to enhance safety and presentation; davit reliability and performance were improved by repairing the davit hatch and top plate, refining the remote connection arrangement, providing a secure stowage method for the crane hook, rebuilding the hydraulics, replacing the Spectra line and completing a successful load test. Crew living areas benefited from the replacement of all crew mattresses and renewal of the crew-settee cushions, while shipboard reliability was advanced by adopting Sea Hub as the primary PMS and addressing all systems and deferred maintenance items. Fuel-management accuracy was bolstered with the installation of a fuel counter and a sight gauge to provide precise control over fuel transfers and bunkering, and lifesaving arrangements were made safer by relocating the port life-raft rack to a float-free position and improving independent hydrostatic-release securing methods.

Security and guest amenities received careful attention with the installation of new locks at vessel entry points, upgraded secure key access, repairs to multiple door-locking components and replacement of ice makers serving both the beach-club and bridge areas. Wellness facilities were expanded with new

gym equipment, including a Peloton and a free-weights bench with accessories; the overall safety plan was fully updated; the galley gained a bulkhead-mounted folding worktable to improve plating and organization; and owner privacy was enhanced by frosting the owner-stateroom shower glass. These concentrated efforts leave the yacht thoroughly modernized, safer, more comfortable and better prepared for the most exacting voyages.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
