DETAILED DESCRIPTION

Walkthrough

Electric sliding doors glide open to reveal a spacious salon framed by panoramic windows that bathe the interior in filtered natural sunlight. A marble-topped bar anchors the social space, complete with bar fridge, ice maker, and wine chiller, all served by multiple storage cabinets for effortless entertaining. The ambiance is elevated by hi-gloss maple finish accents and maple cabinetry, with fluted and grooved columns, crown moldings, central light features, and tailored window treatments creating a refined, gallery-like setting. Entertainment is at your fingertips with a flat-screen TV and a surround sound home theatre. A marble day head stands nearby for convenience, and a spacious stowage doghouse ensures gear is neatly out of sight.

Beyond, a separate dining salon awaits, offering an eight-seat formal setting around a contemporary glass dining table, secluded by sliding pocket doors and complemented by a fine china and crystal cabinet. For more casual moments, an informal captain dining area provides a relaxed alternative. Accommodations forward include captain double and twin staterooms, while crew staterooms with head and showers deliver comfort and privacy for extended passages.

A semicircular staircase descends to the full-beam master aft stateroom, where a king-sized bed, vanity, and walk-in closet are paired with a flat-screen TV and surround sound for private retreat. Thoughtful service elements include a pantry with refrigerator and dedicated bottle storage. The master bath, finished in Italian marble with cherry trim, features his and her sinks and a Jacuzzi bath with gold Italian fixtures. Completing the accommodations are two guest staterooms to port and starboard, each with twin berths and an ensuite head and shower.

Notable features

Thoughtfully engineered water systems include guest grey water capacity of 100 gallons, black water capacity of 400 gallons, and fresh water capacity of 800 gallons. The Sea Recover Aqua Whisper water maker shows 410 hours and produces 60 gallons per hour.

Precision maneuvering comes courtesy of hydraulic Side-Power bow and stern thrusters rated at 50 hp each, while ride comfort is enhanced by Wesmar RS1200 stabilizer fins, 4800. Safety is further elevated by a Sea-Fire H System FM200 fire suppression installation.

The electronics suite features a Garmin black-box GPS/chart plotter, a Nobeltec GPS/chart plotter, a Furuno radar, Vmag WiFi, a Furuno depth sounder, Sirius XM Radio, and SatTV-Direct TV.

Bridge deck

Designed for effortless command and convivial relaxation, the bridge deck presents up-to-date electronics at a starboard-forward wheelhouse and a ship's monitoring system with comprehensive backup systems for assured oversight. The helm chair anchors the command position while a leather sofa offers comfortable companion seating. A sliding glass door opens to the sundecks, revealing an inviting alfresco dining area alongside a full wet bar complete with refrigerator, ice maker, and grill, all shaded by a Bimini top. Discreet crew access preserves guest privacy, and movement to the sundeck is easy from both pilothouse and aft deck.

Deck equipment

The foredeck features an anchor windlass by Sanguineti Chiavari, while aft warping is managed by capstans from STM Bologna, Italy. Boarding and shore

access are facilitated by one retractable passerelle complete with an electric hydraulic pump, and watersports operations are supported by a hydraulic davit for handling the tender or jet ski. Confidence at anchor is assured with new anchors and chain fitted in 2017.

Navigation

Command with confidence thanks to two Furuno Black Box radars paired with a Ritchie gyrocompass and Ritchie magnetic compass for unwavering heading reference. A Simrad AP70 autopilot works in concert with an Azimuth digital compass to maintain precise course control, while a Garmin depth sounder, Garmin GPS, and a Garmin GPS laser plotter provide exacting situational awareness and route depiction, complemented by a Garmin GMI 10 that consolidates key instrument data. Nobeltec XO navigation runs seamlessly, with Garmin touch screens serving as backup displays, and performance insights are enriched by the B&G wind/speed log, Furuno Navtex, and Furuno GMDSS for robust information flow and safety compliance. Weather intelligence arrives via the Vartex Weather FAX, night operations are guided by ACR spotlight control, and close-quarters handling is made effortless with Side Power bow and stern thruster control. Onboard protection is anchored by a new Tyco fire system control installed in 2017.

Galley

Thoughtfully appointed for serious culinary endeavors, the galley features a KitchenAid refrigerator/freezer paired with a Sub-Zero double-drawer freezer unit to keep provisions impeccably organized and chilled. Meal preparation is effortless with a Miele glass-ceramic cooktop complemented by a Kenmore convection oven and a microwave for rapid reheats or quick creations. Cleanup is streamlined by a General Electric dishwasher, while a Kenmore garbage

compactor and an InSinkErator garbage disposal discreetly manage waste. Additional cold storage comes by way of a U-Line refrigerator, with a dedicated KitchenAid icemaker and a KitchenAid wine chiller ensuring beverages are served at the perfect temperature. Practicality extends to onboard laundry with a Kenmore washing machine and a matching Kenmore dryer, completing a galley designed for comfort, convenience, and refined living at sea.

Electronics

Designed to delight audiophiles and cinephiles alike, the yacht's entertainment suite begins with elegantly appointed screens throughout: the master stateroom features a twenty-seven-inch JVC flat-screen TV, the VIP stateroom mirrors this with its own twenty-seven-inch JVC flat-screen TV, while the guest stateroom, captain's cabin, and crew cabin each boast a twenty-inch Sharp LCD flat-screen TV, and the galley adds a twenty-inch Sharp flat-screen TV for effortless viewing while at work or at leisure.

Atmosphere across social spaces is curated by JVC music systems in the main salon, the dining room, and on the aft deck, ensuring rich, consistent sound whether entertaining indoors or alfresco.

In the master stateroom, a JVC Home Theatre System anchors movie nights with a DVD/CD/tuner, two satellite speakers, a center speaker, a subwoofer, Sony SAT A55 satellite receivers, and the added convenience of a mini refrigerator. The VIP stateroom is equally well equipped with a JVC Home Theatre System comprising a DVD/CD/tuner, two satellite speakers, a center speaker, a subwoofer, and Sony SAT A55 satellite receivers. The guest staterooms elevate private retreats with a JVC Executive Home Theatre System featuring a DVD/CD/tuner, two satellite speakers, a center speaker, a subwoofer, and Sony SAT A55 satellite receivers. The captain's cabin continues the theme with a JVC Executive Home Theatre System that includes a DVD/CD/tuner, a center speaker, two satellite speakers, a subwoofer, and a

Sony SAT A55 satellite receiver, while the crew cabin adds reliable recreation with a JVC Executive Home Theatre System offering a DVD/CD/tuner, two satellite speakers, center speakers, a subwoofer, and a Sony SAT A55 satellite receiver.

Out on deck and at the helm, seamless integration keeps the soundtrack flowing: the flybridge is fitted with a Clarion AM/FM stereo/CD changer with an auxiliary connection to the salon entertainment system; the wheelhouse carries the same Clarion unit with an auxiliary tie-in and is complemented by a Sony SAT A55 satellite receiver; the galley enjoys a Clarion AM/FM stereo/CD changer with auxiliary connection to the salon entertainment system; and the foredeck sunpad areas are likewise served by a Clarion AM/FM stereo/CD changer with the same auxiliary link for effortless control.

An array of eight MB Quart speakers orchestrates clear, balanced audio throughout, with two mounted forward near the helm, two in the settee area, two under the radar arch, and two in the sunpad area, delivering immersive sound exactly where it matters most.

Electrical

The yacht's propulsion and onboard power architecture is anchored by the MTU 16V2000 M90 working through ZF Reduction Gears 2555A to nibral five-blade propellers, with a spare set of propellers carried aboard for added assurance. Electrical output is configured at 120/208V/60Hz and supported by two 55 kW Onan MDGDC Platinum Series units, while an Atlas shore power converter ensures seamless dockside compatibility. Starting and service power is entrusted to Varta batteries, with four dedicated to main engine starting, four to generator starting, and four to general service. Climate control is maintained by a Cruisair 18 ton chilled water system rated at 218,000 BTU. Complementing these systems, a Sea Recovery Aqua Whisper watermaker delivers 60 gph, Rodriquez stabilizers enhance seakeeping, and a BCS steering

system provides precise control. Fuel is polished by an Alfa Laval Fuel Treatment System rated at 200 gph, sanitation is handled by Sealand Vacuflush, and fresh water is assured by a Sea Recovery 1200 GPD Aqua Compact system.

Engine room

Accessed either through the stern garage door or via a companionway on the starboard side deck, the engine room sits forward of the garage and is thoughtfully arranged, notably spacious, and designed to provide superb room and access for maintenance. Propulsion comes from twin MTU 16V2000 M90 engines showing 4,025 hours, turning through ZF Reduction Gears 2555A with a precise 2.778:1 ratio for smooth, efficient power delivery.

Electrical generation is equally robust, featuring two Onan MDGDC Platinum Series 55 kW 60 Hz units with approximately 3,950 hours on the starboard side and 4,065 hours to port. Complementing these are Cummings engine Onan generators rated at 55 kW 60 Hz with 2,905 starboard hours and 3,288 port hours, together with Onan generators 55 kW 60 Hz carrying the same 2,905 starboard and 3,288 port hours, ensuring abundant, redundant onboard power.

The ship's service output is 120/208V/60Hz, supported by two Onan MDGDC Platinum Series 55 kW units, with generator starting provided by four Varta. Shore supply is seamlessly managed by the Atlas shore power converter system, extending flexible connectivity in port. Fuel is polished by an Alfa Laval fuel treatment system with an integrated water separator rated at 200 gph, promoting clean, reliable engine performance. Climate control is distributed through three air handlers from 2017, delivering quiet, even comfort throughout the yacht.

Security, fire & safety equipment

Security on board is anchored by a Panasonic CCTV system paired with four Panasonic cameras for comprehensive coverage, while fire protection is assured by Seafire 10 BC portable fire extinguishers. Safety at sea is further enhanced by two eight-person inflatable life rafts, two life rings, and flares.
