OVERVIEW

LUMPASAUROS, a 2023 Custom Line Navetta 33, is presented in pristine condition and benefits from the stewardship of a full-time professional crew who have maintained exacting standards through preventative care and continuous upgrades, resulting in a truly turnkey superyacht.

Throughout 2026 she underwent an extensive program of preventive servicing, mechanical attention and cosmetic refinements, with the current owner investing in excess of \$400,000. Following a comprehensive pre-purchase survey and sea trial, the seller resolved every item noted by the surveyor, further elevating a vessel that was already maintained to an exceptional level. US duty is paid, and the yacht has been used privately only and never offered for charter. Currently berthed at Island Gardens Marina in Miami, LUMPASAUROS is available for immediate inspection and carries MAN GSP Gold Standard Premium Extended Warranty and Seakeeper Platinum Extended Warranty through the end of March 2028.

Measuring 108 ft LOA, LUMPASAUROS presents the volume and presence of a tri-deck superyacht, arranged with five guest staterooms served by six guest heads and four crew cabins to ensure impeccable service. Propulsion is provided by twin MAN V12 engines rated at 1,400 hp apiece, affirming her Navetta-class pedigree as a long-range cruising yacht that marries comfort, stability and refined elegance for the most discerning owners.

DETAILED DESCRIPTION

Main deck

Occupying the forward reach of the main deck, a generous wide-body master suite anchors the layout, where a bespoke office desk sits alongside a custom leather bed frame and matching headboard set against a striking wallpaper feature wall above the bed. The suite includes an interior walk-in closet finished in lacquer and appointed with reading lights in a brass finish, while the master bathroom is clad in exquisite Calacatta Oro marble and fitted with built-in wash basins and a bench shower. American walnut flooring runs continuously through the salon, lobby, day head and master cabin, bringing warmth and cohesion to the principal living areas. Daily routines are made effortless by an automatic opening door linking the salon and pantry and by an automated aft glass door in the main-deck salon, which also benefits from a balcony integrated into the starboard bulwark. The main-deck salon is furnished with a custom dining table by Paolo Castelli, a refined freestanding furniture package and a tailored rug, and the exterior is completed by a bespoke main-deck cockpit furniture ensemble, harmonized with a coordinating rug and lanterns to create a seamless indoor-outdoor experience.

Lower deck

On the lower deck four guest cabins deliver elegantly appointed accommodation. The starboard-side guest cabin is equipped with a Pullman berth, while both the portside and starboard VIP cabins are fitted with queen beds that can be separated via a manual sliding system; in the starboard guest cabins an additional mattress can be placed between the beds for greater flexibility. Each lower-deck cabin is furnished with bespoke leather ottomans

and upgraded mattresses beyond the standard specification, and the curtains in all four cabins are raised by electric operation. The TV frames in the lower-deck cabins are trimmed in the same leather as the surrounding columns for a harmonised finish. Bathrooms across the lower deck feature Calacatta Oro marble washbasin tops, marble shower floors and benches set over American walnut flooring, with inspection hatches installed in the VIP showers, a mosquito-net package for the portholes, and bespoke bathroom accessories complemented by satin-finish taps and fittings.

Upper deck

The upper-deck salon is elegantly appointed with a freestanding furniture scheme, enriched by an additional ottoman and a soft rug set upon American walnut flooring, all centred around a 55-inch Samsung TV while electrically raised curtains provide seamless ambiance control. A bespoke upper-deck cockpit furniture package continues the refined aesthetic, bringing together a dining table with chairs, a comfortable sofa and a matched coffee table, while the bar furnishings include an extra refrigerator in the upper-deck cockpit and an icemaker in the upper-deck bar. Connectivity is elevated by additional access points and a comprehensive Wi-Fi infrastructure distributed throughout the yacht, and a captain's cabin is conveniently situated adjacent to the helm.

Sun deck

The sun deck has been arranged as a sanctuary of effortless pleasure, anchored aft by a Bimini canopy upheld on elegant carbon fibre stanchions, while a removable Bimini shelters the aft upper deck and a manual Bimini precisely covers the forward dinette. Kettal sunbeds encourage languid afternoons, complemented by bespoke stools and optional sun deck furniture

packages, and a sophisticated furniture module conceals a hydromassage bath tub complete with heater for soothing open-air soaks. Underfoot the deck and the forward triangular area are laid in teak with black caulking, softened by a sumptuous rug, and as dusk falls the mood is set by three Roda lanterns together with exterior dimmer lighting. Entertainment is served by a 49-inch TV on a lift-and-rotation system and enhanced by additional exterior loudspeakers, while practical conveniences include an extra compressed-air outlet and an additional fresh-water outlet, and safety is addressed with a dedicated aft position for liferafts.

Beach club / swim platform / garage

Designed to elevate waterfront living, the beach club, swim platform and garages combine purposeful engineering with refined finishes. A hydraulic/electrohydraulic aft garage system makes hoisting and launching the jet ski effortless, while the configuration is prepared to accept a customer tender for straightforward installation. In the bow garage a crane rated to a maximum loading of 500 kg works in concert with a waterproof 220V socket to facilitate smooth handling and service tasks. The aft garage is thoughtfully appointed with a fresh-water outlet for washing, a waterproof roller curtain and a backlit boat name that provides a dramatic illuminated signature. On the bathing platform, retractable cleats preserve the yacht's clean lines, a removable side ladder offers discreet access, and a hand shower delivers both hot and cold fresh water. After dusk, underwater lighting—four fixtures on each side and two at the stern—bathes the surrounding water in a theatrical glow, while additional loudspeakers in the beach area set the tone for memorable evenings by the sea.

Helm / navigation

The helm is equipped with a super premium integrated bridge upgrade that brings professional navigation and control systems together in a single, elegant command hub. A Furuno Class B Automatic Identification System (AIS) maintains vigilant situational awareness while a dedicated night and low-light camera extends vision, with its feeds duplicated on the captain's cabin TV for convenient monitoring. Gyro stabilizers smooth the vessel's motion, and a 58 hp hydraulic stern thruster with a double propeller provides precise, confident handling when maneuvering. Everyday convenience is addressed with internal USB outlets located in the cabins, in both the MD and UD salons, and at the helm, with US sockets implemented alongside European outlets. Connectivity is comprehensive, combining a KVH HD11 antenna and a salon receiver with a Super Premium Internet package, and the yacht is fitted with a Starlink predisposition for straightforward future integration.

Galley / pantry

A tailored Ernestomeda galley forms the centerpiece of the culinary quarters, enhanced by an upgraded suite of Miele appliances and supported by bespoke refrigeration with a dedicated galley freezer, while a Miele washer and dryer provide discreet utility. Service is refined on the upper deck with a pantry that accommodates a Dunavox wine cooler holding 181 bottles, and an automatic opening door between salon and pantry ensures effortless circulation. Potable water is assured by an activated carbon filter, a water softener and a UV sterilizer, and extended self-sufficiency at sea is delivered by an Idromar watermaker upgraded to 500 l/h working in concert with a Hamann black-water treatment system.

Engine room / technical

Propulsion is provided by twin MAN V12s, each delivering 1,400 hp and currently recording 2,015 hours per engine, while electrical needs are met by Kohler main and auxiliary gensets rated at 55 kW with 3,000 generator hours logged and configured on an automatic parallel system for seamless load sharing. Routine maintenance is simplified by a centralized oil-change facility that serves the engines, inverters and generators, and shore-power compatibility is extended through an installed 50 Hz frequency converter. Fuel integrity is maintained with an Alfa Laval fuel oil filter and drivetrain security is reinforced by an Idrostop system on the shaft-line seals. The engine room has been detailed for practical operation with additional compressed-air and fresh-water outlets, accessible genset ball valves and clearly marked stickers denoting pipe-flow direction. Long-range autonomy is assured by a duplex watermaker complete with an automatic washing cycle, while onboard comfort benefits from the "Comfort" Tropical air-conditioning package with UTA upgrade, and seakeeping is enhanced by fitted gyro stabilizers.

Disclaimer

The specifications and descriptions provided for this vessel are offered in good faith; however, neither the accuracy of the information nor the condition of the yacht is guaranteed or warranted. Prospective purchasers are strongly advised to engage their own brokers or a qualified surveyor to confirm any particulars they consider material. This vessel is offered for sale and may be sold prior to notice, have its asking price adjusted, or be withdrawn from the market without prior notification.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
