OVERVIEW

This exquisite 2018 Pershing 108 stands out as the finest example of its kind currently available on the market. Equipped with a powerful trio of MTU M96L engines delivering nearly 8000HP, and paired with triple Top System Surface Drives, this yacht can reach exhilarating speeds exceeding 40 knots! It is one of only two models featuring a unique three-cabin layout with a lower salon/media room, making it a rare find among yacht sales in the current boat location. The interior and exterior are adorned with numerous bespoke furnishings and luxurious details, ensuring an opulent experience on the water. Additionally, the inclusion of two Seakeeper NG16 stabilizers guarantees unparalleled comfort during your voyages. If you're looking to buy a yacht that combines performance with elegance, this Pershing 108 is an exceptional choice.

DETAILED DESCRIPTION

Standard Equipment on the Upper Sun Deck

The upper sun deck of this yacht is a haven of luxury and functionality, designed to enhance your cruising experience. It features a well-appointed bar area complete with bar furniture, a fridge, a barbecue, a sink, and a dustbin, ensuring that all your entertaining needs are met. For relaxation, there is a comfortable chaise lounge, perfect for soaking up the sun. Each box on the deck is equipped with double 120V internal sockets, providing convenient power access for your devices.

Safety and convenience are prioritized with the inclusion of an EPIRB and a gate for the stair, ensuring peace of mind while on board. The deck is adorned with a GRP sofa, offering plush seating with backrests upholstered in durable vinyl fabric. A hand shower with a hose reel is available for a refreshing rinse after a swim, while the deck's lighting creates an inviting ambiance for evening gatherings.

Entertainment is enhanced with four strategically placed loudspeakers, delivering quality sound throughout the deck. Storage is ample, with two side lockers providing space for your essentials. The deck is bordered by a robust stainless steel handrail, 40mm in diameter, ensuring safety without compromising on style.

For sunbathers, a sun pad upholstered in vinyl fabric offers a comfortable spot to relax. The deck's teak floor adds a touch of elegance and durability, complementing the overall aesthetic. Communication is seamless with a VHF transceiver, keeping you connected at all times. This upper sun deck is a perfect blend of luxury, safety, and functionality, making it an ideal space for both relaxation and entertainment.

Antennas area

The antennas area of this yacht is a sophisticated hub of advanced communication and navigation technology, ensuring seamless connectivity and precise navigation. At the heart of this area is the open array radar antenna, which provides comprehensive radar coverage for safe and efficient navigation. Complementing this are two domes that house essential equipment, enhancing the yacht's communication capabilities.

The area is equipped with two GPS antennas, ensuring accurate positioning and reliable navigation data. A GRP radar arch serves as a sturdy support for the radar, antennas, and signals, integrating all components into a cohesive system. The GSM antenna ensures mobile connectivity, keeping you in touch with the world even while at sea.

For entertainment and information, a SAT TV antenna with a 65 cm diameter dome provides access to satellite television, while a separate TV antenna ensures reception of terrestrial broadcasts. The signal mast, crafted from stainless steel and finished in sleek black paint, adds a touch of elegance while supporting various signals.

Communication is further enhanced with two VHF antennas, ensuring clear and reliable radio communication. Finally, a wind detector is included, providing vital data for navigation and ensuring a smooth sailing experience. This antennas area is a testament to the yacht's commitment to cutting-edge technology and seamless connectivity.

Main deck cockpit with outside aft dinette

The main deck cockpit with its outside aft dinette is a perfect blend of style and functionality, designed to offer an exceptional outdoor living experience. This area provides convenient access to the day head, ensuring comfort and ease for all guests. The space is furnished with five elegant chairs surrounding a

teak table, which is supported by a sturdy steel base, creating an inviting setting for alfresco dining.

The ceiling, crafted from GRP, is equipped with integrated ceiling lights and two loudspeakers, enhancing the ambiance with both illumination and sound. For added security and convenience, two waterproof cameras are strategically placed. Central to the design is the GRP central furniture, which complements the overall aesthetic.

On the starboard side, GRP furniture houses a sink, an 85-liter fridge, and an ice maker, ensuring that refreshments are always at hand. Comfort is paramount, with a sofa featuring seats and backrests upholstered in durable vinyl fabric. Additionally, a sun pad, also upholstered in vinyl, offers a luxurious spot for relaxation, complete with a handrail for safety.

The teak flooring of the cockpit adds a touch of elegance and durability, making this area not only visually appealing but also practical for life at sea. This main deck cockpit with outside aft dinette is thoughtfully designed to provide a seamless blend of luxury, comfort, and functionality.

Access to crew quarters and engine room through GRP ladder

The access to the crew quarters and engine room is thoughtfully designed to ensure both functionality and ease of use. This area is accessed via a GRP ladder, providing a sturdy and reliable means of entry. On the port side, the space is complemented by GRP furniture, which not only enhances the aesthetic appeal but also offers practical storage solutions. This setup ensures that the crew can efficiently manage their duties while maintaining a seamless integration with the yacht's overall design. The use of GRP materials underscores the commitment to durability and quality, making this access point both practical and visually pleasing.

Access to sun deck

The access to the sun deck is designed with both elegance and practicality in mind, ensuring a seamless transition to this luxurious outdoor space. The external stairs, crafted from GRP, provide a sturdy and reliable ascent to the sun deck, with each step elegantly finished in teak, adding a touch of sophistication and durability. The entrance to these stairs is secured by a GRP access door, which not only complements the yacht's sleek design but also ensures safety and privacy. This thoughtful design allows for easy and stylish access to the sun deck, enhancing the overall experience of enjoying the open sea and sunlit vistas.

Access to bathing platform

The access to the bathing platform is meticulously designed to offer both convenience and luxury, ensuring a seamless connection to the water. On the port side, GRP stairs with elegant teak steps lead down to the platform, equipped with a fresh water mixer tap and shower for rinsing off after a swim. A shore water plug is available for easy water access, and a stainless steel gate provides secure entry to the cockpit. Additionally, a water loading dock is thoughtfully integrated for added convenience.

On the starboard side, similar GRP stairs with teak steps provide access, complemented by a stainless steel gate. The Glendinning electric shore connection, offering 100A at 400V with three poles and ground, ensures reliable power supply, with a 20-meter shore plug for flexibility. A telescopic hydraulic hideaway gangway, operable via remote control, adds a touch of sophistication and ease of use.

The platform itself features a teak floor, enhancing both its aesthetic appeal and durability. A hydraulic hideaway swim ladder is seamlessly integrated into the bathing platform, allowing for easy access to the water. Four stainless steel

mooring cleats at the stern ensure secure docking, while underwater lighting enhances the ambiance and safety of the swimming platform, making it a perfect spot for evening swims or simply enjoying the water's edge.

Aft garage

The aft garage of this yacht is a marvel of engineering and design, providing a secure and efficient space for storing and deploying watercraft. The garage is equipped with a robust door and a hydraulically powered tailgate kit, ensuring smooth and effortless access. This sophisticated system is designed to accommodate the tender and retrieving system, making the launch and retrieval of watercraft a seamless operation.

At the heart of the garage's functionality is the Tender Williams 5.05 Diesel Jet, a powerful and reliable vessel that enhances the yacht's versatility and exploration capabilities. The garage is illuminated by waterproof fixed explosion-proof neon lights, ensuring safety and visibility in all conditions. This aft garage is a testament to the yacht's commitment to combining luxury with practicality, offering a perfect blend of convenience and cutting-edge technology.

Aft mooring station

The aft mooring station of this yacht is expertly designed to ensure secure and efficient docking, equipped with advanced features that enhance both functionality and safety. At the heart of this station are two powerful 2500W electric capstans, each operated with foot controls, providing effortless handling of mooring lines. The station is further enhanced by stainless steel fairleads with rolls, ensuring smooth and reliable line management.

For anchoring and mooring at the bow, the station includes access to a bow locker through a hatch, offering convenient storage and management of

equipment. The bow locker is complemented by four additional stainless steel fairleads, providing robust support for mooring operations. The anchoring system features two galvanized anchors, each weighing 105kg and designed in the POOL TW style, paired with galvanized chains measuring 165 meters and 100 meters in length with a 13mm thickness.

The mooring station is equipped with stainless steel hawse ports on both port and starboard sides, along with four stainless steel mooring cleats, ensuring secure and stable docking. Additionally, two 2700W windlasses with waterproof control pads provide powerful and reliable anchoring capabilities. This aft mooring station is a testament to the yacht's commitment to safety, efficiency, and ease of use, making it an essential feature for any seafaring adventure.

Bow garage

The bow garage of this yacht is a thoughtfully designed space that combines functionality with comfort, providing an ideal area for storage and relaxation. Access to the garage is facilitated through a hatchway, leading to a secure garage door that ensures the safety of stored items. Above the garage, a sun lounge pad is strategically positioned at the bow, complete with a handrail and cushions, offering a perfect spot for sunbathing and enjoying the sea breeze.

The area is accessible via a stairway crafted from natural wood, adding a touch of elegance and warmth to the design. For safety and visibility, the garage is equipped with a waterproof fixed explosion-proof neon light, ensuring that the space is well-lit and secure in all conditions. This bow garage is a testament to the yacht's commitment to providing both practical storage solutions and luxurious comfort, enhancing the overall onboard experience.

Side walkways

The side walkways of this yacht are designed with both elegance and practicality in mind, providing a seamless blend of style and functionality. These walkways are illuminated by courtesy LED lights, ensuring safe passage during nighttime navigation. Access is made convenient with two electric pantograph side doors, allowing for easy entry and exit.

Fueling the yacht is straightforward with two fuel filling caps strategically placed for accessibility. The distinctive "Pershing 108" logo is elegantly inscribed in silicon on both sides, adding a touch of sophistication and brand identity. For additional storage, side lockers with secure closures are available, ensuring that essential items are always within reach.

Safety is paramount, with stainless steel handrails running along the side of the superstructure, complemented by a robust stainless steel railing with stanchions and hooking points. Midship, you'll find stainless steel retractable mooring cleats, providing secure docking options. The stainless steel rubrail adds an extra layer of protection to the yacht's exterior.

The walkways themselves are covered in wood, offering a warm and inviting aesthetic that enhances the overall luxury feel of the yacht. These side walkways are a testament to the yacht's commitment to quality, safety, and style, ensuring a superior onboard experience.

Outside forward dinette

The outside forward dinette of this yacht is a luxurious and well-appointed space designed for relaxation and entertainment. It features an advanced audio system with an amplifier and loudspeakers, ensuring high-quality sound for your enjoyment. The area is beautifully illuminated by courtesy LED lighting, creating an inviting atmosphere for both day and night use.

A standout feature of this dinette is the hydraulic movement cover, which provides protection and shade when needed. The seating area includes a GRP seat at the bow and a GRP sofa with seats and backrests upholstered in durable vinyl fabric, offering comfort and style. For added convenience, a hand shower with a hose reel is available, perfect for rinsing off after a swim.

The dinette is equipped with a hinged circular hatchway made of stainless steel and crystal glass, complete with a handle for easy access. The GRP table is height-adjustable with a hydraulic piston, allowing for versatile dining arrangements. This area also includes a day head with an electric WC, a GRP door, and a lacquered ceiling, all enhanced by LED lighting and soft-touch light switches.

Additional amenities include a mirror, soap dish, teak flooring, and an emergency exit. The space is completed with a fiberglass and wooden door, a toilet roll holder, a towel rack, and Venetian blinds. The washbasin features a lacquered and glass top with a combined mixer tap, ensuring both functionality and elegance. This outside forward dinette is a testament to the yacht's commitment to luxury and convenience, providing an exceptional onboard experience.

Helm station

The helm station of this yacht is a sophisticated command center, equipped with state-of-the-art technology to ensure smooth and efficient navigation. At the core of its advanced systems is the AIS Furuno, providing crucial information for safe maritime travel. The station is also equipped with an alarms and NAVIOP electric data unit, offering comprehensive monitoring and control over the yacht's systems.

The helm's aesthetic is enhanced by aluminum panels with a sleek carbon fiber finish, combining durability with modern style. For precise navigation, the autopilot system allows for effortless course setting, while the bow thruster

joystick provides easy maneuverability in tight spaces.

A CCTV display with a cyclic selector ensures constant surveillance and security, giving the captain a clear view of the yacht's surroundings.

Connectivity is maintained through a coastal internet system, supporting GPRS and UMTS data systems, ensuring that communication and data access are always available.

This helm station is a testament to the yacht's commitment to cutting-edge technology and seamless operation, providing the captain with all the tools necessary for a superior sailing experience.

Wifi/ LAN

The Wifi/LAN system on this yacht is designed to provide seamless connectivity and integration with the vessel's advanced navigation and control systems. At the heart of this setup is a comprehensive suite of instruments and controls that ensure both comfort and precision while at sea. The system includes a compass for traditional navigation, complemented by depth, speed, and wind indicators that provide real-time data for informed decision-making.

The helm is equipped with co-pilot seats upholstered in luxurious Poltrona Frau leather, featuring double electric controls for personalized comfort. The digital bar angle indicator, along with flaps and trims, offers precise control over the yacht's performance. Digital controlled A/C panels ensure a comfortable environment, while the Display Chart Plotter/Black Box Furuno 3D provides detailed navigation charts and data.

The electric panel and electronic digital LCD engine control panels offer comprehensive monitoring and management of the yacht's systems. Engine control is further enhanced by electronic levers and a suite of navigation control instruments. The helm wheel, also upholstered in Poltrona Frau leather, adds a touch of elegance to the instrument dashboard, which is

similarly upholstered in leather.

Communication is facilitated by a GSM Tel/Fax telephone system, VHF radios, and a radiofrequency portable intercom system. The helm station also features a Navtex for receiving maritime safety information, a panel for the fire detection system, and a synoptic panel for system overview. Additional features include sockets for 12V power, a surface propellers trim joystick, and a tiller joystick for precise maneuvering.

This Wifi/LAN system is a testament to the yacht's commitment to integrating cutting-edge technology with luxurious comfort, ensuring a superior onboard experience.

Lower deck corridor

The lower deck corridor of this yacht is a beautifully designed space that combines functionality with elegance, providing a seamless transition between the various areas of the vessel. Along the corridor, you'll find built-in wardrobes on the port bulkhead, offering ample storage with shelves and an integrated audio-video rack, ensuring that entertainment options are always within reach.

The ceiling panels are covered with vinyl fabric, adding a touch of sophistication, while courtesy LED lights and an LED ceiling with indirect lighting create a warm and inviting ambiance. The soft touch light switches offer easy control over the lighting, enhancing the overall user experience.

Mirrors strategically placed along the corridor add a sense of space and light, while panels upholstered in leather with back LED lighting provide a luxurious touch. The partitions are elegantly covered in wood, complementing the overall aesthetic of the corridor.

The structural GRP floor is covered with moquette, providing a soft and comfortable surface underfoot. This lower deck corridor is a testament to the

yacht's commitment to quality and style, ensuring that every journey through the vessel is both comfortable and visually pleasing.

Primary cabin

The primary cabin of this yacht is a sanctuary of luxury and comfort, meticulously designed to provide an unparalleled onboard experience. The cabin features a beauty unit on the port side, crafted from fine wood and complemented by a mirror, a Poltrona Frau chair, a frigo-bar, and a lamp, creating a perfect space for personal care and relaxation. Adjacent to this, a desk with a pull-out shelf and a matching Poltrona Frau armchair offers a functional workspace, enhanced by a lamp and a digitally controlled air conditioning system for optimal comfort.

The centerpiece of the cabin is a double bed, elegantly constructed from wood and upholstered in Poltrona Frau leather, with convenient storage lockers underneath. The bed is flanked by two Poltrona Frau leather night tables, each equipped with a reading light, ensuring a cozy and inviting atmosphere. The cabin's ambiance is further enhanced by built-in ceiling LED indirect lights and ceiling panels covered with vinyl fabric and framed in lacquered wood.

For entertainment, the cabin is equipped with a state-of-the-art Hi-Fi system, including an amplifier, a Dolby surround system with 5+1 speakers, a full A/V remote control, and a SAT/TV decoder. A LED TV is mounted on a panel upholstered in Poltrona Frau leather, providing a luxurious viewing experience. The cabin also features fixed side windows in tempered glass and three opening portholes in stainless steel and tempered glass, allowing natural light to flood the space.

Additional amenities include electric fabric curtains and blackout roller curtains for privacy, a cordless telephone, and a safe for secure storage. The interior doors are crafted from wood, with chrome door stops and handles with thumb locks, adding to the cabin's sophisticated design. The structural GRP floor is

covered in plush carpet, and the walls are elegantly clad in wood, completing the cabin's refined aesthetic. This primary cabin is a testament to the yacht's commitment to luxury, comfort, and style, offering a truly exceptional living space on the water.

Primary head

The primary head of this yacht is a luxurious and well-appointed space, designed to offer both functionality and elegance. It features a bidet and an electric WC, providing modern conveniences for a comfortable experience. The ceiling is adorned with indirect lighting, creating a soothing ambiance, while the lacquered finish adds a touch of sophistication.

The head is equipped with two washbasins, each with combined faucets for the washbasin and bidet, ensuring ease of use. The washbasin furniture is crafted from wood with a colored glass top, complete with doors and shelves for ample storage. The shower box is a highlight, featuring a crystal shower door, a multifunction ceiling shower head, and a shower handset, with walls, floor, and seat finished in elegant mosaic.

Natural light floods the space through fixed side windows made of tempered glass and an opening porthole in stainless steel and tempered glass. The interior doors are made of wood, complemented by chrome door stops and handles with thumb locks, enhancing the overall aesthetic. The walls are covered in wood, providing a warm and inviting atmosphere.

Additional amenities include a towel cabinet with a glass door and internal shelves, six towel racks, and a variety of holders for soap, toothbrushes, and toilet rolls. The head also features a digitally controlled air conditioning system, manual aluminum Venetian blinds, and a loudspeaker for added comfort and entertainment. This primary head is a testament to the yacht's commitment to luxury and practicality, ensuring a superior onboard experience.

VIP cabin

The VIP cabin of this yacht is a luxurious retreat, meticulously designed to provide comfort and elegance for distinguished guests. The cabin is equipped with a state-of-the-art audio-video system, featuring built-in loudspeakers, a subwoofer, a 40" LED TV, and a TV/SAT decoder, ensuring an exceptional entertainment experience. The full A/V remote control allows for effortless management of the system.

The cabin's ambiance is enhanced by built-in LED ceiling indirect lights, creating a warm and inviting atmosphere. A closet crafted from wood, complete with a clothes rack, internal lighting, and a mirror, offers ample storage space. Additionally, a cabinet with drawers and a safe provides secure storage for personal belongings.

The centerpiece of the cabin is a double bed, featuring a headboard upholstered in Poltrona Frau leather, with convenient storage lockers and drawers underneath. The bed is complemented by wood nightstands with leather tops, each equipped with a reading light for added convenience. The cabin also includes a cordless telephone and a digitally controlled air conditioning system, ensuring optimal comfort.

For privacy and light control, the cabin is fitted with electric fabric curtains and blackout roller curtains. An emergency exit to the upper deck is accessible through a circular hatchway with a hideaway ladder, ensuring safety and peace of mind. The interior doors are made of wood, with chrome door stops and handles with thumb locks, adding to the cabin's sophisticated design.

The structural GRP floor is covered with plush carpet, and the walls are elegantly clad in wood, enhancing the cabin's luxurious feel. The ceiling is paneled and upholstered in vinyl fabric and lacquered wood, adding a touch of refinement. An opening porthole in stainless steel and tempered glass allows natural light to fill the space, while a sliding blind provides additional privacy.

This VIP cabin is a testament to the yacht's commitment to luxury and comfort, offering an exceptional living space for its esteemed guests.

VIP head

The VIP head of this yacht is a beautifully designed space that combines luxury with practicality, ensuring a comfortable and elegant experience for guests. The area is equipped with an air conditioning system outlet and an air extraction outlet, maintaining a fresh and pleasant atmosphere. The ceiling features built-in LED spotlights, providing ample illumination, while the white lacquered finish adds a touch of sophistication.

The head includes a bidet and an electric WC, offering modern conveniences. The washbasin is complemented by combined faucets, and the furniture top is crafted from glass, adding to the sleek design. The washbasin furniture is made of wood, complete with doors and shelves for efficient storage. A hanging locker with a mirror provides additional storage space.

The shower box is a highlight, featuring a crystal shower door, mosaic walls, floor, and seat, along with a shower head and handset for a luxurious bathing experience. The space is further enhanced by manual aluminum Venetian blinds, a mirror, and an opening porthole in stainless steel and tempered glass, allowing natural light to fill the room.

Additional amenities include a soap dish, toilet roll holder, toothbrush holder, and two towel racks, ensuring all essentials are within easy reach. The interior doors are made of wood, with chrome door stops and handles with thumb locks, enhancing the overall aesthetic. The walls are covered in wood, and the floor is made of wood, completing the elegant design of the VIP head. This space is a testament to the yacht's commitment to providing a luxurious and comfortable environment for its guests.

Port double guest cabin

The port double guest cabin on this yacht is a harmonious blend of luxury and functionality, designed to provide guests with a comfortable and elegant retreat. The cabin is equipped with a sophisticated audio-video system, featuring built-in loudspeakers, a 32" LED TV, a mini Hi-Fi CD/DVD player, and a TV/SAT decoder, ensuring a premium entertainment experience.

The ambiance of the cabin is enhanced by ceiling panels covered with vinyl fabric and framed in lacquered wood, complemented by LED ceiling indirect lights that create a warm and inviting atmosphere. The cabin's climate is maintained by a digitally controlled air conditioning system, while electric fabric curtains and blackout roller curtains offer privacy and light control.

The sleeping area features twin beds that can be converted into a double bed, crafted from wood and upholstered in Poltrona Frau leather, complete with drawers for additional storage. The leather bed head border adds a touch of elegance, while the wood nightstands with leather tops provide convenient bedside storage. Wall lights and a mirror on the aft bulkhead further enhance the cabin's functionality and style.

The cabin is equipped with an intercom cordless system for easy communication, and the interior doors are made of wood, featuring chrome door stops and handles with thumb locks for added security. The structural GRP floor is covered with plush carpet, and the walls are elegantly clad in wood, creating a cohesive and luxurious design.

Additional features include an opening porthole in stainless steel and tempered glass, a wardrobe in wood with a clothes rail and internal light, and a TV panel upholstered in Poltrona Frau leather. This port double guest cabin is a testament to the yacht's commitment to providing a superior onboard experience, combining comfort, style, and advanced technology.

Starboard guest head

The starboard guest head on this yacht is a meticulously designed space that combines functionality with elegance, ensuring a comfortable and luxurious experience for guests. The area is equipped with an air conditioning system outlet and an air extraction outlet, maintaining a fresh and pleasant atmosphere. The ceiling features built-in LED spotlights, providing ample illumination, while the white lacquered finish adds a touch of sophistication.

The head includes an electric WC and a washbasin with combined faucets, offering modern conveniences. The washbasin furniture is crafted from wood, complete with doors and shelves for efficient storage, and topped with glass for a sleek appearance. A wooden closet with shelves is conveniently located near the WC, providing additional storage space.

The space is further enhanced by glass shelves, manual aluminum Venetian blinds, and a mirror, adding to the overall functionality and style. An opening porthole in stainless steel and tempered glass allows natural light to fill the room, creating a bright and inviting environment.

Additional amenities include a toilet roll holder, toothbrush holder, and two towel racks, ensuring all essentials are within easy reach. The interior doors are made of wood, with chrome door stops and handles with thumb locks, enhancing the overall aesthetic. The walls are covered in wood, and the floor is made of wood, completing the elegant design of the starboard guest head.

This space is a testament to the yacht's commitment to providing a luxurious and comfortable environment for its guests.

Port guest head

The port guest head on this yacht is a beautifully crafted space that combines modern convenience with elegant design, ensuring a luxurious experience for guests. The area is equipped with an air conditioning system outlet and an air

extraction outlet, maintaining a fresh and comfortable atmosphere. The ceiling features built-in LED spotlights, providing ample illumination, while the white lacquered finish adds a touch of sophistication.

This guest head includes an electric WC and a washbasin with combined faucets for both the washbasin and bidet, offering modern functionality. The washbasin furniture is made of wood, complete with doors and shelves for efficient storage, and topped with glass for a sleek appearance. Two wooden hanging lockers provide additional storage space, ensuring that all essentials are neatly organized.

The shower box is a highlight, featuring a crystal shower door, mosaic walls and floor, and a shower head with a handset, offering a luxurious bathing experience. The space is further enhanced by manual aluminum Venetian blinds, a mirror, and an opening porthole in stainless steel and tempered glass, allowing natural light to fill the room.

Additional amenities include a soap dish, toothbrush holder, towel rack, and WC brush holder, ensuring all necessities are within easy reach. The interior doors are crafted from wood, with chrome door stops and handles with thumb locks, enhancing the overall aesthetic. The walls are covered in wood, and the floor is made of wood, completing the elegant design of the port guest head. This space is a testament to the yacht's commitment to providing a luxurious and comfortable environment for its guests.

Galley

The galley of this yacht is a modern and well-equipped culinary space, designed to meet the needs of both casual and gourmet cooking. It provides convenient access to the crew quarters, ensuring seamless service and communication. The galley is illuminated by built-in ceiling LED lights and spotlights underneath the shelves, creating a bright and inviting atmosphere.

At the heart of the galley is a ceramic glass hob with four burners, complemented by an electric vented oven with a tempered glass and stainless steel door, offering versatile cooking options. A microwave oven adds to the convenience, while the extractor fan with an external outlet ensures a fresh and odor-free environment.

The galley is equipped with a dishwasher capable of handling service for 12 people, making cleanup efficient and easy. The side-by-side fridge provides ample storage for fresh ingredients, while the stainless steel washbasin and mixer tap offer functionality and style. The galley top is crafted from acrylic stone, providing a durable and elegant workspace.

Storage is plentiful, with a hanging locker door and internal shelves, as well as an under-top unit with glass opening doors and additional shelving. The structural floor is made of fiberglass coated with vinyl material, ensuring durability and ease of maintenance. The lacquered ceiling and soft touch light switches add a touch of sophistication to the space.

This galley is a testament to the yacht's commitment to providing a luxurious and practical environment for culinary endeavors, ensuring that every meal prepared on board is a delightful experience.

Crew dinette

The crew dinette on this yacht is a thoughtfully designed space that combines functionality with comfort, ensuring the crew has a dedicated area for relaxation and dining. This area provides direct access to the engine room, facilitating easy maintenance and operations, as well as access to the salon through a convenient staircase.

Equipped with a comprehensive audio-video system, the dinette features built-in loudspeakers, a 24" LED TV, and a mini Hi-Fi system, offering entertainment options for the crew. The space is illuminated by built-in ceiling

LED lights, creating a bright and welcoming atmosphere. A SAT TV decoder and a touch-screen display for cameras further enhance the technological capabilities of the dinette.

The dinette is furnished with a folding table featuring a gas piston for easy handling, and seating includes a sofa and pouf, both upholstered in durable vinyl fabric. The walls are also upholstered in vinyl, adding to the cozy and practical design. Storage is ample, with lacquered hanging lockers featuring opening doors and internal shelves.

For communication and safety, the dinette is equipped with an intercom system and a VHF transceiver. The integrated monitoring system provides real-time data on alarms and electrical systems, ensuring the crew is always informed. The floor is covered in vinyl material, offering durability and ease of maintenance.

Additional amenities include a washing machine and dryer, ensuring the crew's convenience and comfort. The interior doors and frames are ivory lacquered, with chrome door stops and handles with thumb locks, adding a touch of elegance to the space. The crew dinette is a testament to the yacht's commitment to providing a well-equipped and comfortable environment for its crew, enhancing their overall onboard experience.

Captains quarters

The captain's quarters on this yacht are a private sanctuary, meticulously designed to provide comfort and functionality for the captain. The cabin is equipped with a comprehensive audio-video system, featuring a 24" LED TV, two loudspeakers, and a mini Hi-Fi CD/DVD player, ensuring entertainment and relaxation. The built-in ceiling spotlight and ceiling panels upholstered in vinyl fabric create a warm and inviting atmosphere.

Storage is ample, with a cupboard featuring internal shelves and a locker with

lacquered doors, a clothes rack, and internal lighting. The digitally controlled air conditioning system ensures a comfortable environment, while the ivory lacquered door with chrome door stops and a thumb lock handle adds a touch of elegance. The cabin also includes a phone intercom for easy communication and an opening porthole in stainless steel and tempered glass for natural light and ventilation.

The captain's head is equally well-appointed, featuring an electric WC in porcelain and a lacquered washbasin unit with opening doors. The shower box includes a pole, teak floor, and a plexiglass door, complemented by a shower faucet for a refreshing experience. The head is equipped with essential amenities such as a soap dish, toilet brush holder, toilet roll holder, and towel rack, ensuring convenience and functionality.

The interior design is completed with laminated walls, a lacquered ceiling, and a floor covered in vinyl material, providing durability and style. Wood hanging lockers with doors, mirrors, and shelves offer additional storage, while manual aluminum Venetian blinds provide privacy and light control. The captain's quarters are a testament to the yacht's commitment to providing a luxurious and efficient living space for the captain, ensuring a superior onboard experience.

Crew quarters

The crew quarters on this yacht are designed to provide a comfortable and functional living space for the crew, ensuring they have everything they need for a pleasant stay on board. The bow side double crew cabin features built-in ceiling spotlights and a digitally controlled air conditioning system, creating a well-lit and climate-controlled environment. The interior doors and frames are ivory lacquered, with chrome door stops and thumb lock handles, adding a touch of elegance. Storage is ample, with a locker featuring lacquered doors, a clothes rack, and internal lighting. The cabin is equipped with two

loudspeakers, a lower single bed with drawers underneath, and an upper single bed, all complemented by mattresses, pillows, and bedcovers. The walls and paneled ceiling are upholstered in vinyl fabric, and a manual aluminum Venetian blind provides privacy and light control. Additional amenities include a mini Hi-Fi CD player, reading lights, and an opening porthole in stainless steel and tempered glass.

The stern side double crew cabin mirrors the comfort and functionality of the bow side cabin, with built-in ceiling spotlights, a digitally controlled air conditioning system, and ivory lacquered interior doors and frames. The cabin includes a safe, reading lights, and a single bed with drawers. The structural GRP floor is covered with carpet, and the walls are upholstered in vinyl fabric. The cabin is equipped with two loudspeakers, a lower single bed with a chest of drawers, and an upper single bed, all with mattresses, pillows, and bedcovers. A mini Hi-Fi CD player and an opening porthole in stainless steel and tempered glass complete the space.

The crew head is well-appointed, featuring a built-in ceiling spotlight, an electric WC in porcelain, and a lacquered washbasin unit with opening doors. The shower box includes a hand shower and a plexiglass door, complemented by a shower faucet. The head is equipped with essential amenities such as a soap dish, toilet brush holder, toilet roll holder, and towel rack. The interior design is completed with laminated walls, a lacquered ceiling, and a floor covered in vinyl material. Wood hanging lockers with doors, mirrors, and shelves offer additional storage, while an opening porthole in stainless steel and tempered glass provides natural light and ventilation. The crew quarters are a testament to the yacht's commitment to providing a well-equipped and comfortable environment for its crew, enhancing their overall onboard experience.

Control room

The control room of this yacht is a vital hub of operations, designed to ensure seamless management and monitoring of the vessel's systems. Accessible from both the engine room and the cockpit, this space is equipped with a certified waterproof door, providing security and protection against the elements. Communication is facilitated by an intercom telephone, ensuring constant contact with other areas of the yacht.

A waterproof camera, interfaced with the helm station, enhances the safety and security of the yacht by providing real-time visual monitoring. The control room is illuminated by three waterproof fixed explosion-proof neon lights, ensuring visibility and safety in all conditions. This control room is a testament to the yacht's commitment to advanced technology and operational efficiency, providing a secure and efficient environment for managing the yacht's complex systems.

Engine room

The engine room of this yacht is a meticulously designed space, ensuring optimal performance and safety for the vessel. Accessible from both the galley and the cockpit, it features a certified waterproof door that provides security and protection against the elements. The room is equipped with air intakes that include a condensation removal system, maintaining a dry and efficient environment.

At the heart of the engine room are three powerful MTU 16V diesel engines, each delivering 2638 mhp, coupled with gear box flanges and surface propeller flanges. The engines are supported by engine exhaust mufflers and stainless steel exhaust raisers, ensuring smooth and quiet operation. The room also houses hydraulic oil heat exchangers and hydraulic units for the gangway, garage door, aft door, and swim ladder, enhancing the yacht's functionality.

The engine room is equipped with two power generators, each with a capacity of 33kW at 50Hz, enclosed in soundproof housing to minimize noise. An electric extractor system and thermal acoustic insulation further contribute to a quiet and comfortable environment. The floor is covered with an aluminum non-skid surface, ensuring safety and ease of maintenance.

Additional features include a water maker with a capacity of 180 liters per hour, ensuring a constant supply of fresh water. The room is monitored by two waterproof cameras interfaced with the helm station, providing real-time visual feedback for enhanced safety. Four waterproof fixed explosion-proof neon lights illuminate the space, ensuring visibility in all conditions. The engine room is a testament to the yacht's commitment to advanced engineering and operational excellence, providing a secure and efficient environment for managing the yacht's propulsion systems.

Propulsions and maneuvering equipment

The propulsion and maneuvering equipment of this yacht is engineered to deliver exceptional performance and precise control, ensuring a smooth and responsive sailing experience. At the heart of the system are three six-blade propellers made from a robust nickel-aluminum-bronze alloy, designed to provide optimal thrust and efficiency. These propellers are complemented by a hydraulic bow thruster, which enhances maneuverability, allowing for precise docking and handling in tight spaces.

The yacht is equipped with hydraulic flaps and a hydraulic steering system, both of which contribute to the vessel's stability and ease of navigation. The hydraulic flaps adjust the yacht's trim, optimizing performance and fuel efficiency, while the hydraulic steering ensures smooth and responsive control at all speeds.

A surface drive system with trim further enhances the yacht's performance, allowing for high-speed cruising with reduced drag and increased fuel

efficiency. This advanced propulsion and maneuvering equipment is a testament to the yacht's commitment to cutting-edge technology and superior maritime engineering, providing an unparalleled sailing experience.

Systems

The systems on this yacht are meticulously designed to ensure seamless operation and comfort for all on board. The fresh water system is equipped with a 50-liter boiler for crew bathrooms and two 80-liter boilers for guest cabins, ensuring a steady supply of hot water. Fresh water outlets are strategically placed in the engine room, fore peak, and garage, supported by two fresh water pumps and a level sensor. The structural GRP tank holds 2000 liters, with a water intake connected to the main fresh water tank.

The sea water system features a by-pass valve for emergency bilge discharge from engines and dynamic sea water intake. It includes a fire extinguishing and chain wash e/pump, a fire hose, and a sea water basket filter for engines, power generators, A/C pumps, services, and the fire extinguishing system. Sea water outlets for firefighting and chain washing are located in the forward locker, with both static and dynamic sea water intakes.

The grey water system is equipped with e/pumps for A/C condensation tank discharge, auxiliary tank discharge, and main tank discharge. It includes a GRP auxiliary tank and a structural GRP main tank with a capacity of 750 liters, both monitored by a level sensor.

The black water system features a diverter for the "Marpol" flange, an e/pump for tank discharge, and a structural GRP tank with a capacity of 750 liters, also monitored by a level sensor.

The fire extinguishing system is comprehensive, with a delay bottle for air intake closure and alarm siren activation, remote control for emergency engine shutdown, and fire fighting system and alarm activation. It includes a fixed

FM200 extinguishing system in the engine room, a manual powder extinguisher in the engine room, and manual powder extinguishers in each room.

The air conditioning system is digitally controlled in all cabins and the upper saloon, featuring a tropic air conditioning system for optimal climate control.

The electrical system includes automatic battery chargers for emergency batteries, engines, and services, as well as battery chargers for generators and radio equipment. It features bonding plates, double 120V internal sockets, an earthing system, and electric panels for power distribution. The system is supported by emergency equipment batteries, engine starter batteries, and a shore power transformer with a "CABLE MASTER" Glendenning 100A.

The fuel system is equipped with an electronic fuel level remote indicator, fuel pre-cleaners for engines and generators, a fuel sight gauge, and a manual fuel discharge/load drainage pump. The structural GRP tank holds 12,000 liters.

The bilge system includes automatic and manual immersion e/pumps for bilge discharge in each compartment, with level sensors. It features an e/pump with a valve system for separated or joint bilge or fire extinguishing centralized suction, and an emergency engine room bilge system discharge through engines intake suction.

These systems collectively ensure the yacht operates smoothly and efficiently, providing a safe and comfortable environment for all on board.

Equipment

The equipment on this yacht is thoughtfully curated to ensure both safety and comfort for all on board. Among the essentials are two branded bags, perfect for carrying personal items or provisions. The yacht is equipped with a complete set of bed sheets, ensuring a restful night's sleep for all guests. For mooring, the yacht includes black mooring lines with a diameter of 30mm,

available in lengths of four 25-meter lines and one 50-meter line, providing secure docking options.

Safety is a top priority, with two floating luminous buoys and sixteen life jackets readily available. A life saver with a floating line is also included, along with four rigid, self-inflating life rafts, each capable of accommodating eight people. The yacht is equipped with a set of canvas covers for the windshield, protecting against the elements, and a set of Pershing towels, including eight bath towels, for added comfort.

For protection and maintenance, the yacht features ten spherical fenders with covers and lines, each with a diameter of 610 mm, ensuring the vessel remains unscathed during docking. Two telescopic boat hooks are provided for easy maneuvering and handling. Additionally, a weather station, complete with a clock, barometer, and thermometer, ensures that the crew is always informed of the current conditions.

This comprehensive array of equipment underscores the yacht's commitment to providing a safe, comfortable, and enjoyable experience for all who come aboard.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.

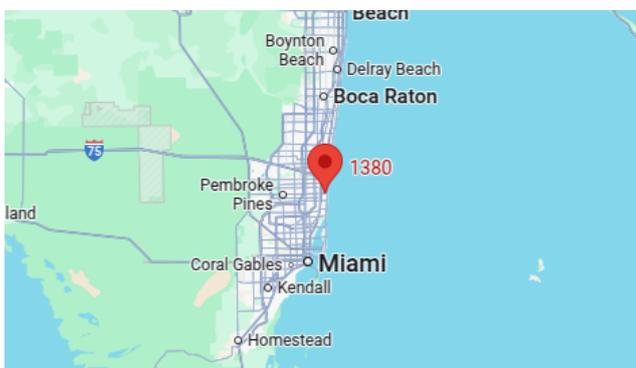

For more information and to view available yachts, you can visit the company's official website: <https://shestakovyachtsales.com>
