Excellent condition

Canados 110

Launched in 2009, this Canados 110 received a full yard refit in 2020 and a further upgrade in 2023 under current ownership, returning to the water in standout form. At 33.80 meters overall with a 7.10-meter beam, she offers generous, refined living spaces and broad decks, powered by twin 2,415 hp MTU engines. Thanks to diligent annual servicing, the owner offers a 1-year assurance on her mechanical condition.

Arranged with 5 cabins, she hosts guests in true comfort, blending luxury with confident performance. The Canados 110 delivers a memorable cruising experience with striking Italian design and strong propulsion—ideal for discerning yachtsmen seeking an elegant Motor Yacht/Superyacht with Flybridge versatility and Performance Motor Yacht credentials.

DETAILED DESCRIPTION

Specification - standard and optional extras

Crafted for effortless days at sea, the yacht presents a sleek hardtop with an electrically controlled canopy, a hydraulic swimming platform for easy water access, and a hydraulic gangway that deploys with grace. Its hull and superstructure are finished in an Awlgrip metallic grey, a shimmering livery that underscores the yacht's modern poise.

Beneath the surface, performance is assured by twin MTU Series M93 engines delivering 2,350 hp each, working through ZF gearboxes and driving twin five blade propellers for assertive acceleration and quiet, composed cruising. Close quarters control is enhanced by a Vetus bow thruster, and onboard autonomy comes from twin Onan 50 kW generators, a Condaria air conditioning system rated at 6 kW and 240,000 BTU, an Idromar watermaker at 300 l/h, two 150 l boilers, and a dedicated water purifier. Seamless shoreside connection is provided by a shore power inlet and inverter, while the battery architecture is specified for serious voyaging: a 24V emergency bank of 9 batteries, plus 4 x 24V batteries for main engine start and 4 x 24V batteries for generator start. The HAMANN sewage system completes a clean, compliant technical backbone.

Navigation and communications are comprehensive and confidence inspiring, led by a Furuno Navpilot autopilot, a Furuno HS 2003 VHF, a Furuno Navigator 150 GPS, a Furuno X band radar, and a Furuno depth sounder, complemented by AIS and a Sea Tel SATCOM system for reliable offshore links.

Life onboard is elevated by premium appliances and immersive entertainment. In the galley, a Miele oven is paired with two Miele microwaves and a coffee machine, while refrigeration is entrusted to a full height, double door Frigomar fridge, a Frigomar freezer, a wine cooler, and a portable coolbox;

practicalities are served by a Bosch washing machine, a dishwasher, and an icemaker. The main saloon centers on a 65 inch TV, and the flybridge transforms into an open air cinema via a home theater movie projector. Sound is delivered with authority by an upgraded Bowers & Wilkins audio system featuring 2 subwoofers and 10 speakers spanning the cockpit and flybridge. Underwater lights enrich evenings at anchor, and a Jacuzzi on the flybridge invites indulgent relaxation. A Williams Jet 525 tender completes the specification, ensuring swift, stylish shore runs.

Refit details

Performed with a discerning eye for both aesthetics and capability, the yacht's refit program elevates every experience on board. In 2019, Canados Shipyard installed a new hardtop engineered longer and wider than standard, casting generous shade to protect more deck space from the sun and amplifying the yacht's signature silhouette.

In 2023, all navigational and communication systems were upgraded, with the owner specifying the largest Raymarine screens feasible to enhance safety, clarity, and operating efficiency on passage. The same year, the teak caulking on the flybridge and across all remaining decks was renewed, restoring the warm, flawless teak detail underfoot. Audio has been thoughtfully zoned so that interior and exterior systems can be controlled independently in each area, tailoring ambience to every moment. Also in 2023, the bow thruster received a performance upgrade with a larger propeller and higher horsepower than the original, further sharpening low speed authority. To complete the transformation, the hull and superstructure were refinished in the highest grade Awlgrip metallic, a lustrous application that plays with light to reveal an alluring illusion of three distinct shades of grey.
