DETAILED DESCRIPTION

Specifications

With a length overall of 36.88 m, a beam of 7.88 m, and a draft of 2.25 m, this RINA-classed yacht features a composite planing hull conceived by Sunseeker, while the interior has been crafted by Sunseeker in collaboration with Baldwin Harris. She carries a gross tonnage of 331 t and flies the flag of Montego Bay. Power is provided by two MTU Friedrichshafen GMBH 12V 4000 M90 engines, enabling a cruising speed of 16 kn and a maximum speed of 22 kn.

Accommodation is arranged across six cabins comprising one master, three double, and two twin staterooms, welcoming up to twelve guests and supported by a dedicated crew of eight.

Tenders & toys

An extensive inventory of tenders and toys elevates every day on the water, starting with two Sea Doo Sparks and one Seabob FS5 for thrilling personal rides, complemented by two electric scooters for effortless shoreside exploration. For relaxed adventures, enjoy two paddleboards and noodles, while two towable tubes and three inflatable platforms transform the sea into a floating playground. Snorkel gear invites underwater discovery, and both a complete beach setup with tent and a complete swim platform setup ensure effortless lounging wherever you drop anchor. Wellness is equally catered to with a stationary bike, dumbbells with adjustable weight, and bands and kettlebells, so your fitness routine travels with you.

Special features

The sundeck invites with a Jacuzzi encircled by generous sun pads,

complemented by a dedicated bar and chaise lounge chairs for unhurried sunbathing. An on-deck master stateroom enhances convenience and privacy, while the sky lounge, complete with its own bar, sets the scene for convivial evenings.

Additional extras

Crafted for serene cruising and effortless living, this yacht benefits from additional and upgraded sound insulation between the Galley and Master Stateroom bulkhead, including REVAC, supported by AHDC Air handlers and full air conditioning. Comfort is elevated with manual blackout roller blinds offering 100 percent blackout, heated towel rails in all guest en suites, and guest shower cubicle bulkheads finished in Emerald Pearl.

Entertainment and connectivity are comprehensive, featuring an additional high-definition DVD player with HDMI connection serving the Master, the saloons, and the aft cockpits, a built-in exterior TV on the forward starboard side, and iPod docking stations in both saloons and all guest cabins. A KVH V 7 mini-V Sat system housed in a Dummy Sea Tel 4004 dome connects to onboard data points and provides wireless access for four exterior guest areas and all interior areas, while a SeaTel 4004 satellite TV system includes a decoder able to accept either NileSat or Hotbird decoder cards. In the wheelhouse, speakers run off the CD/Radio with a fixed waterproof exterior remote, and a built-in network printer/fax/copier/scanner adds practical convenience.

Navigation and helm ergonomics are superb, with three central Hatteland wheelhouse displays, size 19, joystick-type steering control integrated into the helm seat's port-side armrest in addition to the ship's wheel, a second helm seat, and wing station controls on each outboard side of the wheelhouse deck. Awareness and precision come from a FLIR Voyager thermal imaging camera, a forward-facing echo sounder operating on a different frequency, a Furuno FE

700 Echo Sounder positioned as far aft as possible for slow-speed navigation, and a second radar system (Furuno NavNet). An ultrasonic wind system connects to the Central Navigation Display, while an MPA Monitoring CCTV system with four cameras and a dedicated display in the crew mess connects to the Tisseen system, complemented by the MPA Monitoring Generator Control and Monitoring System.

Exterior detailing is equally considered, with cleaning tracks fitted to the Upper Deck Saloon and Main Deck Master Stateroom exterior windows, a teak Skydeck, and a passarella upgrade in a stainless steel finish. Shade and comfort are provided by two retractable electric sun awnings for the Skydeck bar area, one aft-facing and one forward-facing, both in white canvas, while a water misting system with outlets on the underside of the radar arch cools warm days. At night, nine underwater lights (Ocean LED) create a dramatic glow, and serious ground tackle is assured with anchor chain lengths of 180 meters per side.

Engineering and autonomy are first class, offering hydraulics-based stabilization while underway and at anchor, a hydraulic stern thruster rated at 65 hp, and trailing capability for the engines, providing the ability to run on one engine if necessary. Range and resilience are enhanced by a forward long-range fuel tank of 5630 liters, a frequency converter, a second generator PTO, and a fuel cleaning centrifuge (single unit). A sewage treatment plant underscores blue-water readiness, and a workshop compressor is fitted in the Engine Room.

The Galley and service areas are equipped for professional-grade hospitality, with commercial-type extraction, custom refrigeration in the Main Galley delivering 1800 liters of fridge capacity and 800 liters of freezer capacity, a Deck Saloon bar fridge of Sub Zero type, and a Sub Zero fridge in the Upper Deck Servery. Practical touches include a grease food waste collector, infra-red warming lamps on the Galley's aft bulkhead, a trash compactor, and an Octo

Marine Compact water conditioner for shore fresh water supply. Laundry is handled by a Miele Professional washing machine, a tumble dryer, and a dishwasher, while a double AC socket is thoughtfully placed at the forward end beside each aft sideboard console in the Main Deck Saloon.

Flexible accommodations are ensured by an inboard berth on a sliding track system allowing conversion to a double when required in the starboard cabin, a sliding berth arrangement allowing the starboard-side berth to slide outboard to create a single, and a Pullman berth on the inboard bulkhead in the Starboard Forward Twin Guest Stateroom. The Captain's domain gains an upper berth in the Cabin on the Lower Deck Aft Port, completing a layout that adapts seamlessly to guest needs and cruising plans.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
