OVERVIEW

Sleek and deliberately refined, this Palmer Johnson motor yacht measures 124 feet and pairs a sculpted aluminum hull with the distinctive Italian design of Nuvolari & Lenard. Propelled by twin MTU diesel engines, she cruises comfortably at 12 knots with a capable top speed of 16 knots, and her all aluminum build provides structural integrity, fuel efficiency, and an exceptionally quiet ride. Launched in 2005 and currently located in the United States, she marries superyacht lineage with restrained contemporary styling, offering a rare combination of presence and performance.

Inside, Nuvolari & Lenard's hallmark balance of light, scale, and material selection creates a calm, sophisticated interior that invites both lively entertaining and intimate relaxation. The layout presents a welcoming salon, secluded lounges for conversation, and elegantly appointed dining areas that flow effortlessly to the open decks. Accommodations are arranged for four guests with five heads, delivering a boutique hotel level of privacy and convenience whether underway or at anchor, and every space is conceived to emphasize comfort and seamless indoor outdoor living.

Equipped for extended voyaging, she carries approximately 37,854 gallons of fuel and about 7,570 gallons of water, offering substantial range for coastal cruising and island exploration. This all aluminum yacht stands as a long range motor yacht of genuine character—rooted in proven design DNA, backed by MTU reliability, and finished with the cosmopolitan elegance that defines Nuvolari & Lenard. Poised and polished, she awaits her next chapter in the United States for owners who prize understated power as the ultimate luxury.
