OVERVIEW

Embodying the pinnacle of Italian shipwright artistry, this 2023 Custom Line Navetta 42m is a luxury motor yacht that commands the top of her category, fitted to an extraordinary specification with more than \$4.5 million in shipyard options. Executed to full MCA compliance and penned by Zuccon International Project, her graceful tri-deck superyacht silhouette is kept impeccably uncluttered: tenders and cranes are artfully concealed and a generous hidden bow locker preserves the purity of her lines.

Under her skin the choice of non-SCR Caterpillar C32 ACERT V12s provides robust yet whisper-smooth power, delivering an effortless 13-knot cruising speed and genuine bluewater capability, including a 3,000-nautical-mile transatlantic range — everything expected of a displacement megayacht engineered for global passage-making. The bespoke interior layout accommodates up to 10 guests in absolute comfort, balancing moments of tranquil privacy with grand, cinematic spaces. An electric drop-down balcony on the main deck dissolves the boundary between salon and sea, while the sun deck, expansive enough to rival many flybridge yachts, revolves around an extended Jacuzzi pool and a convivial Teppanyaki grill for open-air entertaining. Throughout the en-suites a sweeping Invisible Black marble upgrade imparts a deep, sophisticated character. At the waterline a fold-down transom reveals a sweeping, teak-laid beach club appointed with a custom bar, icemaker, and auxiliary freezer — an irresistible enclave for long, languid days at anchor. Equipped with a high-capacity Atlas shore power converter for seamless world cruising, she arrives as a turnkey, crew-ready private yacht with serious charter potential, marrying discreet practicality with unabashed glamour. For the connoisseur who seeks a contemporary tri-deck displacement superyacht that is both meticulously refined and ocean-range capable, this Navetta 42m is the definitive statement.

DETAILED DESCRIPTION

Optional equipment

Every option aboard has been curated to heighten elegance, comfort, and capability: the bathrooms in the Master and lower deck cabins are clad in Invisible Black marble across the showers, WC areas, floors, portals, and washbasin tops, while a stern thruster and a shore voltage connection refine maneuvering and dockside ease. Night passages glow with twelve underwater lights. Fuel quality and potable water purity are assured by an Alfa Laval fuel oil filter, an Idromar watermaker, a UV sterilizer for drinkable water, and a water softener. Service moves effortlessly thanks to a food lift from the upper deck pantry to the sun deck wet bar, electric raised curtains, and both exterior and interior dimmer lights, complemented by automatic opening for the glass aft door in the upper salon. Climate mastery arrives with tropical air conditioning with UTA. Alfresco living expands via an electric balcony on the port side with an automatic opening door and a matching automatic opening door at the starboard-side dining area, a canopy at the aft and sides with glass on the bulwarks, a bimini shading the bow dinette, and teak flooring with black caulking on the sun deck and forward triangle area. Provisioning and laundry are elevated by a custom galley fridge, Miele washer/dryers, a full height Gaggenau fridge and a Dunavox wine cooler for 181 bottles in the upper deck pantry, plus a mini fridge in the Master cabin and separable beds in the forward guest cabins. Adventure readiness includes a compressor for diving bottles and FLIR, while command confidence rises with a super premium integrated bridge and always on connectivity via a platinum internet package with Kerio system. Deck operations are simplified with a crane, a Williams Tender 625, and a dedicated re-fueling station in the tender garage.

Main machinery

Propulsion is delivered by twin Caterpillar C32 ACERT 12V engines turning through ZF 3350 gear boxes, with precise electrohydraulic steering, a bow thruster for fingertip close quarters control, and NAIAD stabilizer fins for composed passages. Ship's power comes from twin diesel generators in soundproof enclosures, each featuring a built in freshwater circulating and cooling system with heat exchanger and electronic speed regulators.

General ship systems

Robust infrastructure underpins confident cruising, including a bilge pump backed by an emergency diesel motor pump, comprehensive bilge and firefighting piping systems, and an integrated fire fighting and fire extinguishing architecture safeguarding both the engine room and the garage. Fuel oil, fresh water, and sewage are managed by dedicated systems, with a fresh water maker and fresh water pump on the potable side and black and gray water pumps handling waste. A compressed air system, scuppers and drainage, a sea water cooling circuit, properly engineered air vent lines, a hydraulic system, and the main engines gas exhaust system complete the specification.

Air conditioning and ventilation system

Climate control is specified for the tropics with air conditioning featuring UTA, supported by chiller sea water pumps and chiller water pumps, while engine room fans and engine room fire dampers keep machinery spaces cool and secure.

Anchor and mooring equipment

Ground tackle and waterside comfort are comprehensively addressed with two electric windlasses, capstans, and a full suite of mooring bollards and fairleads, complemented by a gangway and a swimming ladder for effortless boarding. A starboard side panoramic terrace opens to the beach area, while a stern garage houses the tender, and forward storage lies beneath the bow sunpad. Additional comforts include windscreen protection, a Jacuzzi, and teak deck lining.

Electric system

Electrical infrastructure includes a shore connection feeding a main switchboard and an emergency switchboard, with energy efficient LED lighting throughout.

Electronics/entertainment

Navigation is centered on an integrated dashboard within the navigation system, supported by navigation lights, a comprehensive monitoring system and an alarm system, and a full communications suite comprising VHF, two portable VHFs, a radiotelephone, a NAVTEX receiver, an EPIRB, and a radar transponder. A network/telephone system serves all areas, complemented by an intercom and a CCTV system with motion detector and recording.

Entertainment flows throughout via distributed speakers; in the main salon, Apple TV pairs with a 65" TV; in the owner's cabin, Apple TV joins another 65" TV; and in the VIP cabins, Apple TV is matched to 50" TVs.

Appliances

Culinary and hospitality amenities impress: in the galley, a Gaggenau electric glass/ceramic five burner cooktop, hood, and Gaggenau oven work alongside a Miele Professional dishwasher, a fridge/freezer, a side by side fridge, and a trash compactor. The main deck pantry adds a Gaggenau microwave oven and a Hoshizaki icemaker, while a 90 l fridge serves the main salon and a Gaggenau 90 l fridge anchors the upper deck bar. The crew mess includes a microwave, and the laundry features two Miele washer/dryers. On the sun deck, a Gaggenau 90 l fridge, a Hoshizaki icemaker, and a grill support open air entertaining, with a mini fridge completing the beach area. An electric dumbwaiter smoothly connects the main deck pantry with the upper deck pantry.
