## OVERVIEW

---

A striking expression of contemporary yachting, this 2023 luxury Motor Yacht spans an impressive 137 ft in length with a commanding 29 ft beam, delivering the grand presence and interior volume discerning owners expect of modern motor yachts. Built and lying in the United States, she balances poise and power with an elegant profile and refined detailing, inviting effortless indoor-outdoor living as you move from sun-drenched terraces to serene, climate-controlled lounges. Her fiberglass and advanced composite construction has been engineered for resilience and comfort, offering a smooth, quiet ride that sets the tone for relaxed cruising, celebratory gatherings, and unhurried days at sea.

Underway, a single DOOSAN engine provides confident, efficient propulsion, pairing long-legged autonomy with the reassuring simplicity of a thoughtfully specified powertrain. Extended passages become second nature thanks to substantial tankage, with approximately 15,850.32 gallons of fuel capacity and 5,283.44 gallons of fresh water on board, underscoring her bluewater credentials and making remote anchorages feel comfortably within reach. The broad beam enhances stability and interior scale, while low-maintenance decking and composite finishes speak to intelligent craftsmanship designed for years of dependable service.

Inside, the yacht's generous proportions allow for expansive social spaces and restful private quarters, each inviting natural light and ocean vistas to take center stage. Tailored to the rhythms of refined cruising, the ambiance is at once welcoming and polished, from morning coffees with a horizon view to evening cocktails beneath the stars. As a statement among premium motor yachts, this 2023 build offers the rare combination of contemporary luxury, purposeful engineering, and far-ranging capability—an inspiring platform for unforgettable journeys.
