OVERVIEW

EIV is a striking 160' (48.77m) Rossinavi Vector 50m motor superyacht that marries Italian styling with generous volume and seamless indoor-outdoor circulation. The layout features a main-deck owner's stateroom complete with a private balcony and a separate study, accompanied by five guest cabins arranged to accommodate 11 guests, and an elevator providing access across three guest decks. Leisure and wellness amenities include a beach club outfitted with a hammam and cold plunge, three distinct water features and multiple fold-out terraces, while a shallow 7'6" draft makes her especially suited to cruising the Bahamas. Recently serviced through her five-year survey and meticulously maintained, EIV is presented turnkey and ready to welcome her next owner.

DETAILED DESCRIPTION

Highlights

The 160-foot Rossinavi Vector 50m offers an on-deck, full-beam owner's residence that opens to a private balcony, complemented by a secluded owner's office appointed with a massage chair and extensive temperature-controlled wine storage. Guest accommodation is arranged over five staterooms for eleven guests, while nine crew members are quartered in five dedicated crew cabins, and an elevator provides direct access to three guest decks. Port and starboard opening balconies, together with an adaptable aft VIP layout that converts to a full-beam suite, enhance flexibility and a seamless connection to the sea.

Onboard amenities are centered around three distinct water features spread over three separate decks, a dedicated beach club equipped with a hammam, aromatherapy and a cold plunge, a glass-front fresh/saltwater resistance pool, and a foredeck glass-front Jacuzzi and lounge, all framed by five separate exterior guest areas and a generous tender garage. With a shallow draft of 7 feet 6 inches she is particularly well-suited to Bahamas cruising. Modern systems include Starlink Internet, a recently completed five-year survey, and an extensive 2024 interior and exterior soft-goods refresh, and she is immaculately maintained and presented in exceptional condition.

Overview

EIV is a commanding 160' (48.77m) tri-deck yacht from Rossinavi that blends athletic, performance-inspired lines with the roomy comfort and amenities expected of a displacement superyacht. Launched in 2020 and conceived inside and out by Venice-based Team for Design – Enrico Gobbi, she reflects a

distinctly Italian sensibility: restrained exterior styling and broad expanses of glass married to refined materials and highly practical living arrangements. Her shallow 7'6" draft makes EIV particularly well suited to cruising the Bahamas, the Caribbean, the Mediterranean and other shallow-water cruising grounds, while robust engineering and true transatlantic range afford the freedom to traverse both sides of the Atlantic in absolute comfort.

The profile references automotive design, favoring sculpted surfacing, harmonious proportions and sweeping glazing to produce a low, streamlined silhouette. That emphasis on glass governs the onboard environment as well, with expansive windows and large opening sections along the main deck that saturate the interior with daylight and establish a strong connection to the sea. Port and starboard balconies and generous sliding glass doors allow the main salon and dining area to transform readily into an extraordinary semi-open-air entertaining venue.

The interior is contemporary yet enduring, where pale timbers and a neutral textile palette are elevated by onyx, marble, hand-stitched leather and bronzed-brass accents. Bespoke joinery and furnishings by Enrico Gobbi are paired with decorative lighting, European furniture selections and sumptuous textiles to create an atmosphere that is elegant without feeling austere, while the restrained color scheme provides an ideal canvas for a future owner to imprint their personality.

Positioned forward on the main deck, the full-beam owner's suite offers privacy and abundant light, featuring a king-size bed, extensive storage, his-and-hers closets and a private balcony accessed through hydraulic stainless-steel and glass doors. The refined his-and-hers ensuite centers on a large shower equipped with six body jets and a rain shower, and adjacent to the master a dedicated owner's office houses a temperature-controlled 300-bottle wine cabinet, a desk and a Kahuna massage chair for quiet relaxation or work at sea.

Four guest staterooms are arranged on the lower deck, with two forward cabins that convert from twin to queen configurations and two flexible aft VIP cabins whose removable center partition allows them to be combined into a single, full-beam VIP suite, with one cabin converting to a private sitting area. Throughout the guest accommodations, marble ensuites, motorized televisions, Kaleidescape entertainment and integrated Videoworks/Crestron systems underscore EIV's focus on comfort and cutting-edge technology.

Circulation is anchored by a stainless-steel elevator serving three guest decks and an elegant circular staircase with oak treads, bronze detailing and integrated lighting. Above, the panoramic skylounge serves as both a sophisticated social space and a private cinema, complete with a Sony projector, a 110-inch drop-down screen, a full bar, a wine chiller and expansive doors that open directly to the upper aft deck.

Outdoor living is a standout feature, with five distinct exterior guest areas and three signature water features spread over three decks. The beach club is conceived as a waterside wellness sanctuary, offering a hammam-style steam room with aromatherapy, a cold plunge, day head and shower facilities, plus direct access to the swim platform. On the sun deck a dramatic glass-front resistance pool—capable of operating in fresh or salt water—incorporates Jacuzzi seating and a waterfall beneath a retractable louvered sunroof, while forward a glass-front Jacuzzi is surrounded by seating, sunpads and sail-style shading.

The upper aft deck provides shaded alfresco dining for twelve, and the main aft deck features wraparound seating, a bespoke dining table, a bar with refrigeration and a drop-down television. A capacious tender garage currently houses a Williams jet boat and opens directly to the beach club and swim platform for effortless water access.

EIV is powered by twin MTU 16V 2000 M96L engines producing 2,600 hp each, yielding a comfortable cruising speed of 16 knots and a top speed of

approximately 19 knots. Her technical fit includes three 99 kW CAT generators, two ASEA 50/60 cycle shore-power converters, twin Sea Recovery watermakers, Spot Zero, Alfa Laval fuel polishing, a bow thruster, CMC stabilization fins with at-rest capability, comprehensive navigation and communications equipment, Starlink and GOST tracking.

Presented in immaculate condition, EIV has recently completed her five-year survey and received a substantial refresh that includes new carpeting in the master, main salon and cinema, reupholstered salon seating and replacement of exterior deck cushions, covers and throw pillows. With unmistakable Rossinavi pedigree, a flexible five-stateroom layout, expansive outdoor areas, a shallow draft and a comprehensive specification, EIV represents a compelling proposition for an owner seeking a contemporary superyacht equally adept at grand entertaining and relaxed cruising.

Main salon

The main salon embraces contemporary design rendered in a soft, neutral palette and offers an extraordinary visual dialogue with the sea through expansive windows to port and starboard and opening balconies on both sides accessed through stainless-steel-framed glass doors. Above, custom curved-wood panels with integrated LED lighting wash the space, highlighting hand-stitched leather detailing, while marble underfoot, tempered by area carpeting, establishes a quietly luxurious base; Roman shades together with layered privacy and blackout curtains allow finely tuned control of light and seclusion. Thoughtfully composed for conversation and entertaining, the seating scheme includes two sofas, four lounge chairs, two center tables, two ottomans, and four marble-topped end tables finished with brushed-bronze detailing. For effortless service, a Hoshizaki ice maker and a Vitrifrigo drawer refrigerator sit alongside stained-oak bottle storage fitted with brass hardware. Immersive audio comes from a professional surround-sound system with six

speakers and a television system that serves both the salon and dining areas, while dual 110/220V outlets throughout keep personal devices fully charged.

Formal dining

The formal dining salon is appointed for twelve guests and positioned to make the most of EIV's opening side balconies and uninterrupted panoramic vistas. A bespoke dining table for twelve commands the room, its timber frame detailed in brushed brass and inset with a glass panel, resting upon a hand-stitched leather pedestal and surrounded by Tutti chairs in a refined mix of leather and fabric, each finished with brass highlights. Underfoot, marble flooring enlivened with bronze inlays flows to a marble feature wall, while backlit onyx elements lend a warm, luminous depth. Four glass-front display cabinets house fine china, flatware and glassware, and bespoke shelving fitted with brass hardware accommodates a complete formal service for twelve. An LED-lit Venetian niche creates a sculptural point of interest, while audiovisual systems remain tastefully concealed — dual 55" televisions rise on an electronic lift and the suite is managed via Videoworks automation with Crestron control. Practical touches include a sliding crew service door to the galley and dual 110/220V outlets to ensure seamless service and convenience.

Owner's lobby & central staircase

The owner's entrance on the starboard side leads into a refined lobby dominated by a polished stainless-steel elevator and an elegant, sweeping circular staircase. The four-person elevator connects the lower guest deck, main deck and skylounge level, and its floor of backlit onyx contrasts beautifully with the surrounding marble finishes. Walls clad in leather panels with bronze inlays and bronze trim frame the space, while oak treads and gently backlit risers trace the staircase's graceful curve. Carefully integrated

LED feature lighting bathes the area in soft illumination, with all lighting scenes and functions conveniently managed via Lutron controls.

Owner's office and wine storage

Positioned directly off the owner's suite, this secluded office is conceived as an elegant and highly practical sanctuary that marries an expansive wine collection with a refined work environment and sumptuous finishes. Four dedicated wine-chiller cabinets offer storage for approximately three hundred bottles, each unit equipped with independent temperature regulation via Dometic controls, while Videoworks automation integrated with Crestron and Lutron lighting systems places the ambiance and AV at your fingertips. The ceiling is adorned with leather tufted panels inset with brass and backlit LEDs, complemented by bronze directional and ambient fittings, all resting above marble flooring detailed with wood and bronze inlay. A distinguished desk and chair are accompanied by a side storage unit with drawers and a cabinet, additional shelving and concealed storage, and a hand stitched leather paneled door fitted with a leather wrapped handle and bronze hardware. Comfort and convenience are enhanced by a Kahuna massage chair and a professional stereo system, and an opening center window allows for natural ventilation and a refreshing cross breeze. Practical necessities are addressed with dual 110/220V outlets.

Master stateroom

The full-beam, on-deck owner's suite fuses exquisite materials with abundant natural light and a calm, private link to the outdoors. A platform king-size bed serves as the focal point, encased in hand-stitched Italian leather and topped by a tufted leather headboard, while bronze accents and timber flooring with bronze inlays provide a handcrafted, sophisticated finish. The suite flows out

to a private owner's balcony via two hydraulic stainless-steel-and-glass balcony doors and is introduced by hand-stitched leather entrance doors fitted with leather-wrapped handles and bronze hardware. Practical elegance is evident in his-and-hers closets, extensive drawer and cabinet space, an opening window, and integrated LED illumination. Seating is equally considered, with an Italian leather bench complemented by a lounge arrangement of two chairs, a footstool, and a side table, creating an inviting retreat. Entertainment is discreet yet comprehensive: an LG television hidden behind a mirror partners with a Kaleidescape Movie Vault, Yamaha amplifier, Direct and Sky TV, Apple TV, Roku and smart-device mirroring, all managed through Videoworks/Crestron automation with Lutron lighting and blind controls and supported by two 110/220V outlets.

Master ensuite

The master ensuite unfolds as a generous his-and-hers sanctuary, anchored by backlit onyx basins set upon elegant marble flooring. At its core a spacious shower delivers a spa-like experience with six precision jets and an indulgent overhead rain shower, while separate toilet and bidet facilities maintain privacy and convenience. Rich bronze fixtures and coordinating bronze towel racks create a warm, unified aesthetic, and opening windows allow fresh sea air to circulate. Thoughtfully integrated storage keeps the space effortlessly organized, ambient control is provided by Lutron lighting and electronic blind systems, and practical connectivity is offered via two 110/220V outlets.

Guest accommodations

EIV is designed to host eleven guests across five exquisitely appointed staterooms, each offering refined comfort and privacy. On the lower deck the accommodations are finished with marble flooring, wood-clad ceilings,

leather-wrapped wall panels and subtle bronze detailing, harmonizing to create an atmosphere of understated luxury.

Aft starboard VIP — Canaletto

Positioned aft on the starboard side, this elegant VIP stateroom features a queen-size platform bed that easily converts into a sofa, set between two bedside tables and softly lit by twin lamps over wood flooring accented with bronze inlay. Storage is generous, with two hanging lockers and multiple drawers, while a dedicated table/desk with chair sits conveniently next to the ensuite bath for work or quiet reflection. The cabin's entertainment system is comprehensive: an LG television mounted on a motorized arm is complemented by a Kaleidescape Movie Vault, a Yamaha amplifier, DirecTV and Sky TV, Apple TV and Roku, all integrated through Videoworks and Crestron automation with Lutron lighting controls and delivered through ceiling speakers. Practical details include dual 110/220V outlets, and a movable partition allows this stateroom to open into the adjoining VIP to create a full-beam suite with an inviting sitting area.

Aft port VIP — Tintoretto

Conceived as a calm private retreat, the aft port VIP centers on a queen-size platform bed with abundant under-bed storage, accompanied by twin nightstands and two hanging lockers, all laid over warm wood flooring that enhances the suite's refined ambiance. An ensuite bathroom provides complete privacy while a motorized LG television, linked to a Kaleidescape Movie Vault and driven by a Yamaha amplifier, delivers a theater-quality viewing experience; Direct and Sky TV services, Apple TV and smart-device mirroring feed sound through discreet ceiling speakers for seamless entertainment. Intelligent Videoworks/Crestron automation unifies lighting, AV

and comfort systems and is easily operated from the supplied iPad and dock. A tasteful table/desk with chair serves as an elegant workspace or vanity, dual 110/220V outlets accommodate international appliances, and a center partition permits the two aft VIP cabins to be opened into a full-beam VIP suite for added flexibility.

Port guest stateroom

The port guest stateroom is appointed for adaptable luxury, featuring two twin berths that convert into a queen-sized bed and accompanied by an elegant nightstand, a wardrobe with drawers and a hanging locker, plus a glass-topped surface finished with brass trim that adds a refined accent. An ensuite bath provides discreet convenience and privacy. The entertainment system is comprehensive: an LG television on a motorized mount is powered through a Yamaha amplifier and tied into Videoworks/Crestron automation that unifies the Kaleidescape Movie Vault with Direct and Sky TV, Apple TV and Roku, all seamlessly controlled from an iPad and its dock. Warm wood flooring underfoot and subtly placed ceiling speakers create an inviting atmosphere, while dual 110/220V outlets offer effortless connectivity for every device.

Starboard guest stateroom

This elegant guest suite is appointed with two twin beds that easily convert to a queen, centered by a nightstand and softly lit by brass reading sconces. Storage is generous, including an armoire with drawers and a dedicated hanging locker, while a glass countertop with brass trim provides a refined surface above rich wood flooring. Entertainment is uncompromising: an LG television mounted on a motorized lift is paired with a Kaleidescape Movie Vault and Yamaha amplifier, Direct and Sky TV tuners, Apple TV and Roku, all seamlessly controlled by Videoworks/Crestron automation and delivered

through discreet ceiling speakers. Practical conveniences include dual 110/220V outlets, and the stateroom is finished by a private ensuite bath. Both forward guest ensuites feature marble flooring, cream marble countertops, stainless-steel and glass showers with rain showerheads, abundant storage, windows and electronic blind controls.

Crew accommodations

EIV is configured to house nine crew across five cabins, including a dedicated upper-deck captain's cabin. On the lower deck, four double crew cabins provide berths for eight, each finished with an ensuite head and shower in a fully MLC-compliant arrangement; every lower-deck cabin is fitted with a television and Apple TV, while the engineer's cabin incorporates an integrated vessel monitoring and alarm system to ensure continuous, round the clock oversight. The crew mess and galley have been appointed for both practicality and comfort, featuring a dining table with an L-shaped settee seating ten, a refrigerator, microwave, a professional dishwasher, twin stainless steel sinks with filtered water and generous storage. Entertainment and systems control are comprehensive, with an LG television, Kaleidescape, a Yamaha amplifier, Apple TV, Direct and Sky TV, and Videoworks/Crestron control, all supported by CCTV monitoring and the vessel monitoring system; laundry requirements are served by three Miele Professional washer/dryer sets. The separate upper deck captain's cabin offers a full size bed, a desk and chair, a window with blinds and an ensuite head with a separate shower, and is fitted with a Schneider monitoring system operator panel.

Skylounge

The panoramic skylounge effortlessly shifts from a refined social salon into a private cinema, its broad windows bathing the interior in natural light; plush

accommodation includes an L-shaped sofa, two lounge chairs, a circular center table and four ottomans set upon marble-trimmed flooring softened by bespoke designer carpeting, while wide opening doors provide a seamless flow onto the upper aft deck. Guest comfort is amplified by a convenient day head and a fully appointed pantry and bar featuring a marble countertop, a Vitrifrigo refrigerator, a Miele 24-bottle wine chiller, a Hoshizaki freshwater ice maker and custom glass shelving. After dusk the space becomes a theatre, with a Sony drop-down cinema projector mated to a 110-inch drop-down screen and a rich audio-visual ensemble composed of Sonos speakers, a Yamaha amplifier, Apple TV, Roku, Direct and Sky TV, all elegantly managed through an integrated Videoworks/Crestron automation system.

Galley

Engineered for long-range cruising and refined service, the professional galley is outfitted to the highest culinary standards, beginning with a Hoshizaki freshwater ice maker and a Winterhalter professional glasswasher, and supported by two Miele Professional dishwashers to ensure uninterrupted service flow. Cold storage is generous and layered, featuring a Miele pantry refrigerator alongside three Electrolux Frostwatch refrigerators plus an Electrolux Frostwatch freezer, while a Rational SelfCooking Center together with two Hold-o-Mat ovens provide versatile, chef-grade cooking capabilities. Three Electrolux double induction cooktops deliver precise, efficient heat across six induction cooking zones, complemented by stainless-steel sinks, robust exhaust ventilation and a dedicated heat lamp to maintain presentation. Natural light and ventilation are enhanced by an opening window, and extensive built-in storage keeps the workspace impeccably ordered for extended voyages and formal service alike.

Main aft deck

A generous outdoor entertainment terrace flows seamlessly into the salon through automatic doors framed in stainless steel, creating an effortless transition between interior and exterior living. The seating arrangement centres on a wraparound U-shaped lounge, complemented by four individual chairs and two side tables arranged around a bespoke dining table mounted on stainless-steel pedestals with a marble inlay; the table's articulating mechanism provides simplified access to seating. Entertainment is delivered with refinement via a drop-down television and a Sonos sound system, while 110/220V outlets to port and starboard keep personal devices fully powered. A custom oval bar, crowned with a marble top, conceals a hot-and-cold sink, integrated champagne bucket, a Vitrifrigo refrigerator, an Isotherm ice maker and generous storage. Operational practicality and security are addressed with a dedicated crew entrance and digital access control, and dockside operations are made straightforward by a recessed custom passerelle, Muir windlasses to port and starboard and four stainless-steel bollards.

Upper aft deck

The upper aft deck is designed for elegant, shaded al fresco dining and entertaining for up to twelve guests, anchored by a circular glass-topped dining table seating twelve and crowned with a marble Lazy Susan. Relaxation is provided by two L-shaped sofas flanked by two oval tables and four ottomans, while service is effortless thanks to an Isotherm refrigerator, Isotherm ice maker, a convenient sink and generous storage lockers.

Carbon-fiber-supported sail shades offer cool protection, and integrated LED lighting, Sonos outdoor sound and Videoworks/Crestron automation set the mood for every occasion.

Sun deck

The sun deck is centered around EIV's striking glass-front resistance pool, a luxurious focal point designed for seamless entertainment and relaxation; the pool accepts either fresh or salt water and incorporates two integrated Jacuzzi seats, a bespoke dump tank, a refined mosaic finish and a theatrical waterfall backlit by LED lighting. Above this waterscape a retractable louvered sunroof and carbon-fiber-supported sail shades provide adaptable shelter from the elements, while a discreet recessed overhead shower offers an invigorating rinse after a swim. Social spaces flow effortlessly with a generous U-shaped dining lounge surrounding a stainless-steel-framed, glass-top dining table, complemented by two elegant lounge chairs and three captain's chairs, and a secondary glass-top table fitted with built-in ice buckets to keep drinks perfectly chilled. Culinary and service features include an Isotherm refrigerator, an Isotherm ice maker and a Kenyon grill, all amplified by immersive Sonos audio, plentiful storage and convenient dual 110/220V outlets to support any onboard indulgence.

Foredeck Jacuzzi & lounge

Anchoring the foredeck is a striking glass-front Jacuzzi, its interior clad in intricate mosaic, which serves as the focal point for a private guest sanctuary framed by sweeping seating and a generous lounging zone with plush sunpads. Sail shades supported by carbon-fiber structures offer a cool, elegant canopy when required, while hydraulic storage hatches discreetly conceal equipment and the bosun's dedicated lockers keep operational gear perfectly organized. A rescue tender is poised forward, and the ground tackle is robustly arranged with two anchors driven by two Muir windlasses for assured anchoring performance.

Beach club, spa, & tender garage

Designed as an intimate waterfront retreat for indulgence and relaxation, EIV's beach club unites spa-like calm with effortless seafront living. A hammam steam room with aromatherapy establishes a restorative atmosphere, while marble flooring complements teak-and-holly surfaces set within marble trim, providing an elegant setting around a mosaic-tiled bench. Rejuvenation extends to a cold plunge capable of approximately 56°F, accompanied by a freestanding hot-and-cold shower and an additional hot-and-cold water wand for invigorating rinses after swimming. Integrated sea stairs offer seamless entry to the water, and stainless-steel safety railings ensure security without obstructing the view. Social moments unfold across four chairs and three tables arranged for conversation and leisure, all facing a 42-inch waterproof SkyVue television and supported by a stereo with iPad controls and Lutron lighting to craft the ideal mood. For refined entertaining, a Miele wine chiller, an Isotherm refrigerator, and a Hoshizaki freshwater ice maker keep beverages perfectly chilled, while a conveniently placed day head provides comfort during extended sunlit days.

The tender garage is engineered for swift, graceful launch and retrieval, sheltering a Williams jet boat fitted with a GOST tracker behind a large port-side opening. A removable tender fender system safeguards finishes during operations, and the garage provides direct access to both the beach club and the swim platform to streamline movement between vessel and sea. An integrated passerelle housed within the starboard steps completes the arrangement, offering discreet boarding capability that marries functionality with composure.

Mechanical

Propulsion is provided by twin MTU 16V 2000 M96L diesel engines, each rated

at 2,600 horsepower, with the port unit recording approximately 2,922 hours and the starboard approximately 2,920 hours. Confident low-speed handling and exceptional underway and at-rest control come courtesy of a CMC bow thruster paired with a CMC stabilizer control system featuring at-rest capability. Freshwater independence and water quality are addressed through a Hamann HL Cont Plus 025 system rated at 1,525 GPD, supplemented by two Sea Recovery watermakers delivering 300 L/hour apiece and a Spot Zero purification unit. The engine room is fully air-conditioned and climate-stable thanks to four 18,000-BTU engine-room air handlers supported by two Copeland A/C compressors, ensuring optimal thermal conditions for peak mechanical performance. Environmental and fuel cleanliness are maintained by a DVZ Bilge Mon 488 oily-water separator and an Alfa Laval fuel-polishing system, with comprehensive stainless-steel piping throughout the machinery spaces. Onboard comfort and operational reliability are further reinforced by a Jet Vacuum head and shower system, a Gianneschi air-compressor tank teamed with an Atlas air compressor, and an automatic pressure regulator that evenly balances engine-room ventilation.

Electrical

The vessel's electrical foundation is built around a trio of CAT generators, each rated at 99 kW, with log readings of 12,296 hours for generator one, 11,774 hours for generator two and 12,295 hours for generator three. Two ASEA shore-power converters underpin a 480V, three-phase, 60Hz distribution system, complemented by twin 100-amp, three-phase, 480V shore-power cables to deliver consistent and reliable dockside power. Operational readiness and onboard connectivity are further strengthened by a full GMDSS installation, Starlink Internet access and an integrated GOST tracking system.

Navigation & communication

The wheelhouse is appointed as a professional command environment, arranged around five 24-inch monitors and anchored by a Sperry Marine Navipilot 4000 autopilot, accompanied by a rudder angle indicator and Beijer independent steering controls. Engine management is delivered through twin MTU engine controllers, twin MTU displays and dedicated MTU engine controls, while bridge safety and watchkeeping are reinforced by a BNWAS bridge watch alarm, CMC bow thruster controls and a full stabilizer control system. Navigation lighting and exterior visibility are handled with a Le Guardian navigation light system, Speich wiper controls, two Sanshin searchlights and FLIR controls, and precise depth and performance information is supplied by a Furuno FE 800 depth finder, a Sperry Marine Naviknot speed log and a Sperry Marine Navitwin V gyro repeater. Comprehensive situational awareness and communications are maintained with Sailor AIS, multiple GPS displays and a Navtex display, complemented by a yacht PA, a resonant Kahlenberg horn, Sailor SSB, a Sailor message terminal and two Sailor VHF radios. Critical alarm and safety systems include fire alarm controls, an emergency stop/general alarm panel and a Schneider monitoring system.

Aloft, the mast and communications array integrate two radars, an FLIR camera and two searchlights, while global connectivity is assured with V Sat, satellite TV domes, a 5G phone system, GSM capability and Starlink Internet. For precise docking and close quarters handling, each wing station is equipped with CMC bow thruster control, full rudder and engine controls and MTU RPM gauges.

Entertainment & AV

EIV surrounds guests with a sophisticated, fully integrated entertainment and

automation network that reaches every guest suite, exterior deck and crew area. At the centre of the onboard media system sits a Kaleidescape Movie Vault complemented by Apple TV, AirPlay, Smart TV capability, satellite and terrestrial television, FM radio and an extensive CD/DVD/Blu-ray library, while Plex provides an expanded selection of streaming content. Cinema-quality evenings are delivered via 4K projection paired with immersive 5.1 Dolby Surround, and a dedicated party-mode audio configuration transforms the yacht into an instant celebration venue. Audiophiles will enjoy Sonos distribution amplified by finely tuned Yamaha amplification, with Bluetooth for effortless pairing of personal devices. Strong connectivity is assured through robust Wi-Fi backed by high-speed Starlink Internet. Intuitive control is provided by iPad operation running Videoworks automation with Crestron integration, allowing seamless management of lighting and curtains, precise HVAC adjustment, discreet crew-call functions, and even a karaoke option to add a playful touch to nights at sea.

Safety, security, and fire protection

Designed to inspire absolute confidence, the yacht carries a fully equipped rescue boat and multiple life rafts, with life jackets for adults and children supplemented by inflatable life jackets, together with life buoys, distress flares and line-throwing appliances; an EPIRB and SARTs are fitted to expedite search and rescue coordination when necessary. A high-performance fire detection and alarm system, incorporating smoke and heat detectors and manual call points, is complemented by EEBDs, SCBA equipment, complete fireman's outfits and essential tools such as a fire axe and torches to safeguard crew and guests in any contingency. Suppression capabilities are comprehensive and include a fixed fire suppression system, fire dampers, an Ultrafog system, portable fire extinguishers, hydrants and hoses and a sprinkler network, all supported by a main fire pump and an emergency diesel

fire pump. Damage control is reinforced by main and emergency bilge pumps together with bow bilge pumps, while emergency fuel shutoffs, emergency lighting, medical kits and an emergency telephone provide immediate response options. For vigilant security and constant situational awareness, a GOST tracker completes this meticulously integrated safety suite.

Amenities

Crafted for luxurious ease, the yacht features an on-deck master suite complete with a private owner's balcony and a dedicated owner's office, while opening balconies elsewhere extend the sense of connection to the sea. An elevator serving three guest decks links five exterior guest areas and a versatile beach club, allowing effortless passage from sun-drenched lounging to water-level recreation. Wellness is taken to a new level with a dedicated spa and wellness area that includes a hammam steam room, a cold plunge, a resistance swimming pool and a foredeck Jacuzzi, while three additional water features provide a calming soundtrack throughout. Entertaining is equally considered, with a temperature-controlled wine cellar and storage, outdoor dining facilitated by a Kenyon grill, and a tender garage with passerelle to make arrivals and excursions seamless. Stabilizers enhance comfort both underway and at anchor, and evenings can be enjoyed in a cinema powered by Kaleidescape while Starlink Internet and onboard Wi-Fi keep guests connected. Together, these amenities deliver the experience of a private resort at sea.

Exclusions

A meticulously prepared inventory of excluded items can be furnished upon request.

Disclaimer

The particulars of this vessel are supplied in good faith; nevertheless, no representation or warranty, express or implied, is given as to the accuracy of the information or the present condition of the yacht. Prospective purchasers are strongly encouraged to instruct their own broker or a suitably qualified surveyor to verify independently any matters they consider important. The vessel is offered subject to prior sale, alteration of price, or removal from the market without notice.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
