OVERVIEW

At 219 ft overall, this 2025 aluminum superyacht presents a new expression of contemporary yachting: a taut, purposefully sculpted motor yacht built in Turkey that carries the breadth and bearing of a true mega yacht. Her profile is clean and confident, defined by crisp architectural lines, sculpted overhangs and cascading decks that choreograph an effortless flow between interior and exterior spaces from first light to last.

Executed entirely in aluminum—hull and decks alike—she offers a superb strength to weight balance, composed motion through a seaway and an economical, responsive cruising character. The precision of the metalwork enables generous glazing and large apertures that flood the interiors with daylight and preserve long, uninterrupted views to the horizon. Panels and joins sit with supercar like tautness, every sweep and arc suggesting the restrained power that lies below the waterline.

Life aboard unfolds across layered entertaining and relaxation areas designed for varied rhythms. A broad, resort style stern terrace steps down to a sea level beach club, an ideal setting for languid afternoons at the water's edge. Picture mornings on the swim platform, a restorative plunge, shaded lunches and cocktails as the wake lays quiet across a cobalt sea. Above, alfresco dining decks, a panoramic sun lounge and a deckscape ready for a spa pool and bar create an elevated oasis for family and guests. Inside, expansive salons are ready to be tailored—elegant living rooms with uninterrupted sightlines, a contemplative skylounge and a private owner's suite that captures the finest vistas. Volume throughout the yacht accommodates a wellness studio, cinema style media suite and a flexible office, while a discreet tender and toy garage stores everything from exploratory tenders to energetic watersports equipment.

Propulsion is entrusted to a single MTU power plant, a modern, streamlined

solution that emphasizes operational efficiency, simplified maintenance and serenely quiet passages. Paired with contemporary systems and thoughtful naval engineering, the arrangement is designed for extended, unhurried passages and secure comfort both underway and at anchor. The overall package is a confident global cruiser with the finesse to slip into fashionable marinas and the endurance to voyage well beyond sight of land.

Proudly built and currently lying in Turkey, this 2025 model reflects the nation's advancing craftsmanship and growing stature in the superyacht field.

Presented as a fresh, forward looking aluminum superyacht, she carries the scale and calm of a mega yacht, the refinement of a bespoke residence at sea and the flexibility to serve as either a private family sanctuary or a future yacht program.

A rare proposition at this length and pedigree, she unites contemporary engineering with timeless poise—an uncompromising 2025 luxury motor yacht created for those who prize silent assurance, commanding presence and an effortless bond with the water. Superyacht. Mega Yacht. Luxury Motor Yacht. Aluminum Superyacht. New Build 2025. Global Cruiser.
