# DETAILED DESCRIPTION

---

## Section name

---

Building on the legacy that Nautique established nearly ten years ago with the launch of the G23, this extraordinary vessel is set to reaffirm its status as the ultimate wake surf and wakeboard boat ever designed. The G23 exemplifies the innovative drive of our engineers, who have achieved remarkable advancements in wake and wave shaping technology, creating a masterpiece of design and performance. With its awe-inspiring looks and sophisticated features, the new-generation G23 not only dazzles on the water but also delivers the finest wake surf waves and wakeboard wakes the world has ever seen. The redesigned G23 is poised to once again redefine the trajectory of wake boats, establishing a new benchmark in the industry.

## Features

---

The Nautique G23 stands as a pinnacle of engineering and design, offering a suite of features that distinguish it in the realm of wake surf and wakeboard vessels. At its core lies the formidable PCM ZZ6 engine, with 363.2 hours logged, guaranteeing powerful performance on the water. Enhanced maneuverability is achieved with the addition of a stern thruster, simplifying docking and sharp turns. The interior is tastefully outfitted with Sea Dek throughout, ensuring both comfort and resilience underfoot.

For audiophiles, the G23 is fitted with JL Audio speakers, providing an unmatched sound experience on the water. Safeguarding your investment is straightforward with a full mooring cover and a platform cover, keeping the boat in immaculate condition. Transporting the G23 is hassle-free with the included tandem axle trailer, crafted for easy and secure movement.

The hull of the Super Air Nautique G-Series has transformed the industry, refining wake and wave shapes for all skill levels and line lengths.

Wakeboarders, from novices to experts, depend on the renowned wake and wave prowess of the G-series boats to challenge their boundaries. The Nautique Configurable Running Surface (NCRS) is seamlessly integrated to adjust the hull under any condition, supported by 2,850 pounds of sub-floor ballast to tailor the experience for each rider. The Nautique Surf System is incorporated into the hull to work harmoniously with hull features and the NCRS, generating a fully adjustable, perfectly shaped wave on either side of the boat in moments.

The Nautique Surf System® (NSS) with WAVEPLATE® technology is embedded into the hull to activate on either side of the transom at surf speeds, working flawlessly with the running surface to create a larger wave with each pound of ballast. Offering complete adjustability, the WAVEPLATE extends outward and downward from the transom to intercept and redirect the water flow, forming a wave that can be customized for every surfer. NSS enables surfers to switch sides instantly without needing to offload ballast or people, and fine-tune the wave with variable settings that adjust steepness and shape by precisely controlling the WAVEPLATE's engagement.

Sound is another domain where the G23 shines, thanks to a partnership between Nautique and JL Audio, resulting in the finest audio systems in the industry. The M-Series Elite package is standard, featuring six JL M-Series speakers and a 10-inch subwoofer powered by an 8-channel amplifier. For those desiring an even more immersive audio experience, the optional M-Series Studio Elite package includes two 12-inch subwoofers and the exclusive JL WaveFront™ technology, featuring JL 6.5-inch M-Series speakers firing through a specially-tuned aperture at the base of the windshield. This premium sound package also includes zone control, allowing you to configure sound throughout your boat exactly as you prefer.

# CONTACTS

---

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
