OVERVIEW

2022 Pursuit S 268 Sport — Impeccably equipped center console with twin Yamaha performance

Graceful lines and purposeful capability define this 2022 Pursuit S 268 Sport, a luxurious center-console crafted for sophisticated dayboating and serious offshore saltwater fishing. Propelled by twin Yamaha F200 DEC outboards with integrated electric steering, the boat combines brisk acceleration, precise handling, and the proven dependability of Yamaha power—an ideal match for a premium sport boat, family dayboat, or bluewater sportfisher.

The snow-white hull and Cadet Grey upholstery are complemented by a hardtop whose underside is finished in a carbon-look, producing a contemporary, refined silhouette that draws notice at every harbor and anchorage. Factory and dealer-installed enhancements elevate comfort and convenience: bow filler cushions and a convertible bow/cockpit table create lounge-level spaces; a factory Mediterranean-style bow sunshade with color-matched covers protects bow, helm, and seating; an anchor windlass with helm remote and underwater LED lighting simplifies anchoring after sunset; and enhanced helm seating with armrests and a folding bow backrest adds ergonomic support underway.

Entertainment and electronics are thoughtfully specified with upgraded JBL audio and SiriusXM for immersive sound, twin Garmin multifunction displays within an expanded electronics package, a Sunbright light bar, and a Garmin VHF radio for reliable communication and situational awareness.

The cockpit adapts in moments from social gathering area to a tournament-ready fishing platform: foldaway seating quickly reconfigures the space, while fishing essentials include insulated fish boxes to port and starboard, a 20-gallon livewell, freshwater washdown, and plentiful rod and gear storage. Belowdecks, an enclosed head offers a holding-tank marine

toilet, a sink, and comfortable changing space—an important refinement for cruising comfort.

Serviceability and safety are integral to the design, with accessible thru-hull valves, separate house and engine batteries, and safety glass at the helm to inspire confidence and ease of ownership. Whether cruising the bay, chasing pelagics offshore, or enjoying family days on the water, this 2022 Pursuit S 268 Sport delivers a compelling synthesis of performance, comfort, and style.

Trailer available, not included in price.

DETAILED DESCRIPTION

Hull

Finished in Pursuit Fresh White gelcoat, the hand-laminated hull marries vinyl ester resin with engineered fabrics for lasting resistance, while a three-ply resin-infused composite transom system locks in strength where it matters most. An infused fiberglass structural grid with a molded finish and an integrated bilge water management system is foam-filled for rigidity, supported by bronze thru-hull fittings below the waterline, chrome-over-bronze thru-hulls below the seven-degree heel line, and stainless-clad composite thru-hulls above it, plus a bronze garboard drain that ensures dependable drainage. Lenco electric auto-retract trim tabs and a half-inch 316L stainless steel bow eye with two half-inch 316L stainless steel stern eyes, basic flotation, and integrated transom platform extensions outboard of the engine underscore offshore readiness and confidence underway. A three-step telescopic boarding ladder mounted in the hull platform, a self-draining rope locker with a 316L stainless steel anchor scuff plate, an electric horn with an oval stainless steel cover, and a dedicated transducer location complete this purpose-built foundation designed for serious cruising and sportfishing.

Deck

The hull-to-deck joint is mechanically fastened and protected by a high-density PVC rub rail with a solid 316L stainless steel insert, while a molded one-piece deck and cockpit liner features a generous non-skid pattern for secure footing. Forward, a flush-mounted integral anchor locker with a fiberglass lid partners with an anchor roller chute and an eight-inch cleat, supplying a 14-pound galvanized plow-style anchor and rode

comprising 150 feet of 1/2 inch eight plait line including 10 feet of 1/4 inch G4 chain to get you on station with confidence. Pop up 316 stainless steel cleats measure eight inches with two at the stern, two spring cleats, and two at the bow, and molded recessed hatches employ gasketing, 316L stainless steel latches, and overboard drain tracks for secure, dry storage. A molded transom walkthrough with a hinged transom door features a 316L stainless steel latch and positive catch, while the self draining cockpit includes a bronze ball valve at the hull side. Polished 316L stainless steel bow grab rails to port and starboard and a 316L transom grab rail to port enhance boarding and movement, while LED navigation lights rated for two miles provide clear, reliable visibility after dusk.

Cockpit

Custom cockpit upholstery with Dri Fast foam and mesh backing welcomes you into a molded forward bow seating area with removable cushions and insulated storage beneath, complemented by a forward facing seat for two on the front of the console with supportive armrests for shared comfort. The helm features seating with a split bolster, outboard foldable armrests, and fore and aft adjustment, while the molded helm seat console integrates two drink holders, two rod holders, five dedicated tackle storage trays, storage drawers, bucket or soft side cooler stowage, a cutting board, and a 12V main distribution panel to keep gear organized and accessible. Machinery access is effortless via aft and forward cockpit hatches, and on deck care is simplified by a fresh water washdown with a chrome over brass pull out sprayer plus a raw water outlet in the cockpit with a quick connect fitting and a 25 foot hose. Premium 316L stainless steel drink holders are precisely placed with four in the bow, two at the helm, two in the helm seat module, and four in the gunwale, while five LED cockpit accent lights set the mood and a fire extinguisher stowed under the starboard gunwale stands ready for peace of

mind.

Fishing features

Purpose driven angling amenities abound, beginning with six stainless steel rod holders—four set in the gunwale and two in the helm seat module—backed by under gunwale rod storage for four with reel pads to port and starboard for neat stowage. A lighted Oceana Blue 28 gallon recirculating insulated livewell with an acrylic lid keeps bait lively, and in floor insulated fish boxes of 28 gallons each to port and starboard evacuate via a diaphragm pump with overboard discharge to preserve catch quality. Stainless steel vertical rod holders, five across the transom, stand ready for trolling or stowage, while five dedicated tackle storage trays and two drawers plus a bait prep cutting board streamline every strike and landing.

Hardtop

A molded fiberglass hardtop rises on powder coated structural supports with integrated grab rails, crowned by an overhead storage box for quick access essentials that keeps electronics and gear protected from the elements. Four rod holders stand at the ready, joined by a custom stainless steel ratcheting anchor/stern light with burgee rings and a USA flag, while illumination is comprehensive with two tri color LED lights and LED spreader lights facing fore and aft to enhance night operation. A removable Stamoid with a three piece Makrolon windscreen shelters the helm from spray and sun, and dedicated, reinforced locations await radar, outriggers, and VHF and FM antennas for professional outfitting.

Helm

The molded fiberglass aft tilting helm integrates an instrumentation visor, an electronics mounting surface, and a fixed fiberglass footrest for confident command, paired to a 316L stainless steel steering wheel on a Sport Tilt Plus helm for smooth, adjustable control. A 12V panel with illuminated Carling rocker switches sits within easy reach, flanked by two 316L stainless steel drink holders and a precision compass, while a trim tab control panel with indicator provides immediate feedback on ride attitude. A 12V outlet and dual USB charger keep devices powered and a fire extinguisher stored under the port gunwale provides safety without sacrificing ergonomics.

Console and head

Enter through a two piece fiberglass door with a gasket and a 316 stainless steel automotive style locking latch to a molded fiberglass interior with console entry steps that welcome you into a refined, functional space. The manual porcelain freshwater head features a six gallon holding tank, a macerator discharge pump for convenient waste management, a 316L stainless steel deck pump out fitting, and a bronze thru hull fitting with seacock for secure installation. A refined vanity offers a stainless steel sink with a freshwater faucet and direct access to the freshwater pump with filter, complemented by a vanity mirror, an integrally switched 12V overhead light, three storage hooks, two dedicated towel storage areas, a toilet tissue holder, and a fire extinguisher to ensure comfort and compliance underway.

Electrical

Marine grade reliability begins with UL rated, fully tinned, color coded copper wiring and custom in house built, heat sealed, mechanically crimped,

color-coded battery cables that resist corrosion and downtime, all tied into a custom one-piece electrical harness with waterproof connectors and chafe protection. A powder-coated aluminum battery switch and breaker panel with screen-printed front and back centralizes control and eases diagnostics, while a comprehensive bonding system ties together thru-hull fittings below the waterline, trim tabs, the zinc anode, and the garboard drain for electrical safety. Power is organized by a two-battery system—one battery serving the port engine and one battery serving the starboard engine and house—supported by a grounding bus bar, an electronics fuse block, and a 12V outlet with a dual USB charger to keep instruments and devices reliably powered.

Mechanical

A bright molded interior white gelcoat and a molded hatch with a gasket and a stainless steel gas spring lead to a clean molded bilge sump area that is easy to service. Systems include two 1500 gallon-per-hour bilge pumps with electronic switches and stainless-clad thru-hull fittings for dependable dewatering; an 1100 gallon-per-hour Tournament Series livewell pump with a seacock and thru-hull fitting to support bait and catch systems; a pressure-sensing raw-water pump with an in-line filter for engine cooling and washdown duties; and a fish box diaphragm evacuation pump with selection valves for controlled bilge and fish box management, all routed and secured for durability.

Fuel

An EPA-compliant lined 139-gallon rotomolded fuel tank with engine pickups, shutoff valves, a digital level indicator, and a deck fuel fill plate anchors the range for extended cruising, supplied by custom-built premium fuel feed lines

with mechanically crimped fittings for leak resistant integrity. Filtration is assured by two Yamaha water separating fuel filters with primer bulbs that protect engines and maintain consistent performance on long runs.

Water

A 20 gallon water tank with a 316L stainless steel deck fill plate feeds a premium Sea Tech color coded water hose system with mechanically crimped ends, driven by a pressure sensing, variable speed water pump with an in line filter to deliver consistent freshwater pressure. Freshwater touches include a faucet in the head and a cockpit shower with hose for comfortable rinsing after a day on the water.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.

For more information and to view available yachts, you can visit the company's official website: <https://shestakovyachtsales.com>
