DETAILED DESCRIPTION

Additional information

A limited-edition born from a storied lineage, the Riva Cento was conceived to mark the production of the one-hundredth Rivamare, refining and amplifying that model's timeless aesthetic. With production capped at just twelve hulls worldwide, the Cento is destined to sit in the pantheon of collector's yachts—a rare heirloom that fuses scarcity with enduring style.

Design references to Riva's most celebrated classics are woven throughout the boat. The signature searchlight, a direct inheritance from Aquarama and Aquariva, is mounted on the port side of the windscreen as an elegant nod to the wooden runabout that became an icon of its era. Along the hull the decorative grille has been reinterpreted with a new steel profile framing a polished mahogany insert, inscribed with the Riva name and a constellation of small stars—a poetic link between the shipyard's heritage masterpieces and its forward-looking craftsmanship.

Beneath that distinctive silhouette the Cento is propelled by twin Volvo Penta D6-400 engines and presented in the dramatic Metallic Black Fireworks hull finish, paired with a glossy mahogany interior and maple-seamed cockpit decking that catch the light with artisanal sheen. Every element was executed at Riva's spiritual home in Sarnico, Italy, and carries the weight of one hundred eighty years of shipbuilding tradition.

The lower deck is appointed as a serene, finely finished retreat in glossy mahogany, with climate comfort assured by lower-deck air conditioning. The dinette benefits from electric Venetian blinds that include side blinds and a rooflight blind for bespoke atmosphere, while entertaining is made effortless by a bottle rack and refrigerator, a thirty-two-inch television with terrestrial aerial, DVD/Blu-ray player and Apple TV. Practical luxuries such as an ice maker

and an interior-lighting dimmer add refinement to daily life aboard.

Performance and seakeeping are enhanced by a Seakeeper gyro stabilizer for notable comfort at anchor and underway. The autopilot is augmented with a driving-mode joystick upgrade in addition to the standard docking mode, and an Automatic Trim System optimizes running attitudes. Manoeuvrability is supported by a 4 HP bow thruster, and onboard electrical autonomy is strengthened by an Onan 6 kW generator, an upgrade from the standard 4 kW unit. Useful additions include a fibreglass Seabob/storage compartment to starboard, a telescopic stern gangway, and a custom swimming ladder with an extra step and handrails, while the cockpit is fitted with an up-down table for adaptable social settings. A transport hood and a Goodwool cover are supplied, and an engine-room camera provides additional assurance and easy monitoring.

Navigation and connectivity are state-of-the-art, centred on two Boining displays—sixteen-inch and twenty-four-inch—backed by 5G connectivity for swift, reliable communications. Evening aesthetics and visibility are heightened by white underwater lights installed two per side and an additional pair on the transom, and a cockpit subwoofer enriches the onboard sound experience. Protective covers for the dashboard, copilot seat, pilot seat furniture and table preserve the boat's finishes, while the maple-seamed mahogany cockpit decking with antislip and gloss varnish completes the composition with unmistakable warmth and luster.

As one of only twelve examples produced, the Riva Cento transcends its role as a yacht to become a collectible chapter of maritime history and an unequivocal statement of taste. Whether slipping serenely through the Bosphorus or at anchor in an Aegean cove, she will draw attention wherever she lies.
