OVERVIEW

The 2025 AmeraCat 39 is a newly built, bespoke offshore power catamaran fashioned around twin 450 HP outboards to deliver exhilarating acceleration, exceptional range, and steadfast stability. Conceived as a serious sportfishing and utility platform, this custom 39-foot multihull arrives intentionally open and adaptable so the next owner may define the center console layout, finishes, and onboard systems to their exacting standards.

Professionally constructed in 2025 with taxes paid at purchase, the fresh hull presents a rare opportunity to take possession of a modern bluewater fishing boat with top-tier horsepower at a far more compelling figure than fully completed examples. The design marries the refinement of a luxury-capable vessel with the ruggedness required for offshore duty, making it equally suited for tournament work or extended coastal passages.

Systems and fitment reflect a thoughtfully engineered backbone: electronic integrated steering with fly-by-wire controls provides precise handling, while a Garmin suite consisting of dual 12-inch displays plus a 7-inch unit is installed and an additional fish finder is staged for easy connection. Safety and redundancy are addressed with triple bilge pumps that operate both automatically and manually, and shore power plus a battery charger keep electrical systems reliably energized. A heavy-duty Stamoid T-top, not canvas, offers long-lasting overhead protection, and the deck plan features a generous transom work area, a large swim/dive ladder, multiple insulated compartments that double as fish boxes, and twin livewell boxes waiting for final plumbing. The platform is primed to become a tournament-capable sportfishing yacht with premium electronics and fishing hardware of the owner's choosing.

Delivery is deliberately non-turnkey so the boat reaches its new owner as a blank canvas: it comes without seating or cushions, VHF, stereo or speakers, autopilot, washdown systems, outriggers or rod holders, and it is supplied

without a swim platform or trailer; the livewells are unplumbed to allow bespoke routing and pump selection. A transferable hull warranty is available (details to be confirmed). Comparable, fully finished offshore cats equipped with twin 450s routinely command substantially higher prices, making this a sophisticated entry into premium, bluewater-ready performance at an advantageous investment level. Serious inquiries only.
