OVERVIEW

Trades considered and financing available

She may not be the newest Contender on the water, yet she stands as the fiercest—a certified tournament winner. This hull is the second 39ST with a gap tower ever built and ranks among the earliest Contender entries on the sailfish tournament circuit, its lines and layout the result of a specification painstakingly developed by a renowned captain/owner partnership.

Purpose-built and uncompromising, every detail was attended to, producing a true sportfishing weapon that is being offered for sale for the first time and whose equal will be difficult to find. For the past 11 years, elite captains, mates, anglers and spearfishers have pushed this boat hard and took pride in her performance. Her pedigree and striking profile, together with a disciplined maintenance regimen, announce immediately that this is a turn-key Center Console Sportfish — an Offshore, Bluewater, Open Fisherman, outboard-powered performance fishing machine — fully tournament-ready and, quite simply, a boat that sells itself.

DETAILED DESCRIPTION

Recent upgrades

Meticulously refreshed and carefully maintained, this boat now benefits from triple 2018 Yamaha 300s in white showing 970 hours, all-new Simrad electronics complemented by a new Simrad unit in the tower, new flywheels plus new engine flywheels and belts, all new livewell and bilge pumps, and a crisp new rub rail that restores the vessel's profile. Lighting has been comprehensively upgraded with new underwater, hardtop, and under-gunnel fixtures, and fresh batteries are paired with new built-in battery chargers to ensure reliable power management. New VHF antennas have been painted to match the black tower, and new props and lower units enhance propulsion efficiency. The entertainment and helm experience have been updated with a new Fusion head unit and a new Yamaha Command Link gauge at the lower station, while all-new upholstery—except for the bolsters and the forward coffin box—refreshes the interior surfaces. Since delivery, the vessel has been kept on a consistent weekly wash and quarterly wax program, preserving its shine and mechanical integrity.

Features

Purpose-built for sportfishing days and elegant evenings, the boat features a three-foot gap tower with a second station for elevated control, Rupp single-spreader outriggers with teaser reels for tournament-grade spread, and a real-teak helm pod that anchors the pilothouse in classic craftsmanship. Angling capacity is amplified by a Release Marine eight-rod teak rocket launcher and a forward coffin box equipped with an electric ram, while a forward console cooler and a retractable rear insulated cooler keep provisions and catch chilled. The cockpit is organized around removable rear L-shape

bench seating that opens the deck, a rear helm-seat tackle station for immediate access to gear, and a rear cockpit sunshade for comfort, and custom covers protect the engines, rocket launcher, helm seat, console, and forward console seat. Every detail is conceived to balance offshore capability with refined comfort.

Systems

Fishing systems and creature comforts are thoroughly sorted: four livewell pumps—two in the transom and one in the cockpit deck, with plumbing in place for a fourth removable bow livewell—are new, as are two bilge pumps with their float switches. Freshwater and saltwater washdown systems stand ready for deck and engine cleaning, and the electric head offers an overboard discharge or holding tank option and includes a sink for convenience. Power management is robust with five batteries and two built-in chargers, all new, while night and deck visibility excel through four underwater lights—two aft and two down—offering full color spectrum, strobe, and fade modes, and five Lumitec spreader lights—one forward and four aft—also new. Ambient illumination is provided by under-deck lighting, new under-gunnel lighting with full spectrum and strobe modes, and multi-color recessed lighting in all three hardtops, and six electric reel plugs complete the fishability brief.

Electronics

Integrated navigation and entertainment come courtesy of two Simrad NSE12 units with satellite weather, chartplotter, radar, sonar, and side-scanning sonar, plus one new Simrad NSE8 in the tower and a Simrad autopilot for confident offshore navigation. Communications are handled by three ICOM VHF radios—two on the main deck and one in the tower—while awareness and security are enhanced by Ocean View night vision and a GOST security system.

KVH satellite TV and a satellite phone keep you connected offshore for entertainment and emergency communications. Audio is anchored by a new Fusion Apollo MS-RA670 head unit driving a JL Audio system with ten 7.7" speakers, two 6.5" speakers, two 10" subwoofers, and three amplifiers to deliver immersive sound, and two Simrad NSS16 Evo2 units are also available though not currently installed.

Engines

Power is delivered by triple 2018 Yamaha 300s in white with 970 hours, guided with precision by Uflex hydraulic steering and stabilized by hydraulic trim tabs for confident control at any speed and in variable sea conditions.

Disclaimer
