OVERVIEW

A Platinum spec flybridge power catamaran conceived for effortless luxury, this elegant motor yacht is propelled by Volvo Penta IPS 600 pods with just 64 hours, the driveline managed with twin helm joysticks and an additional starboard side cockpit joystick that puts precise maneuvering at your fingertips. Trim perfect Volvo interceptors, dual fuel filtration and a fixed fire suppression system underpin confidence underway, while twin Northern Lights 12 kW 220V/60Hz generators in acoustic sound shields supply quiet, reliable electrical power offshore. The interior mood is calm and modern, dressed in pure white PVC upholstery, and the saloon's electric coffee table transforms smoothly into a dining table to suit convivial meals or serene relaxation.

Protection and shade are thoughtfully integrated: a rigid flybridge hardtop bimini, cockpit sun awning, a Dralon cover for the fly helm and exterior blinds for the saloon create comfortable, weather smart living spaces. Up top, practical entertaining includes a flybridge dinette, a dedicated fridge and a Kenyon 220V electric grill, while substantial handrails make access to the foredeck easy and safe. Warm, yacht class finish underfoot is achieved with synthetic teak decking in the cockpit and on twin transoms, and a hydraulically operated aft platform rated 250 kg, trimmed in matching synthetic teak, simplifies tender handling and water access.

Blue water capability is comprehensive and intuitive: freshwater outlets at the anchor locker and cockpit, a powered 60Hz shore cord reel with 220V/60Hz connection, VHF equipped with US channels plus a second handset, and a Garmin navigation suite featuring IPS autopilot, AIS VHF, dual 16 inch GPSMAP displays, radar and engine room cameras. Galley and systems are designed for autonomy — a combined fridge and deep freeze (-5°C/23°F; 160 L + 60 L), two 50/60Hz induction hobs and a combination microwave/oven operable on

shore power or generator, an electric freshwater head to starboard, an additional freshwater pressure pump, a 12V diesel transfer pump and a 12V low consumption watermaker producing 60 L/h. Three 100 W solar panels extend quiet anchorage time, while full boat climate control rated at 40,000 BTU is enhanced by a Tropical package to a robust 60,000 BTU. Thoughtful details complete the fit out: a synthetic teak grating in the owner's (maestro) shower, slatted bed bases, epoxy primer antifouling, a double seat at the fly helm and dependable ground tackle — a 20 kg Delta anchor with 60 m of 10 mm stainless chain. PR duty paid and set up for 60Hz cruising, this flybridge yacht marries the presence of a luxury motor yacht with the stability and efficiency of a power catamaran, ideal for family cruising or premium charter and true to its blue water credentials.

DETAILED DESCRIPTION

2024 Fountaine Pajot MY5

Step aboard the 2024 Fountaine Pajot MY5 and discover a world where space, light, and thoughtful engineering define every moment at sea. The 13.5 m² cockpit welcomes you with a three seater bench complete with backrest and a concealed storage compartment, broad underfloor stowage for gear, and effortless access to the aft bathing platforms. Safe, waterproof spot lighting sets a refined evening ambience, while a sculpted staircase rises gracefully to the flybridge. Inside, the dining area is crafted for convivial gatherings, with a bench for six and a table to match, all dressed in the brand's Millésime standard upholstery and illuminated by discreet LED spots, while ventilation flows naturally through a bay window. Opposite, a forward two seat sofa creates a relaxed lounge zone, upholstered in Silvertex in elegant taupe, with its own LED lighting ambiance and fresh air provided by a bay window. The aft cabins offer a serene retreat behind locking wooden doors from the passageway, each featuring an approximately 1.60 x 2.00 m double bed, a hanging locker, and storage beneath the berth framed by a wide fixed hull window that floods the space with natural light; ventilation is assured via hull portholes, while LED general lighting and two bedside reading lights per cabin set the tone for restful evenings, and blackout curtains dress every window and deck hatch for total privacy. Shared between two cabins, the bathroom is entered from the passageway through a wooden door and presents a refined worktop with integrated sink and mirror, a shower with hot and cold mixer, and a large manual marine toilet; practical accessories include a toilet paper holder and towel fitting, with ventilation through a deck hatch and waterproof LED spot lighting for reliable use underway. Forward cabins are accessed through wooden doors from the passageway and feature a double bed

measuring 1.40 / 1.00 x 2.00 m, a hanging locker, and storage under the bed, anchored by a wide fixed hull window, while portholes and a deck hatch provide abundant ventilation, LED general lighting and two bedside reading lights complete the comfort, and blackout curtains on windows and the deck hatch ensure undisturbed rest. The galley is designed for culinary ease, with a generous working top and a vertical access bin, a single bowl sink with drainer, and hot and cold pressurized water via a mixer tap; a stainless steel hob with three high power gas burners pairs with a stainless steel gas oven and is complemented by 150 L of 12V cold storage rated to 7°C. Thoughtful stowage—cupboard, shelves, and drawers—keeps everything organized, while a porthole above the cooking hob ensures ventilation and LED spot lighting delivers clean, efficient illumination. Power comes from two VOLVO 110 CV diesel engines on direct shaft lines, turning two four blade propellers for dependable thrust, with cooling via a seawater heat exchanger and the engine compartment benefiting from combined airflow and mechanical extraction; switchboards and electrical controls are intuitively grouped at the flybridge helm station for confident command. The 12V power circuit is robust and intelligently protected: a starboard service and start Battery Park rated at 345 A/h AGM pairs with a port engine battery at 100 A/h AGM, each bank recharged by alternator with a manual link available between the two, remote battery switches on the electrical panel, and overall circuit protection by breakers. Distribution is decentralized for effortless operation, with 12V switches in the cockpit and at the saloon entrance, a voltmeter for the service Battery Park, interior cockpit switches for pumps and navigation lights, and free plugs reserved for extra equipment. Crowning it all, the 12 m^2 flybridge invites open air navigation and lounging, accessed by comfortable stairs, where a bench for six and a helmsman’s seat with Silvertex covered backrest face a wide instrument console with its protective cover, all sheltered by an Altuglass windshield; essential navigation equipment includes a compass, navigation lights, an anchor light mounted on a spar, and a white beam

headlight, with a dedicated flag bracket to complete the profile.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
