## OVERVIEW

---

LIBERTY, a 2024 Vanquish VQ40, is driven by triple Mercury 400hp V10 Verados, carrying her effortlessly beyond 60 knots. Her layout is elegantly practical: a forward lounge that folds into a sunbed with an integrated dining table, a generous aft sunpad for leisurely repose, and deep walkaround side decks that inspire confidence on the move. Underfoot Flexiteek soles, a full-height glass windshield and a black-painted T-top complete the crisp, purposeful silhouette expected of a luxury dayboat, performance walkaround and sport cruiser.

This VQ40 has been specified with a custom aft-facing bench in place of the standard galley, accompanied by refrigerator drawers and a thoughtfully arranged cockpit pantry. At the helm, twin 16" Garmin Glass Bridge displays marry perfectly with Mercury Joystick Piloting, Skyhook station-keeping and autopilot for instinctive control. Within the center console a private head provides an electric toilet, sink and shower, while a compact double berth offers overnight flexibility, allowing LIBERTY to serve as both a high-performance center console and a superyacht chase tender.

Signature touches — the full windshield, the bespoke reverse bench aft, and a striking Metallic Grey hull trimmed by sky-blue cushions and a matching boot stripe — lend distinctive presence. With approximately 400 hours on the Mercury 400 V10s and warranty coverage through 3/18/2027, LIBERTY pairs cutting-edge performance with refined style in a turnkey offering.

# DETAILED DESCRIPTION

---

## Construction hull & deck

---

A vacuum infused GRP hull crafted with vinylester resin provides a rigid, lightweight foundation, its underwater surfaces protected by antifouling and its profile guarded by a continuous black fender strip; above, the GRP deck in signal white isophthalic gelcoat is likewise vacuum infused with vinylester resin, finished with Flexiteek across the walking areas and a deep walkaround leading to the bow for effortless, secure movement. Forward, a self draining anchor locker with an automatic stainless steel anchor arm sits ahead of a generous lounge whose table seats four to five and lowers to form a sunbed, while deck hatches conceal additional storage; the custom fixed glass windscreen rises to meet the black painted T Top and manual carbon wind deflecting doors channel airflow along the walkaround. The center console affords access to a toilet and shower with a locker beneath the sink and a double bed, and the console and dashboard are appointed with a footrest and sturdy handrails, with engine control presented cleanly through two Garmin screens. Aft, a broad sunbed invites relaxation, supported by an electrically operated aft hatch and a telescopic emergency bathing ladder integrated into the stern, and practical details abound, including six pop up cleats and a cockpit table fitted with carbon cupholders.

## Toilet and bathroom

---

Thoughtfully appointed and easy to maintain, the bathroom features an electric flush toilet and a hand shower, with a countertop washbasin supplying hot and cold water beneath a mirror; an openable porthole provides natural ventilation, while an approximately 60 l holding tank ensures clean, compliant operation for extended time on the water.

## Power and drive systems

---

Configured for diesel inboard installation, the sound insulated engine room is fitted with ventilation fans and both automatic and manual fire extinguishing systems for complete peace of mind; fuel quality is protected by Mercury fuel filters with water separators, dependable starting power is supplied by three dedicated engine starting batteries complemented by robust house batteries, and a Victron battery charger keeps onboard systems ready at all times.

## Mercury maneuvering system

---

Seamless control is delivered by electrical engine throttles with a dedicated control panel and power steering for fingertip precision, while Skyhook electronic position control holds the yacht in place for effortless station keeping and the Mercury JPO joystick system provides intuitive low speed maneuvering and confident docking.

## Fuel system

---

Range and reliability are ensured by one high quality, custom made plastic fuel tank of approximately 850 l monitored by an electronic level sensor integrated into the yacht management system; Mercury fuel filter systems with water separators and a remote fuel shut off further protect the engines and simplify servicing.

## Navigation equipment

---

Clarity and confidence at the helm come from two Garmin Glass Bridge 16 inch displays and a Garmin depth sensor, complemented by a GPS chart plotter preloaded with a Miami chart for local navigation; an autopilot

integrated into the Mercury system streamlines passage making and reduces workload underway.

## Fresh water system

---

A dependable fresh water installation includes one high quality, custom made plastic water tank of approximately 200 l with levels visible on the electronic management system; the freshwater circuit uses 12V pressure pumps for consistent delivery, while a 40 l electric water heater linked to the engine heat exchangers efficiently provides hot water, and convenience on deck is enhanced by a transom shower with hot and cold water.

## Electrical equipment

---

Configured for the US market, the yacht features 12V and 110V electrical systems with comprehensive boat control via the Garmin screen using digital switching by the Empire system; shore power is ready to connect with an included cable, USB charging points are positioned at the helm and forward, an electrical toilet adds everyday comfort, and lighting comprises spotlights and indirect illumination in the toilet, cockpit, and engine room, complemented by deck lights and navigation lights on the T Top.

## Upholstery

---

Exterior seating and sunbeds are upholstered in resilient, easy care Silverguard, combining sophisticated texture with enduring marine performance for a refined look that lasts.

## Bilge system

---

Safety and compliance are integral with 12V AC electric pump control via the

nav station panel, two electric bilge pumps with automatic float switches plus manual override and a bilge level alarm, and one manual bilge pump operable from the cockpit; the self draining cockpit is engineered in accordance with CE regulations to provide added assurance offshore.

## Safety and mooring

---

Prepared for every arrival and departure, the yacht is supplied with twelve life vests, an Aere fender set and mooring lines bearing the Vanquish logo, cleat paint protection covers also bearing the Vanquish logo, and fitted marina harbor covers for the cockpit and cushions.

## Additional options/features included in the yacht sales contract

---

This build is elevated by metallic paint for the hull and deck, a hydraulic automatic gangway/swim ladder and air conditioning for both the cabin and dashboard; navigation and control are enhanced with a Garmin radar and a bow thruster, while a bow seating cover and a bimini with carbon poles at the bow and stern expand comfort at anchor. Helm refinements include a dedicated footrest and a carbon phone holder, and a folding anchor light adds a smart finishing touch.

## Disclaimer

---

The Company offers the details of this vessel in good faith but cannot guarantee or warrant the accuracy of this information, nor the condition of the vessel; a buyer should instruct their agents or surveyors to investigate any details they wish to validate, and the vessel is offered subject to prior sale, price change, or withdrawal without notice.

# CONTACTS

---

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.

For more information and to view available yachts, you can visit the company's official website: <https://shestakovyachtsales.com>
