DETAILED DESCRIPTION

Greenline 40

The 2024 Greenline 40 Coupe Hybrid represents a major leap forward in yachting, artfully merging cutting-edge hybrid technology with the classic elegance and functionality that Greenline Yachts are celebrated for. Since its founding, Greenline has led the way in sustainable boating, continually striving to lessen environmental impact while enhancing the yachting journey. With a clear mission to craft eco-friendly and efficient vessels without compromising on luxury, comfort, or performance, Greenline quickly became a leader in hybrid technology within the yachting sector. The brand made history by introducing the world's first hybrid yacht, the Greenline 33, in 2008, and has since expanded its lineup to include models like the 39, 40, 45 Coupe and Fly, 48 Coupe and Fly, and 58 Fly.

The Greenline 40 Coupe Hybrid not only adheres to the highest standards of luxury and design but also significantly lowers the carbon footprint of its owners. A key feature of this yacht is its advanced hull technology. It boasts a uniquely designed "Superdisplacement" hull, which provides outstanding efficiency, stability, and comfort. This innovative hull shape allows the yacht to glide smoothly through the water with minimal resistance, reducing fuel consumption and extending its range.

The hybrid system on the Greenline 40 Coupe includes a diesel engine combined with electric motors and lithium batteries, allowing the yacht to operate in silent mode using only the electric motors. This quiet cruising mode offers numerous advantages, such as zero emissions, reduced noise pollution, and decreased operating costs. The electric motors run quietly, ensuring a serene cruising experience and minimizing disruption to marine life. Moreover, the efficient hull design and hybrid system help lower fuel consumption,

cutting overall operating costs and enhancing the yacht's range and versatility. Owners can switch between electric and diesel power as needed, providing a more peaceful onboard experience free from the vibrations and noise of traditional diesel engines.

Silent mode also grants access to areas with noise restrictions, like certain harbors, marinas, or eco-sensitive zones, and enhances maneuverability with precise and responsive control, especially in tight spaces or during docking. The combination of the hybrid system and solar panels ensures optimal energy use, further reducing environmental impact. Additionally, electric motors require less maintenance than conventional diesel engines, saving time and money over the yacht's lifespan. Owning a Greenline 40 Coupe Hybrid is not just about luxury; it's a commitment to sustainable living and responsible boating.

The 2024 Greenline 40 Coupe Hybrid is crafted with the modern yachtsman in mind. Its interior reflects Greenline's dedication to quality and craftsmanship, featuring premium materials, smart layouts, and abundant natural light. The yacht's hybrid propulsion system ensures you can enjoy all the comforts and luxuries of modern yachting while minimizing your environmental footprint. Whether cruising along the coast or venturing to distant destinations, the Greenline 40 Coupe Hybrid offers a smooth, quiet, and eco-friendly experience.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
