## OVERVIEW

---

The 2024 Blackfin LIQUID LOUNGE is a richly appointed interpretation of Blackfin's 400CC center-console, a vessel that sets the standard in the center-console sportfish, offshore, and bluewater dayboat arena. Outfitted for exceptional comfort and control, she carries a Seakeeper 3 for remarkable stability both underway and at anchor, and an elevated electronics package that pairs twin 24" Garmin multifunction displays with a FLIR thermal camera and always-on Starlink satellite connectivity. Purpose-built for determined anglers who also prize elegant entertaining, her expansive cockpit conceals dedicated tackle and rod storage while a summer kitchen—complete with electric grill and generous prep area—keeps hospitality effortless. A transom door permits straightforward access from the platform forward of the outboards, and the refined cabin below is perfectly suited to overnights and spontaneous weekend escapes; a lithium battery bank supports ship systems while quad Mercury power totaling 1,600 hp, protected under warranty through April 2029, delivers a polished synthesis of technology, utility, and performance worthy of both a premium fishing yacht and a luxury tender.

# DETAILED DESCRIPTION

---

## Overview & key features

---

The Blackfin 400 CC delivers a rare synthesis of hardcore fishing pedigree and effortless dayboat versatility, welcoming guests forward with generous wraparound seating and a broad sunpad that invites unhurried lounging beneath open sky. The helm asserts confident control with dual 24-inch Garmin multifunction displays, superb sightlines, and dual rows of ergonomically arranged seating to comfortably accommodate up to six, while aft the expansive cockpit is purpose-built for offshore action and easy entertaining with a full integrated tackle station, abundant rod and gear stowage, cavernous fish boxes and a transom livewell crowned by seating. When the mood shifts from chasing pelagics to relaxing at anchor the conversion is seamless: a fully equipped summer kitchen stands ready to serve and a swim platform forward of the engines offers safe, convenient water access for swimming, diving and boarding through the transom door. Below deck, LIQUID LOUNGE extends the day with inviting overnight accommodations in an air-conditioned cabin where a forward bench converts swiftly to a berth for two, complemented by a compact galley and a fully enclosed head with shower to elevate comfort on extended adventures; sunlight filters through an overhead skylight and portlights to keep the space bright and open, while a smart TV and integrated sound system add an extra level of convenience for lingering at anchor. Performance is unequivocal: quad Mercury 400 V10 outboards produce a combined 1,600 hp of thrust with Mercury warranty coverage through April 2029, a Seakeeper 3 actively stabilizes the ride underway and at rest, a modern lithium battery and inverter system provides quiet, generator-free power, and Starlink satellite internet keeps you connected well beyond the horizon. Key highlights include quad

Mercury 400 V10s under warranty through April 2029, a Seakeeper 3 gyro stabilizer, dual 24-inch Garmin MFDs, FLIR thermal night-vision, Starlink satellite connectivity, a lithium inverter system for generator-free operation, Gemlux carbon fiber outriggers, a premium JL Audio sound system, an integrated tackle center with abundant cockpit storage, and an integrated summer kitchen featuring a Kenyon grill, sink and twin Yeti coolers.

## Machinery

---

Power comes from quad Mercury 400 hp V10 outboards delivering a combined 1,600 hp, covered by premium warranty through April 30, 2029, with engine hours as of 03/26 showing uniformly 235 on each motor—port, port center, starboard center and starboard—evidencing balanced, conscientious use. The outboard propulsion turns stainless steel three blade propellers for crisp acceleration and efficient cruise, while a Reverso engine flush system simplifies freshwater maintenance after every run. Ride and stability are enhanced by a Seakeeper 3 gyro stabilizer and the Zipwake Series S trim control system, which optimizes running attitude automatically, and precision helm response is furthered by electric tilt steering to make close quarters maneuvering as effortless as long range passages. Fuel is gasoline, perfectly matched to the performance profile of this platform.

## Electrical & auxiliary systems

---

The electrical architecture is robust and thoughtfully segregated with dedicated trays housing four engine and two house Group 31 batteries, while an AC/DC inverter paired with two lithium ion batteries delivers quiet, generator free power to onboard systems and is managed through a comprehensive power distribution panel that isolates engine and house banks for reliability. Shore power is supplied via 120V AC, 30 amp service with a

50 foot smart cord, and a weatherproof electrical system with individual circuit protection safeguards every circuit against the elements. A full bonding system protects underwater gear with an anode, and the lithium battery/inverter solution removes the necessity for a standalone generator.

## Tank capacities

---

Range and autonomy come easy with 475 gallons of fuel on board supported by 100 gallons of fresh water for extended comfort; waste is handled by a combined grey and black water capacity of 22 gallons and hot water needs are met by a 4.5 gallon water heater to ensure reliable amenities on multi day excursions.

## Ancillary equipment

---

Climate control is assured by a Webasto air conditioner rated at 16,000 BTU, while a Lewmar bow thruster adds confidence in tight marinas and the Seakeeper 3 steadies ride quality underway and at anchor. The fuel system is built for reliability with double clamped fuel lines, four fuel selector valves and four water separating fuel filters for clean delivery. Bilge management is comprehensive with three automatic bilge pumps in the bilge and one in the cabin housed within a fiberglass finished compartment, and overboard discharge is handled by a macerator equipped sewage system. After dark, RGB LED underwater lights set the tone, and precision sonar returns come courtesy of B175HW and B175L transducers.

## Safety equipment

---

A comprehensive safety suite inspires confidence offshore, centered on a Siren Marine vessel monitoring system with GPS tracking paired with anti theft

sensors, geofencing and remote vessel systems control so you can monitor and command systems from anywhere. Offshore readiness is reinforced by a 406 MHz EPIRB, a six person emergency life raft and a fully equipped ditch bag. Fire protection is provided by two extinguishers located in the cabin and aft transom hatch, while an emergency medical kit and a USCG approved defibrillator add crucial layers of preparedness; a CO monitor and smoke detector in the cabin provide continuous atmospheric safety.

## Communication equipment

---

Clear, reliable communication is delivered by two Garmin 215 VHF radios, while Starlink satellite internet extends connectivity far offshore to enable chart updates, weather and messaging wherever the adventure leads.

## Navigation

---

At the helm dual Garmin 8624 GPS/chartplotters form a powerful navigation core, paired with a Garmin GMR 424 x HD2 48 inch open array radar for long range target discrimination; night operations benefit from a FLIR thermal camera and XM satellite weather keeps you ahead of shifting conditions, while a magnetic compass provides steadfast redundancy to complete a suite designed for confident passagemaking.

## Deck equipment

---

The 400 CC's deck plan is a study in purposeful design: a fiberglass hardtop with powder coated aluminum framework crowns the helm and integrates a tempered glass windshield with wiper and washer, seven RGB LED overhead lights, four overhead rod holders, powder coated handrails and eight LED spreader lights with a molded step for secure access. Essential fittings include

navigation lights, an electric windlass with stainless steel anchor, ten stainless steel cleats, a bow tow eye and a stainless steel rub rail with insert. A dive and boarding door with ladder and a swim platform streamline water access, while a fiberglass cockpit liner with non skid and self bailing design keeps decks dry and surefooted. Storage and fishability are abundant with two in floor bow lockers with overboard drains and lighting, a 30 gallon bow baitwell with acrylic lid, a 70 gallon transom baitwell and twin in floor fish boxes totaling 160 gallons with macerated pump outs. Rod management is exceptional with twelve gunnel mounted stainless steel cup/rod combo holders, six stainless steel transom rod holders and fourteen hardtop rod holders in white or black, and outriggers with Gemlux carbon fiber telescoping poles expand the spread. The cockpit summer kitchen and prep station is ready for entertaining and washdowns are thoughtfully placed with raw water faucets at port, stern and bow and fresh water faucets at starboard, stern and bow. Courtesy lighting is RGB LED 12V, there are seventeen stainless steel drink holders positioned throughout, an elevated foldaway helm platform surfaced with SeaDek fine tunes sightlines and SeaDek spans the decks for comfort underfoot. Canvas and covers include bow and aft shade, console cover, forward console lounge cover, forward and aft helm seat covers, transom seat cover and a Transhield cover for added protection. Seating is generous and secure with bow and cockpit bolsters, dual row helm seating offering six positions, power adjustment on the captain's chair, a forward facing console lounge with armrest and cup holders and comfortable transom seating that tucks away when it's time to fish.

## Audio / visual entertainment

---

Entertainment is immersive and crystal clear thanks to a JL Audio stereo suite comprising six 8.8 inch speakers and four 7.7 inch speakers with LED lighting, four subwoofers, two five channel amplifiers and one eight channel amplifier,

all controllable via wireless remotes; connectivity is abundant with six USB outlets and three wireless phone chargers, while a 22 inch Majestic smart TV with a sound bar in the cabin elevates movie nights and lazy mornings at anchor.

## Galley & domestic equipment

---

Thoughtfully appointed, the cabin galley features a Zest microwave model ZEO7120S, an Isotherm Drawer 65 black glass door refrigerator/freezer and a sink with faucet—everything needed for effortless refreshments below. In the cockpit the summer kitchen and prep station are built in fiberglass and fitted with two pull out, removable Yeti Tundra 45 QT coolers, a fiberglass sink with faucet, four storage drawers, two aft starboard drawers with utility boxes, four port side drawers including two with integrated trash cans, and a Kenyon electric stainless steel grill that turns fresh catch into an easy feast.

## Special equipment & other features

---

Peace of mind comes standard with a three year factory warranty in effect until April 30, 2027, complementing the comprehensive equipment suite and ensuring the next owner enjoys the boat with confidence from day one.

## Accommodation

---

LIQUID LOUNGE invites overnighting in a climate controlled cabin with a forward berth and mattress featuring a flip up backrest for versatile lounging by day and restful sleep by night; power and connectivity are close at hand with two USB outlets and one 120V outlet. Entertainment is elevated by a 22 inch Majestic smart TV and matching sound bar, while a skylight and portlight draw in natural illumination. Six dedicated rod storage spaces keep

gear organized. The private head is fully enclosed and thoughtfully finished, featuring a shower with a lighted shower head, a sink with faucet, a vanity with mirror, a toilet with a teak bench seat, towel hooks and a convenient outlet—an elegant blend of form and function for extended cruising.

# CONTACTS

---

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.

For more information and to view available yachts, you can visit the company's official website: <https://shestakovyachtsales.com>
