OVERVIEW

2024 MTI V Marine Technology Inc V 42

Tailor Your New MTI with TNT Custom Marine

The MTI-V series epitomizes exceptional performance, opulence, and customization for those who desire the pinnacle of center console yachts. Each MTI-V is expertly crafted to match your distinct preferences and boating lifestyle, whether your focus is on performance, relaxation, family excursions, fishing, or serving as a tender to a larger yacht.

With its cutting-edge "Slot V" hull, this yacht offers an experience that is truly unparalleled in the Vee Bottom category. The hull's design features twin keels, similar to a catamaran, providing straight, stable, and predictable handling at all speeds. The step design enhances ventilation, capturing a layer of air beneath the hull and between the twin keels. With its pronounced bow flare, the MTI-V 42 ensures an exceptionally dry ride, even in challenging conditions, whether facing headwinds or riding with the waves.

In the cockpit, the area above the central cabin features a front sun lounge that is among the most inviting seats on board. Its contoured shape cradles you comfortably, instilling a sense of security at cruising speeds. Moving forward, you'll find U-shaped bow seating that enhances social interaction.

Behind the helm, two rows of three-person bolsters—designed for both standing and sitting—are complemented by a spacious hardtop that provides ample coverage for both seating rows. At the rear, a generous bench seat awaits.

The cabin features a sizable forward berth with a plush mattress. When not in use, the rear of the bed folds up to create a stylish seating area, perfect for relaxing or enjoying the outdoors. A galley area and an electric flush head are discreetly tucked away beneath additional seating.

Design:

Unlike many manufacturers, MTI-V has dedicated time to perfecting the hull design, achieving an ideal balance of speed and cruising capability with impeccable handling. This groundbreaking "Slot V" design offers a ride that surpasses conventional boats, so much so that we patented it. The twin keels ensure handling that feels as if the yacht is gliding on rails, eliminating any sensation of sliding or hooking during turns. The MTI-V 42 transcends the typical center console, offering amenities and user-friendly features that enhance your time on the water. Our extensive list of options serves as a guide for creating your ideal yacht, and we welcome discussions on any additional features you may desire.

Each vessel is custom-built for the individual client, reflecting their specific vision of how the yacht should function within their boating lifestyle. The MTI-V 42 presents nearly limitless options and configurations, including various seating arrangements and cabin amenities that make it suitable for overnight adventures and long-distance cruising.

The area above the central cabin features a front lounge that is one of the most comfortable spots on board, designed to keep you secure while cruising. The unique hardtop is spacious enough to provide coverage for those at the console and those seated in the second row. The MTI-V 42 includes six electric bolsters and various rear seating options, allowing for a tailored configuration to suit your needs.

Performance:

The patented hull design offers a ride that is truly exceptional in the Vee Bottom realm. Utilizing twin keels similar to a catamaran, the hull ensures straight, stable, and predictable handling at all speeds. The step design allows for air to flow beneath the hull, creating a boundary layer of air between the twin keels. The MTI-V 42 remains remarkably dry, even in extreme conditions, maintaining a high bow in both head and following seas. The wide bow

effectively mitigates large swells.

Despite its impressive size (42'), the yacht feels agile and sporty. The efficient hull design not only maximizes top speed but also optimizes fuel consumption at cruising speeds (40mph @ 39gph, achieving over 1 mpg with quad Mercury 300 Verados). This efficiency, combined with a 450-gallon fuel capacity, ensures an excellent range. With 4x Mercury 350 Verado engines, expect a top speed of 75mph and cruising at 45-50mph, burning 1mpg. For those seeking even more power, 4x Mercury Racing 400R engines offer a top speed of 80mph while cruising at 50mph, also burning 1mpg. For the ultimate performance, 4x Mercury Racing 450R engines can reach a top speed of 85mph, cruising at 55mph.

Explore yacht sales in your current boat location and seize the opportunity to buy a yacht that embodies luxury and performance.

DETAILED DESCRIPTION

Section name

The 2024 MTI V Marine Technology Inc V 42 stands as a pinnacle of nautical design, delivering unmatched performance, luxury, and personalization for those who seek the ultimate in center console yachts. Each MTI-V is crafted with precision to meet the distinct preferences and lifestyle of its owner, whether for high-speed performance, leisurely cruising, family adventures, opulent comfort, fishing, or as a tender for a larger yacht.

At the core of the MTI-V 42 is the innovative "Slot V" hull, a groundbreaking design that offers a ride unlike any other in the Vee Bottom category. This hull, featuring twin keels akin to a catamaran, guarantees straight, stable, and predictable handling at any speed. The step design introduces air beneath the hull, forming a boundary layer of air between the twin keels, which, along with the enhanced bow flare, ensures an exceptionally dry ride even in challenging conditions, whether facing headwinds or following seas.

The cockpit is thoughtfully designed with comfort and safety as priorities. Above the central cabin, a front sun lounge provides one of the most inviting seats on board, with a contoured shape that holds you securely at cruising speeds. Moving forward, U-shaped bow seating enhances social interaction, while behind the helm, two rows of three-person bolsters offer both standing and sitting options. The distinctive hard top is expansive enough to cover both seating rows, and at the rear, a generous bench awaits.

Inside the cabin, a spacious forward berth with a plush mattress is ready to welcome you. When not in use, the rear of the bed folds up to create a limo-style seat, ideal for relaxing or escaping the elements. The cabin also includes a galley area and an electric flush head discreetly hidden beneath additional seating.

The MTI-V 42 is more than just a center console with race boat construction; it provides amenities and ease of use that enhance your experience on the water. Each vessel is custom-built for the individual client, offering nearly limitless options and configurations. Various seating arrangements are available, as are cabin features that make the yacht suitable for overnight stays and long-distance voyages. The area above the central cabin includes a front lounge designed to keep you secure at cruising speed, and the hard top covers both the console and the second row of seats. The MTI-V42 includes six electric bolsters and multiple rear seating options, allowing for a tailored configuration.

Performance is where the MTI-V 42 truly excels. The patented hull design ensures a ride that is both nimble and sporty, despite the yacht's substantial size (42 feet). The efficient design not only reaches impressive top speeds but also optimizes fuel efficiency at cruising speeds. With a 450-gallon fuel capacity, the MTI-V 42 offers an excellent range. Outfitted with quad Mercury 300 Verados, it reaches a top speed of 75 mph and cruises at 45-50 mph, consuming 1 mpg. With quad Mercury Racing 400R engines, the top speed increases to 80 mph, cruising at 50 mph with the same fuel efficiency. For those desiring even more power, the quad Mercury Racing 450R engines achieve a top speed of 85 mph, cruising comfortably at 55 mph.

In conclusion, the 2024 MTI V Marine Technology Inc V 42 is a testament to cutting-edge innovation and luxury, offering a seamless fusion of performance, comfort, and customization for the discerning yacht enthusiast.

Other details

The company provides the information about this vessel with complete honesty, but it is crucial to understand that it cannot ensure the accuracy of these details or guarantee the vessel's condition. Potential buyers are advised to employ their own agents or surveyors to meticulously examine and confirm

any specifics they consider essential. This vessel is offered for sale, yet it remains subject to being sold beforehand, price adjustments, or removal from the market without any prior notification.
