Unveiling the Next Era of Sustainable Sailing: The AKANA 44' Fully Electric Catamaran

Enter the new age of yachting with the revolutionary AKANA 44' electric catamaran, where environmental responsibility meets opulent comfort. This exquisite yacht, with its sleek aluminum hull and innovative Dew Jet electric engines, offers a sailing experience that redefines the standards of power yachting.

Unlike conventional sailboats, this vessel provides full control in any wind condition, allowing you to fully engage with nature without the usual distractions and costs. In E-mode, you are liberated from fuel, maintenance, and parts expenses, potentially saving you up to 50% of your annual yacht ownership costs.

The yacht's impressive range capabilities set a new standard for electric maritime travel. Glide at a brisk top speed of 16 knots for 30 nautical miles, or extend your adventure to 60 nautical miles at a relaxed cruising speed of 10 knots. At a gentle 5 knots, explore up to 90 nautical miles on pure electric power—enough to journey from Key West to Havana without a single drop of fossil fuel. For longer voyages, switch to GEN-mode, where the onboard diesel generator extends your range to an astounding 900 nautical miles, with batteries recharged in just 4 hours.

The catamaran's elegant design continues into its living areas, featuring a spacious salon and a versatile aft cockpit that can transform from a sophisticated dining space to a tranquil sunbathing or Zen retreat. Below deck, enjoy comfortable accommodations for six guests, with a master cabin and two guest cabins.

Currently under construction, this vessel will be ready to sail this summer. For the fortunate buyer, there is still an opportunity to personalize the interior and

convert it into a four-cabin layout at no additional cost.

Explore yacht sales in the current boat location and seize this chance to buy a yacht that represents the pinnacle of sustainable luxury yachting.
