## OVERVIEW

---

Born from a blend of inventive thinking and seasoned craftsmanship, the Aquila 44 Yacht Power Catamaran occupies the summit of its class as an elegant luxury catamaran that marries true bluewater capability with the sociable ease of a modern motor yacht. Designed for long-range cruising and intended as a welcoming floating sanctuary, every contour and surface received meticulous attention from Aquila's design and engineering teams to enhance efficiency, onboard comfort, and composed performance under way, creating a power catamaran equally suited to island hopping and to hosting refined sunset gatherings on the flybridge.

Propulsion and handling are arranged to favor serenity and confidence: twin Volvo Penta diesel engines sit aft, isolated from the living areas to minimize noise and vibration, while sculpted bulbous bows extend the waterline to improve economy and reduce pitching. Modern control systems — multifunction displays, digital throttles, joystick manoeuvring, comprehensive engine monitoring, thrusters, and wide set mains — combine to make the Aquila 44 Yacht intuitive to operate, delivering couple friendly handling that appeals to experienced mariners and newcomers to multihull cruising alike.

The layout reflects a deep practical understanding of how owners live aboard, with exterior and interior spaces thoughtfully composed around real life scenarios. A molded stair links the flybridge directly to the foredeck, providing safe access to the ground tackle locker and forward cleats for anchoring and docking, while broad side decks and strategically positioned handrails emphasize guest comfort and security. Offered in a three cabin configuration, the yacht also presents a luminous salon and galley with panoramic 360 degree views beneath an expansive flybridge. Guests step aboard from either swim platform into an aft deck centered on an alfresco dinette, where a window partition between cockpit and galley lifts and the countertop folds

outward to form an elegant service bar. The galley, positioned between the aft deck and main deck salon and dinette, flows effortlessly between inside and out and is complemented by a summer kitchen that serves the aft dining area, while those on the flybridge enjoy sweeping vistas alongside the helm when the yacht is under way.

Construction follows a premium specification throughout. The hull and deck are resin infused for high strength and stiffness, with solid FRP laminates at hull centerlines and surrounding all through hulls, and vinylester resin below the waterline for superior resistance to osmotic degradation, all finished in an NPG gelcoat formulated for exceptional UV protection. Bulkheads and primary FRP components are resin infused, and each hull includes a dedicated bow crash box. The bulbous bows are molded and bonded individually to optimize fuel efficiency, speed, and stability, while hull and deck glazing uses high quality tempered, shatter resistant glass that meets strict ISO standards. A tailored composite framework underpins the salon and flybridge, preserving structural rigidity and ensuring a quietly composed ride appropriate to a luxury yacht.

The standard equipment list is comprehensive and oriented to comfort, safety, and style. Propulsion is supplied by two D4 230HP Volvo Penta inboard V drives equipped with rope cutters and a 7 inch Volvo display at the helm. Accommodation comprises three cabins, each appointed with a 6 inch memory foam mattress and a private ensuite featuring Corian countertops, a contemporary wash basin, a walk in shower, and a fresh water toilet with macerator and selector valve. The integrated flybridge hardtop, supported by stainless steel, incorporates a radar arch and two manually opening hatches; the helm benefits from a wrapped steering wheel with tilt, and the flybridge wet bar includes a sink and faucet set into Corian. Decks are finished with textured non skid surfaces, a retractable stainless steel swim ladder with teak steps simplifies water access, and the cockpit is fitted with two fixed barstools while the salon table converts from coffee to dining height. The galley offers

Corian worktops, a stainless sink and faucet, a two burner induction cooktop, microwave, and a fridge/freezer combo, set on synthetic wear resistant flooring. LED navigation and integrated lighting create atmosphere, stainless grab rails and cleats combine durability with refined detail, and aft seating converts into a sunpad for lounging. Electrical provisions include four 200Ah AGM engine start batteries, dual 50A 125/250V shore power inlets with cables, and a 12/100V 5000 200VA inverter/charger. Ground tackle is managed by a 1500W windlass with handheld remote, a 55 lb Delta primary anchor with 150 feet of chain plus a mooring bridle, and a 45 lb Danforth secondary anchor with 200 feet of rope. Hot water is provided by two 16 gallon/60L heaters. Safety and convenience are supported by a Fusion audio system, an onboard fire suppression and alarm network, fuel/water separators, and automatic bilge pumps. Tankage is generous, with two integrated 147 gallon/560L fuel tanks, a 206 gallon/780L fresh water tank, and three 21 gallon/80L holding tanks, and the specification is completed with a mooring kit and antifouling bottom paint to inspire confidence on bluewater passages. A wide range of optional equipment enables owners to tailor the yacht to their cruising ambitions. Connectivity is available through Starlink, while the Coastal Navigation Package centers on Raymarine electronics with a single 12 Pro S chartplotter, CPT S transducer, Rayma 170s multifunction display, Raymarine 63 VHF with remote station and antenna, a CAM220 C mounted on the aft flybridge, and an Evolution Pilot with P70 rotary display. Interior finishes can be upgraded with lighted aged ash cabinetry, and propulsion can be enhanced with twin D4 320HP Volvo Penta engines. Range can be extended with an auxiliary 95 gallon/360L reserve fuel tank with transfer, and precision manoeuvring benefits from an 8.0HP bow thruster in the starboard hull. Weather protection is offered via a Lexan windscreen enclosure with black trim, and the flybridge can be equipped with an electric BBQ, a stainless steel ice maker, and a dedicated TV, while tender handling is eased by an optional stainless steel davit system. Additional options include a wireless windlass

---

remote, two 100W solar panels, twin shore power cable master stowage systems, and a SeaXchange XTCl watermaker producing 94 liters/25 gallons per hour. Practical upgrades cover a fresh water deck wash pump for the bow area, a 5000BTU chilled water air conditioning unit, full length mirrors in all cabins, cabin fans, and a filler cushion for the salon table. Liveaboard conveniences comprise a ventless washer/dryer combo, pre wiring for a master cabin TV, shore side TV cable connection, and an additional 65L fridge/freezer in the salon, while an aft cockpit sunshade system with two removable poles and panel provides on deck comfort. Navigation and entertaining can be augmented with an Evolution autopilot wireless remote, a remote spotlight, two blue underwater aft lights, and the Raymarine Radome RD418HD 4kW 18 inch color scanner. Galley customization includes the option for a single well sink, and power demands can be met by a Northern Lights 12kW 60Hz generator.

The Aquila 44 Yacht is a thoughtfully engineered, seaworthy multihull that delivers the volume and livability of a cruising catamaran, the assurance of a bluewater motor yacht, and the effortless entertaining potential of a contemporary flybridge cruiser — an elegant synthesis of innovation and uncompromising refinement for owners who expect performance and luxury in equal measure.
