OVERVIEW

The 2023 Pardo 43 is lavishly specified and immaculately preserved, a luxury dayboat and walkaround express cruiser that marries elegant Italian craftsmanship with spirited performance and exceptional versatility. Its signature Pardo lines sweep into a broad, open cockpit that flows into generous sunlounging areas and a refined, light-filled interior, achieving a rare equilibrium between social deck space and assured offshore capability in a stylish performance motor yacht. This single-owner, Chesapeake-kept example is based in Edgewater, Maryland and has been sheltered from harsh sun, extreme heat and constant salt exposure, a level of stewardship that leaves the yacht presenting beautifully and feeling remarkably fresh throughout. Propulsion is provided by twin Volvo Penta IPS 650s, delivering an optimal blend of speed, fuel economy and precise handling, complemented by intuitive joystick docking and a comprehensively equipped helm. A substantial options list—comprising both factory and bespoke upgrades—makes this Pardo 43 effectively turnkey for owners who want a premium dayboat that hosts effortlessly or extends confidently on coastal passages without compromising comfort. Finished in custom Porsche Chalk hull paint and fitted with low-hour IPS 650s currently under extended warranty, the yacht also includes a gyrostabilizer, Volvo DPS with Skyhook station-keeping and enhanced entertainment and accommodation packages, presenting an elegant, ready-to-enjoy offering for the discerning yachtsman.

DETAILED DESCRIPTION

Hull details

The hull is finished in a bespoke Porsche Chalk paint, with the deck and galley deliberately color-matched in that same refined tone and set off by synthetic teak underfoot. A generous bathing platform equipped with a hydraulic lift stretches the living space to the water and is protected by a rub rail running along the swim platform edge. Entertaining is effortless with two additional refrigerator drawers built into the aft seat bench and a conveniently located ice maker. Shade is versatile and elegant thanks to a forward awning with removable poles and a Sureshade electric bimini seamlessly integrated into the T-top, while a windshield extension bridges the T-top and the windshield to offer enhanced shelter. Practical systems include a chain counter and a freshwater anchor shower, and atmospheric lighting comes from underwater LED fixtures plus pop-up lights that illuminate both the bow and the dining table area. Docking is refined by extra cleats on the stern for cross lines and additional fender clips on the bulwark and swim platform—sixteen in total—and the presentation is preserved with complete covers for all cushions.

Mechanical & electrical

Power and control are delivered with unmistakable refinement: twin Volvo Penta IPS 650 drives with joystick operation combine with the Volvo Dynamic Positioning System – Skyhook to offer precise, intuitive handling, while a 7k gyroscope stabilizer maintains serene motion both underway and at anchor. Electrical resilience comes from an upgraded house battery bank of two 90 Ah+ units paired with an enhanced 80 Ah battery charger, and onboard power is provided by an 11 kW Kohler generator for reliable ship's service. Comfort is assured by reverse-cycle tropical air conditioning, with two dedicated units

delivering both heating and cooling, and situational awareness is augmented by an aft-facing camera mounted on the T-top that feeds directly to the helm displays. A custom-painted T-top tower accommodates radar and the DPS hardware, complemented by a 1.5 m offshore VHF antenna to ensure clear, long-range communications.

Interior

Descend below decks into an interior awash with luminous finishes, where sleeping accommodations both forward and aft have been arranged to deliver flexible comfort for prolonged voyages. In the aft cabin a custom-mounted stainless-steel wine cooler ensures fine vintages are always at hand, while a bespoke, integrated microwave is seamlessly installed within the cabin for effortless meal preparation. A sophisticated dimmer system controls the lighting inside and out, allowing you to tailor the ambiance to suit every moment aboard.

Electronics & entertainment

At the helm, a pair of Volvo Glass Cockpit multifunction sixteen-inch displays form the centerpiece of an integrated navigation suite, joined by a Volvo autopilot for assured course management. Long-range detection is provided by a Garmin GMR Fantom eighteen-inch radome radar capable of forty-eight nautical miles, finished in paint that matches the T-top. Clear voice communication is handled by the Garmin VHF 315i while the Garmin AIS-800 Rx/Tx bolsters vessel awareness and traffic information. Leisure systems are equally considered: a twenty-two-inch LED flat-screen TV with a DVB-T antenna and Apple TV delivers visual entertainment, and the APOLLO Ultra High Performance Package sound system supplies immersive onboard audio.
