OVERVIEW

Presenting the Platinum Riviera 4600 Sport Yacht, duty paid and in nearly new condition, with under 90 hours recorded on the mains and an extended engine warranty in place; all routine servicing is up to date. This example benefits from a host of thoughtful upgrades, including three joystick control stations for precise maneuvering, a full-size residential washer and dryer, added refrigeration capacity, Yacht Armor protection applied throughout interior and exterior surfaces, underwater lighting, enlarged Garmin multifunction displays, Starlink internet, thermal and night-vision capability, supplementary onboard cameras, and a high-capacity watermaker; an optional tender is also available. As a bona fide Platinum Edition, the 4600 carries an elevated specification, sumptuous fit-out and refined finishes throughout, making it a particularly compelling choice for anyone considering a 46' Riviera. Owner moving up. Conceived through the collaboration between Riviera and 4D Designs, the 4600 Sport Yacht pairs an advanced hull form with contemporary construction techniques to deliver an optimized power-to-weight ratio that enhances fuel economy while retaining Riviera's signature blue-water seakeeping. Equally at home as a luxury motor yacht or an express cruiser, she combines confident performance with graceful presence. Her modern silhouette increases interior volume, creating a large cockpit, an inviting saloon and three well-proportioned staterooms, including a full-beam owner's suite, and the overall specification is comprehensive.

DETAILED DESCRIPTION

Navigation & electronics

The helm is anchored by two 16-inch Volvo Glass Bridge 8616 displays, complete with GPS and GRID controller, presenting navigation information with clarity and presence. Volvo Auto Pilot is integrated directly into the Glass Bridge and works in concert with the Volvo Assisted Docking System, which includes Volvo DPS (Dynamic Positioning System), while a dedicated Volvo 7-inch engine display, fed from the engine battery bank, keeps essential propulsion data instantly readable. The navigation package comprises a Garmin AIS 800 Transceiver paired with a GA 38 GPS/GLO NASS antenna and internal VHF aerial splitter, a Garmin GMR Fantom CHIRP 54 open array radar mounted on a Seaview bracket delivering 72 nm capability, and a Garmin GSD 25 CHIRP sounder matched to a GT51M-THP ClearVü/SideVü 500W transducer plus a conventional 600W transducer. Connectivity is assured via the Starlink satellite internet system, and CZone is configured for iPad connectivity with programming and a Wi-Fi interface (iPad not included). Practical luxuries include wireless device chargers at the master cabin bedside on both port and starboard, a wireless remote for the Glendinning Cablemaster, and SIONX Night vision for enhanced situational awareness.

Propulsion & performance

Twin Volvo D8 IPS 800 diesel engines, each rated at 600 hp, deliver lively acceleration and economical cruising, while the Volvo Interceptor System—managed from the manual helm—provides refined trim and ride control. Close-quarters handling is effortless thanks to the Side-Power SEP100 proportional bow thruster with its dedicated helm controller. Reliability for both engines and generator is reinforced with dual-configuration fuel filters

and water separators. Anchoring capability is enhanced by an additional 30 m (98 ft) of chain for a total of 80 m (262 ft), paired with a 35 kg (77 lb) stainless-steel Ultra anchor to ensure secure holding. The systems specification also includes the ES-125 ElectroStrainer, full water-maker preparation accommodating an 800 GPD unit, and CZone programming with a dedicated power circuit and cable plus a through-hull connection for seamless integration.

Stabilization & systems

Motion aboard is quietly controlled by a Seakeeper 6 gyro stabilizer, while onboard electrical generation is provided by a Kohler 16.0 kW generator (110 V/60 Hz) equipped with a muffler, fresh-water cooling, sound shield, remote start/stop, built-in diagnostics and an hour meter registering under one hundred hours. A refined power management system handles distribution throughout the yacht, and mission critical services are backed by a secondary DC fresh water pump with independent switching for reliable redundancy. Climate control in demanding environments comes from a tropical air conditioning package consisting of one 30,000 BTU unit and two 12,000 BTU units, and energy reserves rest in a lithium ion house battery bank made up of four 24 V, 100 Ah batteries (400 Ah total, 280 Ah usable), all supported by a two year limited battery warranty.

Exterior & deck

Designed for luxurious al fresco enjoyment, the cockpit sits beneath a fixed awning whose forward section of yacht-acrylic incorporates quarter-panel Strata glass clears to port and starboard, preserving panoramic sightlines while providing shelter. An awning camera is discreetly mounted on the stainless-steel rail and is supported by Garmin GC 200 IP infrared dome

cameras that keep both the cockpit and the engine-room under watch. The foredeck is appointed with Hella Easy Fit Blue lighting, four fittings per side, while below the waterline twin-tone Lumitec SeaBlaze X2 blue/white fixtures are complemented by three transom underwater lights to produce a striking nocturnal presence. A teak-laid swim platform is matched with two removable U-shaped stainless-steel swim-platform rails featuring a central mid rail for secure boarding, and a port-side stainless-steel transom gate simplifies access. Socialising is effortless around the folding teak cockpit table, set on a fixed pedestal with integrated drinks holders and protected by a white Stamoid cover, and additional fixed transom cleats assist with line handling. The profile is elegantly finished with a boot stripe that traces the chine line at the bow and a backlit Riviera "R" emblem accompanied by 3 mm stainless-steel Riviera lettering, all presented on a custom-painted hull sealed with Yacht Armor.

Cockpit & outdoor living

The cockpit presents an atmosphere of understated luxury, appointed with upgraded Sunbrella lounge upholstery that elevates comfort under sail or at rest, while the transom lounge is set apart by Riviera's signature "R" logo embroidery and shielded by a white Stamoid cover for protection and pristine presentation. Forward on the foredeck, the sun-pad also features upgraded Sunbrella upholstery, marrying long-lasting performance with refined aesthetics. Entertaining and longer voyages are made effortless by a port-side refrigerated cool box with 12V DC plate, and surfaces throughout the galley, cockpit and heads are finished in solid-surface bench tops that combine resilience with an elegant appearance. Additional transom storage and thoughtfully integrated amenities further enhance practical use, ensuring every outdoor moment is as seamless as it is sophisticated.

Interior & accommodation

A sophisticated three-stateroom arrangement, which includes a dedicated port cabin, is presented in exquisite walnut joinery finished with a high-gloss varnish, creating an atmosphere of restrained elegance throughout. The full beam master suite is appointed with electric roller blinds for effortless privacy, while the remaining staterooms are fitted with manual roller blinds. The forward VIP stateroom is comprehensively equipped for comfort and entertainment with a 24" LED TV, an all in one stereo and integrated Bluetooth/AM/FM speakers, ensuring an immersive experience whether at anchor or underway.

Natural light and shading are easily controlled by electric saloon side roller blinds, complemented by a manual rear saloon bulkhead blind, and the saloon lounge may be upholstered in your choice of fine leather or durable Sunbrella fabric. Enhanced cockpit lounge and foredeck sun pad upholstery elevate the onboard relaxation experience, while the bespoke bedhead and bed surround upholstery with bedside inlays add a tailored touch to each cabin. The Soft Furnishing Package completes the refined interior with fitted bed linen, pillowcases, bedspreads and scatter cushions. Practicality is addressed with premium separate stacked washer and dryer units, a safe installed in the hanging locker and a Dyson Multi Floor cordless vacuum with detachable long reach wand and charging station for effortless upkeep.

Galley

The galley is appointed with solid-surface bench tops, featuring a waterfall counter that flows into a matching solid-surface termination to complement the chosen bench top scheme. A drawer-style dishwasher is installed in place of the pot drawer, accompanied by a comprehensive galleyware package to keep utensils and essentials neatly arranged. Rich walnut timber joinery

provides a warm, sophisticated interior finish, while hard-wearing vinyl flooring runs seamlessly through the saloon and galley, along the stairs and down the companionway.

Entertainment

A generous Entertainment Package, elevated by the Tier Two Entertainment Upgrade, redefines onboard leisure as effortless refinement, while Starlink satellite internet keeps guests reliably connected even when far from shore. The forward VIP stateroom is appointed with a 24-inch LED TV paired with an integrated stereo system, delivering a cinema-like picture and rich, room-filling sound that enhances every moment aboard.

Heads & finishes

A meticulously selected white bathware package is complemented by solid-surface Corian bench tops and Corian heads flooring, while the interiors are unified with premium two-pack paint finishes applied throughout. The composition is completed by a striking white hull finish that radiates classic refinement and delivers long-lasting resilience.

Additional equipment & features

A substantial anchor upgrade equips the yacht with a 35 kg (77 lb) stainless-steel Ultra anchor and an extra 30 m (98 ft) of anchor chain to ensure secure holding. Handling and ride control are refined by interceptors fitted with both manual helm and joystick controls, mounted to GRP and shielded by canvas covers on port and starboard. Practical interior modifications include a port-side storage cabinet in place of the chaise lounge and port-side drawers that incorporate a top-loading hamper. The galley, cockpit and heads are

appointed with solid-surface bench tops for a seamless, upscale finish, while the master cabin provides bedside wireless charging to port and starboard. Safe circulation on the aft deck is aided by a transom stainless-steel gate, and shoreside connection is effortless thanks to a Glendinning Cable master with wireless remote. The yacht is plumbed for a watermaker and is protected externally by white Stamoid covers.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
