OVERVIEW

The Bertram 450 Convertible stands as a bluewater sportfish convertible that unites a time-tested deep V hull with the exacting demands of tournament anglers, yielding a yacht whose interior volume rivals vessels a class above. It carries the composure and polish of a luxury motor yacht while remaining unmistakably a working fishing platform and comfortable family cruiser, delivering confident seakeeping and a remarkably smooth, dry ride offshore. Inside, a flowing salon-galley-dinette sequence opens into an inviting, purposeful living space where relaxed downtime and refined entertaining coexist amid premium finishes and modern amenities. The guest stateroom is a distinguishing feature, arranged with side-by-side twin berths instead of the more common over-under configuration, and forward of the dinette an elevated cocktail perch provides a stylish social vantage unusual in this size. The companionway is intelligently laid out to accept a stacked washer and dryer for added convenience on extended passages.

Practicality below decks is equally prioritized: the machinery space is thoughtfully organized for straightforward access and service, with the centrally positioned fuel tank stabilizing trim as loads change while acting as an effective buffer to diminish sound and heat transmission to the forward accommodations. Clean routing and intentional placement of major systems simplify routine maintenance for owner/operators and crew, reinforcing the boat's tournament-ready reliability.

Having benefited from numerous upgrades and refinements, this flybridge sportfisher and convertible cruiser presents true turnkey appeal for offshore pursuits and refined coastal cruising alike. Trades considered.

DETAILED DESCRIPTION

Navigation equipment

At the helm an advanced autopilot works in concert with a precision compass, a clear multifunction display and electronic engine controls with a rudder angle indicator and odometer to keep you completely in command, while deep water intelligence comes from a CHIRP capable depth sounder paired with a dedicated sonar. Plotting and positioning rest with two multifunction GPS/chartplotter units, one twelve inch and one sixteen inch, augmented by a third twelve inch GPS display in the cockpit and a chartplotter with a GPS antenna for full redundancy; communications are handled by a DSC capable VHF together with an additional VHF radio, and a radar with a forty eight nautical mile range, installed new in 2025, scans the horizon with authority, all complemented by a comfortable co pilot seat that completes this capable navigation suite.

Staging and technical

Anchoring is managed by a thirty kilogram stainless steel anchor riding on one hundred metres of ten millimetre stainless chain, driven by a 1500 W electric windlass, while bow winches and a powerful bow thruster simplify close quarters manoeuvres. Electrical resilience includes new 2022 engine and service batteries and a 24/60 3 all in one battery charger (24 V/60 A) installed in 2022, with a shorepower connector ready to feed onboard systems. Safety and bilge management are comprehensive, with a bilge alarm, three electric bilge pumps, an engine alarm, an automatic fire extinguishing system and a fume/gas detector, all backed by a clear horn. Trim and ride are refined by electric trim flaps and stabilizer fins fitted new in 2025, while deck comforts extend to courtesy lights, a deck shower, a cockpit washbasin, a broad bathing

platform with a swimming ladder and a carbon T Top on an aluminium structure, also added in 2025, complemented by underwater lights installed the same year. Daily life aboard benefits from a proper entry door, a foldable table in the living room, a draining system, a water pressure pump, a waste water purifier plant and a harbour water connector system that keeps tanks topped up with ease.

Domestic Facilities onboard

Comfort on board is assured by air conditioning and a heating system, with elegant interior wooden flooring underfoot and 220 V outlets throughout. The domestic plant features an eighty litre stainless warm water system, a black water tank with a dedicated waste water treatment plant and two electric toilets. Power autonomy is supported by an inverter 2500 V installed new in 2022, while a watermaker added for 2025 delivers 110 litres per hour to keep fresh water flowing wherever you roam.

Entertainment

Onboard entertainment is anchored by a marine stereo system with speakers tuned for open water acoustics, while the yacht is fully TV ready and boasts a new fifty inch television in the salon fitted in 2025 to elevate movie nights and big match moments.

Fishing Equipment

For serious trolling the cockpit was fitted in 2025 with outriggers — lateral pairs plus a central unit — transforming the aft deck into a focused game fishing command centre and readying the yacht for tournament level angling.

Kitchen and appliances

The galley is culinary ready with a two burner hob alongside a two burner electric hot plate, a refrigerator paired with a freezer and an ice maker to keep drinks perfectly chilled, while a power grill microwave streamlines quick meals and a washer dryer, new in 2025, lightens life on extended cruises and keeps wardrobes fresh.

Upholstery

Upholstery and soft goods are curated for life at sea, with blackout curtains ensuring tranquil nights, generous bow cushions inviting sun lounging, protective covers guarding the cockpit, seats and instruments, and mosquito nets that welcome the breeze while keeping pests at bay.

Additional Information

Additional aboard refinements include a tridata instrument, trim flaps and smooth response electric throttles. In 2022 the bow thruster batteries were renewed, complemented by two sixty amp equalisation batteries, while LED interior lighting and a centralized vacuum bring modern convenience. Practical touches such as a cockpit sink and ready made provisions for installing a washer and dryer underscore the yacht's thoughtful, future proof design.

Works 2024

In 2024 the yacht received a total polishing of hull and superstructure, a fresh interior carpet and a complete repaint of the engine room; it also gained a new starboard side leather sofa and a tasteful recovery of the living room upholstery to present an inviting, like new ambience.

Works 2025

The 2025 programme elevated both capability and style: a new flybridge bimini and refreshed cockpit sunshade and upholstery were added, stabilising fins were installed, the hull was repainted in Ethereal Blue and a solid teak transom nine millimetres thick was crafted. Navigation and visibility were strengthened with an additional twelve inch multifunction display in the cockpit, eighty watt underwater lighting, a T Top with an aluminium structure and a carbon fibre top finished with a new clear enclosure, a radar with a forty eight nautical mile range and halogen cockpit floodlights, and a satellite internet antenna. Handling and angling upgrades included a remote manoeuvring system and power outlets for electric fishing reels. Fishing hardware rose to tournament specification with forty foot outriggers, a central twelve foot outrigger and two added vertical rod holders. Machinery and electrical improvements comprised a new watermaker producing one hundred litres per hour, four new batteries rated at 285 Ah each, a dedicated 100 A charger for bow thruster and generator batteries and two autoclaves, while the main engines had their heat exchangers removed and cleaned and their injectors professionally serviced. Interior fit and finish were upgraded with solid surface worktops in the galley and top bar featuring scratch resistant surfaces, and the running gear benefitted from dynamically balanced propellers in 2026.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
