OVERVIEW

SERO, a 2023 Pardo 50 measuring 16 meters (53 feet), stands as the crowning model of Pardo's walkaround collection, blending Italian styling with considered engineering. Her reverse bow and deep-V hull deliver a lively, assured ride that is further refined by a Seakeeper gyro, while Volvo IPS pods with joystick docking render close-quarters handling intuitive and precise. Carefully maintained by an experienced owner and presented in exemplary condition, she benefits from an engine warranty valid through October 2026. The single-level walkaround deck and generous freeboards, shaded by a 16 sqm carbon-fiber T-top, establish a secure, versatile dayboat platform that is enhanced by an outdoor galley, a dining area with an electric hi-lo table and expansive sunpads both fore and aft. Clever storage solutions include a tender garage sized for a Williams 285, and the hydraulic swim platform is configured to carry a jet ski while simplifying access to the water. Below decks an airy owner's cabin with an open-plan double berth is paired with a versatile guest cabin that converts between twin and double layouts, each served by its own private head—an elegant express cruiser perfectly suited to chic weekend escapes and spirited coastal cruising.

DETAILED DESCRIPTION

Stern & swim platform

A submersible swim platform finished in synthetic teak creates an elegant waterside extension, equipped with a deployable ladder and reinforced mounting points to accommodate a tender or wave runner. Immediately forward, a centrally positioned tender garage featuring an integrated track system and crane facilitates smooth launch and recovery. Shore power receptacles and the garage controls are conveniently located to port, while a removable stand-up shower to starboard provides an easy rinse after time in the sea.

Main cockpit & social area

Conceived as the vessel's entertaining nucleus, the cockpit presents a generous U-shaped settee that envelops a high/low, expandable teak table, offering both formal dining and relaxed lounging configurations. A bespoke upholstered pad allows that table to be transformed into a large ottoman complete with four integrated drink holders, creating a versatile centerpiece for socializing. To starboard an outdoor kitchen is fitted with a two-burner cooktop, a sink with pressure water, a refrigerator, an ice maker and a trash receptacle, while to port a dedicated bar cabinet provides secure storage for glassware. For added comfort, an electric retractable black fabric sun awning extends from the aft end of the hardtop to cast generous shade over the entire social area.

Bow & foredeck

The bow is appointed with a forward-facing sunpad flanked by two

upholstered bench seats and a removable pedestal table, together composing a refined, sociable lounging retreat. Concealed beneath a flush bow hatch, a Quick windlass works in tandem with a 77 lb Bruce stainless steel anchor to provide confident, effortless anchoring while maintaining a sleek, unobtrusive profile.

Master suite (forward)

Bathed in natural light, the forward master unfolds as a contemporary retreat clad in light-colored synthetic wood and centered on a queen island berth. Storage has been carefully designed with a hanging locker, under-berth drawers and dedicated cabinets for dishware and silverware, while a Samsung TV on a tilt bracket and a nearby Whirlpool microwave provide discreet entertainment and convenience. Private access to the ensuite head reveals a stall shower fitted with a rain-head faucet and a Techma electric toilet, creating a space that seamlessly combines luxurious comfort with practical refinement.

Guest cabin and foyer (midship)

Situated to starboard, the midship guest cabin offers twin berths flanking a central nightstand, accompanied by a hanging locker and direct ensuite access to the guest head, creating a discreet and practical private retreat. Adjacent to this suite, the day head is thoughtfully arranged to provide convenient entry from both the guest cabin and the foyer. Crew accommodations include a dedicated captain's cabin reached via the cockpit, appointed with a single berth, air conditioning and a private head-and-sink combination for fully self-contained comfort.

Helm & navigation

The helm is appointed with three sumptuous upholstered bucket seats featuring flip-up bolsters, all sheltered behind a sculpted molded windshield and clear Eisenglass weather panels that preserve visibility in any conditions. The navigation suite is comprehensive, centered on two Garmin chartplotters and a Volvo engine display, with autopilot and VHF radio completing the electronics package. Precise handling and low-speed control are provided by a Volvo joystick, a powerful bow thruster, a Quick chain counter and a dedicated gyro control panel, giving the captain effortless command in tight situations. For enhanced safety and situational awareness an integrated camera system continuously monitors the engine room, the anchor and the underwater propellers.

Mechanical & electrical

Underpinning the yacht's performance are twin Volvo IPS 800 powerplants, covered by warranty through October 2026 to ensure confident handling and peace of mind; electrical demands are supplied by a Kohler 16EKOZD generator providing 120/240 volts at 63 amps, and a Climma AC chiller system offers discreet, refined climate control throughout every cabin, including the captain's.

Additional specifications

Navigation and communications are entrusted to a suite of Garmin instruments that ensure confident passage-making: a Garmin AIS 800 works in concert with two Garmin GPSMAP units and a Garmin FANTOM DOME I 8X radar offering a 48-mile range, while course-keeping is managed by a Volvo AP Reactor 40 autopilot paired with Volvo Penta DPS. Voice and ship-to-shore

contact are handled through a Garmin VHF 315 with OHS 11 handset and an integrated depthsounder keeps you informed of what lies beneath. Onboard ambiance is curated by a Fusion BT/SAT/TUNER at the helm with a dedicated Fusion stereo remote in the master stateroom, and visual entertainment is provided by an LG TV in the aft stateroom and a Samsung TV in the master stateroom.

Power systems are designed for reliability and resilience, featuring QUICK 24 Volt/80 AMP and QUICK 24 Volt/15 AMP battery chargers alongside a VICTRON ENTERGY 12/24 Volt/35 AMP unit. Comfort is assured with onboard heating and two TECMA electric heads equipped with macerator technology.

Refrigeration is comprehensive and thoughtfully distributed with an ISOTHERM refrigerator to starboard of the helm, an ISOTHERM fridge with freezer in the cockpit, and two ISOTHERM fridge drawers beneath the aft seating, while a Seakeeper provides exceptional onboard stability underway.

Safety features

Assured serenity is woven into every detail, beginning with raised fiberglass-reinforced plastic (FRP) gunwales that deliver secure footing and added protection as seas rise. A comprehensive complement of visual distress signals ensures swift, regulation-compliant communication in an emergency, while strategically placed fire extinguishers are ready for immediate deployment. Sensitive bilge alarms provide early warning of any unwanted water ingress, and dependable navigation and anchor lights enhance visibility and operational safety from dusk till dawn.

Disclaimer

These particulars are provided in good faith by the company; however, no representation or warranty is given regarding the accuracy of the information

or the condition of the vessel. Prospective purchasers are urged to instruct their own brokers or surveyors to verify any matters they consider important. The vessel is offered subject to prior sale, amendment of price, or removal from the market without notice.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
