OVERVIEW

The 2019 Galeon 500 Fly flybridge motor yacht is a study in refined yachting, combining spirited performance, exceptional comfort, and forward-thinking craftsmanship. Twin Volvo Penta D11 diesel engines provide economical passagemaking while reserving ample thrust for more demanding passages. Galeon's Beach Mode drop-down terraces extend the living area to the water's edge, creating a seamless, waterside retreat and enhancing the vessel's connection to the sea. An aft-positioned galley promotes effortless entertaining by integrating salon and cockpit into one expansive social environment, and the interior's rich European joinery paired with broad wraparound glazing bathes the spaces in natural light while framing uninterrupted views. Accommodation comprises three cabins centered around a full-beam owner's suite, complemented by aft crew quarters, and the layout is equally appropriate for weekend escapes or extended cruising, offering a flexible arrangement, intelligent storage solutions, and meticulous attention to detail.

DETAILED DESCRIPTION

Key features

Refreshed in August 2026 with all exterior upholstery replaced, this yacht redefines alfresco living by incorporating a beach mode and fold down side decks, while a hydraulic platform with a retractable ladder enhances access to the water. The accommodation is intelligently configured with three cabins and two heads, propulsion is provided by Volvo Penta D11 powerplants driving straight shafts, and a SeaKeeper 6 gyro stabilizer delivers superior seakeeping and comfort both underway and at rest.

Beach mode

At the press of a button the bulwarks on each side fold away to reveal expansive teak platforms, extending the yacht's beam from 14'8" to nearly 20' and instantly enlarging the open-air deck. Each fold-down balcony is tailored to the galley arrangement: to port a convertible bar with an alfresco tabletop adjoins the galley for seamless service between interior and exterior, while to starboard a low waterside lounge seat sits just a few feet above the sea, inviting languid moments of contemplation. Conceived for flexibility, Beach Mode melds with the aft appointments so the entire aft deck becomes a vibrant center for leisure. A rotating cockpit bench turns a full 360°, allowing guests to face the salon, the horizon, or the side terraces, and a hydraulic high-low swim platform with integrated steps descends smoothly for swimming, boarding, or launching water toys. Large glass doors slide open to join the salon and cockpit, and with the side balconies lowered the whole aft section opens up into a generous entertainment arena that harmonizes interior refinement with alfresco living.

Accommodations

The VIP stateroom is appointed with a queen berth and a private en-suite bath, sleeping two guests and bathing the space in natural light through overhead and side windows that frame majestic vistas. A guest stateroom with twin bunks sleeps two and serves as a cozy retreat for family or friends. The master stateroom, notable for its fuel beam, features a queen berth, en-suite bath, and a comfortable settee with a vanity, all set against generous sweeping windows that flood the suite with daylight and ocean views, and it sleeps two. Crew quarters, accessed privately from the stern, sleep two and include a head and shower for added convenience.

Equipment

Thoughtfully appointed for both comfort and entertaining, the galley is fitted with a convection oven, an AC grill complete with extractor, and a dishwasher, while the Master cabin benefits from the convenience of an integrated washer/drier. The flybridge is conceived as the vessel's social centerpiece, boasting a wet bar with an icemaker alongside a dedicated AC grill, and the salon elevates onboard living with an HD television on a lifting mechanism, complemented by additional HD TVs in the VIP and Master cabins.

Shore-power management is made effortless by an integrated Cabledmaster, evenings are beautifully illuminated by two underwater lights, and climate control in the tropical specification is provided by Dometic air conditioning with two chillers producing a combined 60,000 BTU. The Beach Mode Package broadens the leisure experience with fold-down deck balconies and aft sliding windows, and days afloat are further enhanced by a hydraulic swim platform complete with a retractable ladder and a rotating aft seat.

Mechanical

At the heart of the yacht are twin Volvo Penta D11B1 engines, each producing 670 hp for a combined output of 1,340 hp, offering effortless power and refined performance. A Cummins Onan diesel generator supplies reliable onboard electrical power, while Side-Power bow and stern thrusters deliver precise control for docking and close-quarters maneuvering. Guest comfort underway is enhanced by a SeaKeeper 6 gyro stabilizer that markedly reduces roll, and routine upkeep is current—an oil change for both the engines and the generator was completed on 12/25.

Electronics

Both the main helm and the flybridge are outfitted with Raymarine Axiom chartplotters in twelve-inch and ten-inch configurations, presenting remarkably sharp, intuitive navigation displays. Seamless communication is provided by the Raymarine VHF RAY91 and precise course-keeping by a Raymarine autopilot, offering confident control in every condition, while a premium Bose sound system fills the salon with rich, immersive audio.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
