OVERVIEW

Introducing the Absolute NAVETTA 52 (2024) "Pearl 1", a nearly new flybridge motor yacht berthed in Marmaris, Turkey, that marries semi-displacement efficiency with contemporary Italian design. Purpose-built for extended family cruising and gracious onboard living, this 15.90 m vessel with a 4.65 m beam impresses with generous internal volumes, elegant proportions and a carefully considered layout. Lightly used, charter-free and retained by a single owner since delivery, she is presented in turnkey condition and ready to sail without delay.

Her drive system comprises twin Volvo Penta D6-IPS650 units rated at 2 x 470 HP (940 HP combined), delivering refined acceleration, exceptional maneuverability and low vibration suited to a premium family yacht.

Maneuvering is further enhanced by hydraulic bow and stern thrusters with proportional control available from both the main deck and flybridge helms, and the yacht has been prepared to accept a Seakeeper gyroscopic stabilizer in future. With a 2,000 L fuel capacity and 600 L fresh water capacity, Pearl 1 offers the autonomy expected of a long-range cruiser. The mechanical fit-out is comprehensive and thoughtfully engineered, anchored by a 17.5 kW generator (230V-50Hz) fitted with fume and water separators and a Racor pre-filter, a 2,500 W inverter and extensive LED illumination across decks and the flybridge for efficient, user-friendly operation.

The exterior living areas are designed for convivial entertaining and relaxed cruising. The flybridge is sheltered beneath a fiberglass hard top with an electro-openable soft section, a microfiber ceiling and integrated LED mood lighting, while a fully equipped wet bar—including icemaker, refrigerator and BBQ—anchors the space alongside multiple ecru sunpads and seating for more than eight guests. A bow lounge finished in pearl-grey upholstery features reclining backrests for lazy afternoons at anchor. Teak decking runs

continuously from the foredeck along the side decks to the aft cockpit and flybridge, creating a seamless, elegant deckscape. A hydraulic swim platform with a solid teak surface and a 400 kg lifting capacity, complete with swim ladder, doubles as a watersports staging area and tender berth for up to a 14.5' tender with a 50 HP outboard. Boarding is made graceful by an electro-hydraulic retractable stainless-steel passerelle with a teak walkway and handrail, while fresh-water deck wash outlets are positioned fore and aft. Outdoor speakers in the cockpit and on the flybridge enhance the ambiance, and canvas elements include the flybridge's electrically opening soft top. There is no Jacuzzi or tender crane installed, preserving clean profiles and deck space, and a dedicated aft garage provides stowage for water toys.

Inside, finishes convey quiet luxury: sand-grey durmast oak floors, warm walnut joinery and marble-topped bathrooms create a tactile and refined atmosphere. The main salon adopts an open-plan arrangement with expansive glazing, generous seating and a dining area for six to eight guests, complemented by a discreet TV lift and ready AV connections. Hospitality is supported by a chilled icebox and a wine cooler (50/60 Hz), while the galley is specified to residential standards and includes a dishwasher and additional icemaking capacity at the flybridge bar to keep service effortless.

Accommodation is laid out for privacy and comfort. A full-beam owner's suite is bathed in natural light from panoramic windows and features a walk-in wardrobe, a quiet study nook and a marble-appointed en-suite. Two lower-deck guest cabins can be arranged as twins or doubles and each enjoys an en-suite finished in marble or walnut accents. A fourth aft cabin increases flexibility with a wall bed, walnut furnishings, wardrobe, separate WC, hard-wearing HPL flooring and its own independent climate control.

Entertainment provision is made in every cabin, and a separate forward crew cabin with independent access supports professional operation and discreet service.

Navigation and systems support both owner-operators and professional crews with an advanced, intuitive package that includes an AIS B Class transceiver, VHF with DSC, integrated GPS and Volvo EVC autopilot control, plus a second Volvo EVC touchscreen at the flybridge helm. The hard top is pre-wired and radar-ready for a solid-state antenna, and cameras in the engine room and cockpit extend situational awareness. Proportional thruster controls are duplicated at both helms and climate comfort is assured by a tropical 50 Hz split air-conditioning system throughout the yacht, with the aft cabin served by an independent unit.

The Absolute NAVETTA 52 unites the presence of a compact superyacht with the practicality of a premium cruiser: teak underfoot where it matters, considered storage for toys, freshwater wash points in the right places, layered lighting to enhance mood and robust systems specified for international cruising. With refined exterior lines, well-balanced volumes and high-quality materials from walnut joinery to marble counters, "Pearl 1" is a compelling choice for those seeking an elegant, seaworthy flybridge motor yacht with true range and comfort. Offered in immaculate, turn-key condition and available immediately, a full photo and video package can be provided on request, and purchase may be completed securely using cryptocurrency, including Bitcoin, USDT, ETH and other major coins.
