OVERVIEW

The Solaris Power 60 Coupé, arranged with three cabins plus a dedicated crew cabin, marries refined Italian styling with genuine offshore capability. Its sharp deep V running surface and pronounced flared bow are conceived to deliver superb seakeeping, steady behaviour both underway and at anchor, and efficient performance whether slipping along in displacement or rising onto a plane. The hull and propulsion were developed in conjunction with Volvo Penta, resulting in exceptionally quiet, low vibration passages and effortless handling—attributes that define a luxury motor yacht, an express cruiser, and a performance sports cruiser alike.

On the main deck a generous, highly adaptable saloon and dinette unfold beneath an opening sunroof, while powered side windows and a wide aft door create a breezy, open connection from helm to cockpit. A pantograph side door and a side access door beside the helm streamline sightlines and communication for close quarters manoeuvres in port. Practicalities are thoughtfully placed: an L shaped galley sits just steps from the exterior dining area to facilitate service, and the yacht can be specified with an optional day head on this level, enhancing versatility for Mediterranean cruising and bluewater passages characteristic of a hardtop coupé.

This particular example is finished to a commanding specification, notably upgraded to twin Volvo Penta D13 IPS 1350 engines and augmented by a bow thruster for nimble handling. Decks are laid in teak with black seams, and the superstructure features an electric sliding roof and the opening windows suite. Underwater illumination and a hydraulic stern tender lift with automatic ladder add to the on water experience, while a tender launching system with rollers and electric winch simplifies beach and marina operations. Autonomy is extended by a watermaker, an updated 18 kW generator, and additional batteries, and comfort is assured by tropical spec air conditioning plus

separate crew cabin air conditioning; the crew cabin itself is fitted with its own bathroom.

Navigation and onboard entertainment are elevated by a third Volvo 16 inch display, radar, AIS, a satellite TV antenna, and Garmin Mediterranean cartography. Interior conveniences include a washer/dryer, wine cooler, dishwasher, coffee machine, safe, and an upgraded teak tone finish suited to premium cruising.

Further refinements complete the package: black antifouling with a painted black waterline and PropSpeed treatment, comprehensive custom paintwork across hull, superstructure and deck surfaces, retractable cleats on the aft platform, a dock water inlet, a digital chain counter, a stainless steel anchor, an electric searchlight, cockpit storage cabinetry, a full covers package, and sun awnings forward and aft. Beautifully curated, this high spec Solaris Power 60 Coupé encapsulates elegant Mediterranean style and serious capability, distinguished by a rare breadth of factory options and poised long range performance.
