OVERVIEW

2023 Leopard 53 Powercat — MASTER CONCEPT 3

MASTER CONCEPT 3 is an exquisitely appointed 2023 Leopard 53 power catamaran, prepared and upgraded for economical, owner-operated passagemaking. Delivered with an extensive package of factory options, she has received a number of thoughtful, high-value enhancements, including a substantial lithium house bank, six 470-watt solar panels paired with an MPPT regulator, a protective hull rub rail and a removable turquoise hull wrap, Starlink satellite internet, a watermaker, Yacht Controller and other practical additions. Having just completed her scheduled annual service and a fresh bottom job, she presents as a truly turnkey cruising motor yacht. The Leopard 53 Powercat combines the voluminous living spaces and inherent stability of a contemporary power catamaran with a relatively shallow draft and notable efficiency. Twin Yanmar 370 HP diesel engines driving straight-shaft propulsion provide a simple, reliable drivetrain perfectly suited to extended coastal or bluewater cruising. This example is the sought-after three-cabin Owner's Version, with the entire starboard hull devoted to a private owner's suite and two refined guest staterooms situated to port.

DETAILED DESCRIPTION

Notable features and upgrades

Powered by twin Yanmar 370 HP diesel engines with straight-shaft drives, this yacht pairs assured performance with extended self-sufficiency courtesy of a lithium battery bank and an integrated solar array of six 470W panels delivering roughly 2.8 kW of total solar output, all regulated by an MPPT solar charge controller and supported by a 3000W inverter. Confident handling is available through a Yacht Controller for remote docking together with a bow thruster, while commanding the vessel is effortless from either the upper or lower helm stations. True long-range independence is reinforced by a watermaker producing approximately 16.6 GPH, Starlink satellite internet, a retractable shore-power cord, recent annual maintenance, and a fresh bottom job (October 2026). Exterior enhancements include a removable turquoise hull wrap that shields the original finish beneath, an upgraded protective hull rubrail, a flybridge isinglass enclosure, a tender lift, high-definition radar, AIS, and a searchlight. Interior and entertaining amenities have been thoughtfully upgraded with electric salon blinds, a full-size galley refrigerator, a dishwasher, and a washer/dryer combination, while the flybridge is outfitted with its own refrigerator, ice maker, electric grill, and a generously sized storage/cooler. Deck layout is designed for relaxed socializing with a foredeck lounging area featuring adjustable backrests and direct salon access, and the three-stateroom Owner's Version reinforces the yacht's ample accommodations and true liveaboard capability.

Designed for cruising

The aft cockpit is designed as an unusually generous entertainment area, anchored by a solid wood dining table that comfortably seats six or more, with

ample storage concealed beneath the fixed settees. Immediately aft, a hydraulic tender platform makes stowing the tender simple and provides effortless access to the water.

A signature element of the Leopard 53, the flybridge complements the upper helm with a spacious dining and lounging precinct and an outdoor galley equipped with a refrigerator, ice maker, and electric grill. An isinglass enclosure increases the comfort and usability of this space as weather conditions change.

Below, the main salon feels open and luminous thanks to generous headroom, sweeping panoramic windows, and abundant natural light. The galley is arranged for true cruising functionality, while aftermarket electric blinds add privacy and convenience. A full lower helm presents a protected alternative to the flybridge, and a forward salon door opens straight onto the foredeck lounging area.

MASTER CONCEPT 3's upgrades are deliberate and practical: the addition of lithium batteries paired with nearly 2.8 kW of solar meaningfully extends the yacht's ability to operate off shore power when air conditioning is not in use. A newly fitted rubrail shields the hull at docks and pilings, and a removable turquoise wrap gives the yacht a distinctive look while preserving the original finish beneath. For an owner seeking a late model Leopard 53 that has been thoughtfully optioned, upgraded, and prepared for extended cruising, MASTER CONCEPT 3 deserves close consideration.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
