OVERVIEW

This is the final Summit available from the celebrated Kadey Kroger yard, a luxury flybridge motor yacht built on a Michael Peters hull engineered for exceptional planing efficiency; she runs fast and flat and resists slamming in a chop while remaining composed at slow speeds, further stabilized by a Seakeeper gyro. The flybridge is expansive and reminiscent of a 75 foot yacht's club lounge, appointed with a full upper helm, retractable sunshades and abundant sun pads, and the vessel was conceived by the builder for the 2025 show season and never titled to a private owner, making her essentially new. Factory warranties will convey, the interior has never been lived in and galley appliances—the stove, oven and grills—remain unused, and she has only cruised for the 2025 circuit from Newport to Annapolis and onward to Florida; she now awaits a new owner at a compelling price.

Thoughtfully configured for both entertaining and serious cruising, the yacht features a pass through galley that opens to the aft deck via a broad opening window, an extended flybridge with seating for up to twelve, and a hydraulic swim platform that enables one touch tender and jet ski launch as well as effortless water access. Onboard systems include Seakeeper stabilization and C Zone whole boat electronic switching with user programmable modes for Cruising, Dock, Anchor and Away, delivering a performance cruiser that prizes comfort and style. Fresh photography will arrive next week, and a recent survey is available upon request.

DETAILED DESCRIPTION

Overview

The Summit 54 Flybridge has been conceived so the whole family can luxuriate in the open air and the sea, featuring a genuine single-level flow that leads from a generous aft cockpit straight through an open-plan galley and saloon, keeping everyone together rather than separated by levels. Broad side decks sweep forward to a sunlounge and a bowside bench that comfortably seats at least six, and a short stair brings you to the flybridge, which is also laid out on a single plane with sun lounges fore and aft and an L-shaped settee for six to eight. The expansive helm provides the captain with commanding sightlines and fully featured instrumentation while maintaining an easy connection to guests. Aft, an oversized hydraulic swim platform smoothly lifts and launches your tender, Jet Ski, grandchildren and dogs, making every moment on the water effortless. The result is a family-and-friends yacht that lives like a motoryacht and runs like a sportfish.

General

Ambient lighting is delivered by i2 Systems® LED fixtures operated through Vimar switches, beautifully paired with Quick® LED courtesy foot lighting and coordinating Quick® LED wall and reading lamps to create a refined, layered glow. Underfoot, Amtico® luxury marine flooring flows throughout the yacht, while a four-zone air conditioning system provides precise, bespoke climate control for each area.

Galley lounge

On the starboard side, an expansive settee with concealed storage beneath

creates an inviting salon for relaxed conversation, its cushions upholstered in Ultraleather® drawn from KKG's standard selections. A solid teak table with a fold-out top sits on an adjustable high/low base, effortlessly adapting from formal dining to cocktail service. The galley is finished with Silestone® ZEUS countertops and an Elkay® stainless steel sink paired with a Grohe® faucet. Warm walnut cabinetry houses a suite of refined appliances that balance style and performance: refrigeration and freezer capacity is provided by two Isotherm® units with double drawers, complemented by a Miele® convection microwave/oven, a Miele® cooktop, an Uline® icemaker and a Fisher & Paykal® dishwasher.

Helm deck

Upon stepping onto the helm deck you find a U-shaped settee to port with ample storage beneath the cushions, which are upholstered in Ultraleather® KKG standard selections for an elevated, tactile finish. A teak table with a fold-out top and an adjustable high/low base transforms easily from a casual cocktail surface to formal dining height. The space is refined by Silestone® ZEUS countertops and a walnut-clad electronics console, while a helm door to starboard provides convenient access to the exterior. Command is assured at the Stidd® helm seat, and visibility is preserved by three Imtra® windshield wipers complete with washers.

Owner stateroom

At the heart of the owner stateroom is a king-size berth with built-in drawer storage beneath, accompanied by an elegant vanity that doubles as a desk, complete with a mirror and dedicated LED fixtures. A generous hanging locker provides ample space to keep wardrobes perfectly organized, while an overhead dimmable LED array—operated through Vimar® switches—lets you

tailor the cabin's atmosphere with precision. The layered lighting scheme is completed by two Quick® wall fixtures, each finished with a tasteful shade to diffuse a soft, refined glow.

Owner head

The owner's head is outfitted with a Dometic® Master Flush toilet featuring an integrated status panel, accompanied by a molded fiberglass shower enclosed by a tempered glass door and Silestone® ZEUS countertops that cradle a Kohler® sink. A dedicated ventilation fan preserves comfort below, while refined Grohe® fixtures bring a polished feel to every touchpoint. A vanity with mirror and built-in LED lighting provides a luminous, elegant grooming area, and overhead LED illumination is controlled through tasteful Vimar® switches.

VIP stateroom

Anchored by a generous queen berth, the VIP stateroom unfolds as a tranquil sanctuary where refined finishes and intelligent design converge. Beneath the berth, storage is discreetly integrated and accessed with ease thanks to pneumatic lift struts that elevate the platform to reveal generous additional space. A dedicated hanging locker ensures garments remain neat and ready for any occasion. Ambience is carefully controlled by overhead dimmable LED lighting operated through elegant Vimar® switches, while individual Quick® LED reading lights deliver focused, premium illumination for quiet reading or late-night comfort at sea.

Guest head (ensuite access to VIP)

Connected directly to the VIP stateroom, this tranquil guest head combines refined materials and thoughtful systems: a Dometic Master Flush toilet with

status panel sits alongside a molded fiberglass shower sealed by a tempered glass door. Silestone ZEUS countertops support a contemporary vessel-style sink while premium Grohe fixtures provide a polished finishing touch. A dedicated ventilation fan preserves comfort, and a vanity with mirror and integrated LED lighting enhances daily routines. Overhead LED illumination, operated by Vimar switches, completes the crisp, modern atmosphere.

Guest stateroom

The guest stateroom is designed as a tranquil retreat, where a convertible settee and an accompanying dedicated table glide from an elegant lounge setting into a comfortable additional berth with effortless grace, while a generously sized hanging locker keeps clothing and essentials impeccably stored; overhead LED lighting, thoughtfully controlled by refined Vimar switches, provides an efficient, welcoming illumination, and a discreetly integrated Asko washer/dryer adds practical support for extended cruising.

Flybridge

The flybridge is crowned by a radar arch that neatly incorporates the masthead, steaming and deck lights, while a tinted plexiglass windscreen offers sheltered visibility in changing conditions. The helm is appointed with a Stidd® chair for secure, confident control, and a Steelhead® davit is fitted for effortless tender handling; a built-in Isotherm® refrigerator keeps drinks and refreshments perfectly chilled. An L-shaped settee to port surrounds a polished teak table for leisurely entertaining, with a generous sun/lounge pad forward for relaxation. All seating and sun pad surfaces are finished in marine-grade Sunbrella® upholstery, selected from the KKG standard range for lasting comfort and refined appearance.

Bow

At the foredeck a generous sun lounge pad and an inviting bow seat provide an elegant spot for relaxation, while a robust bowsprit with anchor roller carries a Norestar stainless steel anchor for serious ground tackle. Anchor handling is effortless thanks to a Maxwell VWCLP 1500 windlass running on 24-volt DC and spooled with 300 feet of 3/8-inch HT chain, and a dedicated ShurFlo anchor washdown keeps the rode and deck quickly refreshed.

Aft deck

The cockpit, laid in teak decking, offers an inviting U-shaped settee that wraps around a solid teak table, the cushions crafted in Marine Grade Sunbrella® from the KKG standard selection. A neatly integrated bar counter with a pass-through service window to the galley is paired with two stainless steel bar stools upholstered in standard Sunbrella®, while overhead LED lighting provides selectable blue or white illumination to create the perfect ambiance. The expansive swim platform is appointed with a swim ladder, two folding cleats and stern staples to ensure safe and convenient waterside access. Practicality continues aft with a lazarette access hatch complete with ladder, a Scandvik® hot/cold fresh water transom shower and generous transom garage storage.

Machinery

The propulsion and onboard systems are built for reliable, effortless operation, beginning with twin Cummins QSB6.7 engines producing 542 hp at 3300 rpm, each paired to ZF Marine ZF286A gearboxes with a 2.21:1 reduction. Power is transmitted through twin Aquamet 22 shafts measuring two-and-one-quarter inches in diameter to twin bronze Hung Shen four bladed propellers, each 26

inches in diameter with a 28 inch pitch. Vessel attitude and efficiency are refined by a ZipWake Dynamic Trim Control System, while quiet, dependable ship's power is supplied by a Northern Lights generator with sound shield rated at 12KW. Flooding protection is provided by three Rule bilge pumps, each capable of 3,700 gallons per hour and backed by a high water alarm. Control and monitoring are intuitive through Cummins SmartCraft controls with two stations and two displays at each station. The engine room enjoys dedicated intake and exhaust fans equipped with moisture eliminators, and routine servicing is eased by a Reverso lube oil change system.

Electrical

The yacht's electrical estate is centered on a refined dual-voltage distribution panel supplying 110/220-volt AC and 12/24-volt DC power, employing digital switching managed via a responsive touchscreen interface for effortless command. Reliable engine starting is provided by Mastervolt AGM batteries arranged as two 12/190 units, while generator start is handled by a single 12/190; ship service is delivered as robust 24-volt DC from two 12/225 batteries wired in series. Power conversion and charging are entrusted to a Magnum Energy 2400-watt, 75-amp inverter/charger working in concert with a dedicated Mastervolt 60-amp battery charger, all protected by an ANG isolation transformer to ensure clean, stable current throughout the vessel. Domestic systems are equally elegant, featuring a Headhunter Mach 5 fresh water system and a Raritan water heater with a generous 20-gallon capacity. Comprehensive safety measures include Fireboy-Xintex CO detectors and a fully integrated Fireboy-Xintex fire detection network, with the engine room further secured by a Seafire suppression system. Close-quarters handling is effortless thanks to a SidePower bow thruster rated at 15 hp and operating on 24 VDC, giving confident control during every approach.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
