OVERVIEW

Available as the only VQ55 currently offered on the world market, HIGH ENERGY is a 2024 Vanquish VQ55 — a pedigreed Dutch-built luxury motor yacht and open performance dayboat, hand-finished with meticulous craftsmanship. Designed for captains who demand exceptional seakeeping and uncompromising structural strength, this model combines a sculpted hull and engineered rigidity to inspire confidence. Underway she delivers a taut, highly responsive ride with precise tracking and composed poise through changing sea states.

DETAILED DESCRIPTION

Description

The sole VQ55 currently offered on the global market, HIGH ENERGY will be presented at the Palm Beach International Boat Show 2026 from March 25 to 29. This 2024 Vanquish VQ55, built in the Netherlands with exacting craftsmanship, embodies a performance pedigree aimed at discerning owners who demand exceptional ride quality and uncompromised structural integrity; she delivers a solid, responsive feel with precise tracking and composed behavior across a variety of sea states. Her hull and deck are engineered to balance strength with weight efficiency, yielding confident handling, economical cruising and robust top-end capability, while a purpose-designed helm provides unobstructed sightlines and instinctive control. The deck arrangement prioritizes natural flow, safe footing and thoughtfully sited social zones without diminishing practicality. Below decks, the fit and finish reflect a restrained, modern European aesthetic rendered in durable, contemporary materials appropriate for comfortable overnight use, and HIGH ENERGY is presented turn-key and in exceptional condition. Propulsion is provided by twin 1,200 hp Nanni engines driving MJP water jets and stabilized by a Seakeeper 9 gyro. The yacht wears a Porsche Slate Gray hull complemented by skylight cushions, and her electronics include FLIR night vision, three 22-inch Garmin multi-function displays and two Starlink internet systems. Comfort and serviceability are enhanced by a Watermist cooling system and a Hoshizaki professional icemaker, and recent maintenance comprises a full bottom job, compound and wax, and jet service just completed. Trades are welcomed and in-house financing is available.

Instruments & electrical systems

At the helm, three flush-mounted 22-inch Garmin GPSMap 8419 glass-bridge displays, integrated with the Garmin smart control system, place sophisticated navigation and vessel management at the captain's fingertips, while a Garmin GMR18 radar, augmented by an additional Garmin radar unit, provides layered situational awareness for confident passage-making. Precise handling is delivered through power steering and a responsive bow thruster, and night operations benefit from an LED searchlight coupled with a dedicated daylight camera to ensure clear visual monitoring. Onboard enjoyment is provided by a Fusion stereo system with seamless iPad and iPhone connectivity and a substantial subwoofer, all supported by a resilient 24V electrical architecture and a Northern Lights 16 kW generator that supplies dependable power whether underway or at anchor. Climate control is handled by Dometic Cruise Air with two 12,000 BTU units for guest comfort, while a 12 US gallon hot water boiler addresses domestic hot water needs.

Hull & deck

Beneath the waterline, a vacuum infused hybrid carbon fiber and fiberglass hull balances lightweight agility with structural resilience, while a sculpted carbon fiber T-top crowns the silhouette and the entire exterior is finished in an AWLGRIP superyacht paint system to retain a lasting, salon quality sheen. Underfoot, a Flexiteek self-draining deck with a full walkaround layout ensures confident footing and unrestricted circulation; eight pop-up cleats and two side boarding doors simplify mooring and embarkation. Thoughtful storage includes easy access fender lockers and a full fender set with shore lines and life jackets, and tables are appointed with carbon cup holders for secure service. Power and connectivity are comprehensive, with 110V cockpit outlets and multiple USB-C charging points, plus additional USB-C ports in the bow

and stern lounge areas, while LED floor lighting set in stainless steel housings, together with dedicated navigation lights, enhances safety and ambiance after dark. Entertaining is effortless thanks to four refrigerators and an outdoor galley sink, and a deck shower supplying fresh, warm water provides a refined finish to days aboard.

Toilet & Bathroom

Luxuriously appointed, the bathroom features an electric flush toilet for effortless operation, a separate shower cabin fitted with a calming rain shower, and a washbasin supplied with hot and cold water for complete comfort. A designer mirror brings refined style to the space, a dedicated ventilation fan ensures constant fresh airflow, and subtle indirect lighting bathes the room in a relaxing, elegant ambience.

Saloon & master cabin

The saloon and master cabin are crafted for refined comfort, featuring a king-size V-berth that invites luxurious rest while air conditioning quietly maintains the perfect onboard climate. Everyday convenience is covered with a sink offering cold water, a professional refrigerator and a microwave that make refreshments effortless, and plentiful storage lockers to keep belongings neatly stowed. Carefully placed indirect lighting creates an understated, elegant atmosphere, and modern power needs are met with 110V sockets and USB charging points. For clear, centralized system oversight a Garmin 7-inch control screen sits within easy view, delivering essential information at a glance.

Mid cabin

Designed with both comfort and practicality in mind, the mid cabin provides two single berths arranged to port and starboard, with storage lockers thoughtfully placed to keep personal belongings neatly stowed. Soft, indirect lighting creates a refined atmosphere while 110V sockets and integrated USB charging keep devices conveniently powered. Efficient, high-performance air conditioning maintains a cool, tranquil retreat in every climate.

Lounge & walkaround

Forward, a gracious bow lounge welcomes guests to unwind, its focal point a height-adjustable dining table that glides from a relaxed cocktail surface to a full dining configuration with effortless refinement. A secure, true walkaround design permits assured movement around the deck, featuring a generous side passage depth of 85 cm (33 inches) to maximize comfort and serenity while underway.

Safety

Safety is woven into the vessel's design, with twelve life vests available for immediate use, an automatic fire-suppression system dedicated to protecting the engine room, and a three-compartment automatic bilge pump arrangement that provides layered redundancy and swift water evacuation.

Anchor system

A sophisticated anchoring installation unites an automatic hydraulic arm with an electric anchor winch to manage a stainless steel chain of forty meters and a pool anchor weighing twenty kilograms, with the entire system controlled by

remote operation to ensure smooth, effortless and precise deployment and retrieval.

Optional equipment

The optional equipment package elevates onboard luxury and seakeeping with thoughtful, high-performance additions. A Seakeeper 9 gyro stabilizer delivers exceptional roll reduction, while an auxiliary LED searchlight coupled with FLIR night-vision extends your command of the night. The helm is upgraded with three additional 22-inch Garmin displays and dashboard air conditioning complete with a booster fan for refined navigation comfort. Shade and shelter are expanded by carbon bow awnings with integrated sunshade and an electric stern sunshade, creating cooler, protected living areas. Entertainment and service amenities include a premium audio system with subwoofers, two Samsung Frame TVs placed in the master and mid cabin, a wine cooler, and a Hoshizaki professional ice maker fitted with dual inline filters. Connectivity is robust thanks to twin Starlink internet systems configured in mesh alongside a Wi-Fi booster. Practical refinements comprise an Opacmare transformer swim platform, a garage surfaced in teak, and a built-in toy inflator system, while onboard comfort and protection are further enhanced by a water mist cooling system and the Echotech ultrasonic hull protection system.

Colors

The yacht's exterior is dressed in Porsche Slate Gray, creating a quietly powerful, contemporary presence. A Skylight boot stripe runs along the waterline to furnish a refined point of contrast, while seating and soft furnishings are covered in Silverguard Skylight, marrying resilient construction with a bright, modern glow that enhances onboard comfort.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
