## OVERVIEW

---

This 2024 Valhalla Boatworks V-55, a pristine one-owner Galati Yacht Sales trade currently berthed in Cabo, Mexico and scheduled to arrive in Florida this February, embodies the storied engineering and pedigree of Viking Yachts while offering a singular blend of bluewater capability and refined luxury. Its purposeful lines and impeccable fit and finish marry tournament-ready functionality with the grace of a large outboard center console, sportfish, and walkaround platform, producing a luxury dayboat equally at ease hosting guests or pursuing the horizon.

Propulsion is provided by quad 600-hp Mercury Verado V12s finished in Cold Fusion White, equipped with joystick control and benefiting from Extended Service Coverage through July 17, 2027, with additional coverage available. A Seakeeper 9 anchors the yacht's stabilization package, supported by warranty protection through July 17, 2026, while a Fischer Panda diesel generator supplies reliable auxiliary power for extended cruising. Navigation and target acquisition are elevated by a custom AME electronics suite centered on a Furuno CSH8L full-circle scanning sonar, and the profile is crowned by a full Palm Beach Towers gap tower with a black-wrapped underside of the hardtop and a standing platform that is as striking as it is functional.

Thoughtful enhancements amplify seaworthiness and convenience: a bow thruster, an underwater lighting package, comprehensive deck and coaming box illumination, and a through-stem anchor chute outfitted with a stainless plow anchor and windlass. The helm is appointed with a Release Marine teak helm pod and enjoys dedicated air conditioning, complemented by air-conditioned seating, a faux toe rail, and a faux teak transom that reinforce the yacht's elevated aesthetic.

Serious anglers will value upgraded livewells with high-capacity pumps, a 540 lb/day ice chipper, and ElectroSea corrosion protection, while extended

ventures are supported by a watermaker/Spot Zero combination and a Yachtmate BEV 140 filtration and chiller system plumbed to the exterior sink at the second-row seating for effortless bottle filling. A Reverso automatic engine flush system and Arid Dry bilge system help keep machinery and spaces immaculate. The result is an express-style super-console that fuses speed, range, comfort, and tournament-grade fishability into an exceptional offshore performer.

# DETAILED DESCRIPTION

---

## Exterior and hull

---

Sleek and purposeful, the exterior is defined by a polished aluminum bow handrail set neatly into a recess on the deck coaming, with generous side storage lockers to port and starboard and additional fiberglass lockers tucked under the forward gunwale. In-deck fish boxes and storage cavities are poised for action, while a portside dive door simplifies water access. The transom livewell and the gelcoat lounge livewell are both finished in striking Aristo Blue, set against a hull-side gelcoat in Snow White, a deep black bottom paint, and a custom boot stripe for a signature look. Custom work performed during the build includes the installation of a cofferdam and tailored glasswork to accommodate AME-supplied sonar. At the lighted helm, a flush-mounted compass sits ahead of a recessed fiberglass footrest with integrated storage, a fiberglass entry door to the console interior with a notched overhead, and heavy-duty locking door hardware. An electrical panel door provides direct access to helm electronics, complemented by a black acrylic helm panel designed for flush-mount installations, four flush-mounted cupholders, twin glove boxes to port and starboard with USB outlets and a 12V plug, an Edson carbon fiber steering wheel with teak accents, and a Procurve solid curved glass enclosure that seals the helm in clarity and style.

## Mechanical and electrical systems

---

Confidence offshore starts with a battery voltage and amperage monitor feeding a smart battery distribution panel with activated switches, voltage sensing, and parallel capability, supported by two 60-amp battery chargers with a 50' shore cord. The color-coded, labeled, and numbered wiring system pairs with BOCA Tech 12V switching and backlit labels for intuitive operation.

Odyssey Marine Group 31 batteries power the platform—one per engine plus three additional house batteries—while a 50A port shore-power inlet with a 50' cord and a 50A starboard cable reel simplify connections. Bilge management is robust, with two aft 2000 GPH pumps on auto/manual, a mid bilge pump with auto/manual through a BOCA Tech switch, a high-water alarm, an auto sump box in the console's mechanical space, and a Whale Gulper pump midship within the same compartment. Freshwater is pressurized on DC with a console fill, routed through durable PEX plumbing, with freshwater washdowns under the gunwale and in the anchor locker, plus a dedicated saltwater washdown. Comfort is assured by a quick-recovery electric water heater, and waste handling is streamlined via a deck pumpout fitting to the holding tank and an electric freshwater head with a Y-valve plumbed to a 12-gallon tank for overboard discharge. A fuel manifold with a selector lets you draw from any tank, Zipwake trim tabs refine running attitude, and a 15 kW diesel generator delivers dependable ship's power.

## Lighting

---

Night or day, visibility and ambiance are assured with dedicated anchor and navigation lights, efficient LED interior lighting, and dramatic spectrum lighting tucked under the gunwale and overhead, all orchestrated through intuitive POCO control.

## Fishing equipment

---

Purpose-built for serious anglers, the cockpit carries aft port and starboard fishboxes plumbed to Whale Gulper pumps, with the forward fishbox and port/starboard deckboxes likewise plumbed for reliable evacuation. A forward lounge livewell sits above deck with a clear lid, complemented by an additional Hooker electric 4500 variable-speed livewell pump with helm control and a

Hooker sea chest 4500 livewell system with a high-speed pickup, also helm controlled. Clear transom livewell lids—two in total—reveal dual transom livewells fitted with a viewing window and lights. Added Gemlux rod holders expand spread options, a twelve-volt electric reel outlet powers deep-drop gear, robust Gemlux heavy-duty swivel rod holders stand ready, and a flush deck plate awaits your rocket launcher.

## Interior and cabin

---

Thoughtfully appointed for extended comfort, the cabin offers 110/12V and USB outlets, efficient air-conditioning, and a flat-screen TV. The galley places a microwave in the upper cabinet and pairs a refrigerator with a freezer, while overhead a 24" Bomar escape hatch brightens the space alongside portlights to port and starboard. The dinette seating lowers on a dropdown pedestal to create a comfortable berth, with an entry door through the head leading to the mechanical room. Rich walnut woodwork elevates the interior, with a quartz galley countertop and stainless sink, a matching quartz vanity top with stainless sink in the head, and an optimized master where the bed top gains an extra 4" and a custom mattress for restorative sleep.

## Seating

---

Seamlessly integrated transom GG Schmidt folding seats set the tone for versatile comfort, while Release Marine seating takes command amidships: the first row features 19" four-up seating with eight armrests, electric slides, and flip-up bolsters; the second row mirrors the 19" footprint with five seats, six armrests, and flip-up bolsters. Upgraded Release Marine jump seat backrests refine the forward bench. The upholstery specification exudes tailored luxury with the main color in Capriccio Cloud, padded cockpit coaming bolsters, inset color in Textil Cloud, piping in Capriccio Black, and immaculate double Bentley

stitching.

## Custom AME electronics package

---

Electronics are curated for total command: a Furuno CSH8L Full Circle Scanning Sonar anchors the suite. At the helm, three Garmin GPSMAP9222 plotters with 22" displays deliver redundant, high-resolution navigation, with a cockpit-facing Garmin GPSMAP9224 plotter and 24" display keeping the crew informed, and a Garmin GPSMAP8612 TS MFD in the tower for elevated control. A Garmin GMR 1234 xHD3 radar rated at 12 kW with a 4' array pierces weather, paired with a Garmin GS28 sounder and an Airmar R109LHW transducer for crisp returns. A Garmin GMI20 marine instrument centralizes data, while a FLIR M364 thermal camera with gyro stabilization extends situational awareness. Always connected, the Starlink High Performance Maritime package with a single antenna delivers broadband offshore. Entertainment is immersive via a Fusion stereo with upgraded JL Audio throughout and ROKU media players in the salon, master, and at the helm. Comms and tracking are comprehensive with ICOM VHF's, AIS, and a Nautic Alert V satellite tracking system NA-TRITON-01.

## Palm Beach Towers tuna tower

---

The Palm Beach Towers tuna tower crowns the build with a molded top and a polished pipe featuring a 5' gap, accented by Lumitec Spectrum recessed lights. Under the hardtop, a molded fixed Valhalla-style recessed electronics box and an Express-style radar pod streamline the silhouette, while a recessed teaser reel opening with a push-style door, brackets, and clean wire runs keeps the cockpit uncluttered. Forward recesses in the overhead box house stereo speakers, and a molded one-piece standing platform integrates a molded storage box. A molded 2-in-1 spreader light pod adds a 12V LED aft under the

platform, and the 53" control box features a flush-mounted compass with its top finished in satin black. The tower sunshade frame and the fiberglass underside of the tower sunshade are likewise finished in satin black. Comfort is enhanced with an upgraded belly ring cushion in Rybo Style. Rod holders are expertly placed and welded—on the inner aft tower leg, to the rail behind the hardtop, and with steps on the aft main tower legs. Out back, the 35' Gemlux GS 60 Gulfstream carbon fiber outrigger package with white poles teams with a Gemlux Bluewater carbon fiber center rigger with a welded mount and white pole. A molded single light pod forward beneath the hardtop carries a 12V LED, and molded LED nav lights mark port, starboard, and stern. For fine-tuned handling, a Zipwake trim-tab-mounted tower control box stands by, joined by a Side Power bow thruster left/right joystick control box. Command is absolute with Mercury Quad 600 HP electronic tower controls and steering, including displays, start/stop, and the Mercury Joystick. A Rigid 30" spot-style light bar is molded into the platform's edge, Miya Epoch Super US9R electric teaser reels (12V) with handheld remotes are at the ready, and audio presence comes from a molded 4-in-1 stereo speaker pod under the aft hardtop. Completing the package, a molded low-profile spreader light pod faces outboard under each side of the hardtop with Lumitec Corsica 24V LEDs, and a molded round wedge forward on the hardtop awaits the FLIR camera.

## Exclusions

---

The following items are excluded from the sale: the Release rocket launcher in the cockpit and all fishing equipment.

# CONTACTS

---

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.

For more information and to view available yachts, you can visit the company's official website: <https://shestakovyachtsales.com>
