OVERVIEW

Acting on behalf of our client, we are pleased to offer this immaculately kept and comprehensively specified 2019 Princess F55, now presented to the market. For buyers in search of a modern, voluminous and impeccably finished Princess flybridge yacht, this F55 represents a compelling proposition.

As one of the marque's most desirable flybridge models, the F55 combines a sleek silhouette with generous living areas and superior comfort, all executed with the hallmark craftsmanship and fastidious attention to detail synonymous with Princess Yachts. Equally suited to extended summer passages as it is to leisurely weekend escapes with family and friends, this luxury motor yacht delivers an impressive synthesis of performance, onboard comfort and practical day to day usability.

The expansive aft cockpit creates an inviting social centre, offering abundant seating for alfresco dining and long, sunlit evenings on the water. The layout flows effortlessly into the galley and saloon, establishing a seamless indoor-outdoor connection that elevates the onboard lifestyle.

Within, the saloon is bright and refined, featuring sumptuous seating and wide panoramic glazing that frames the horizons and floods the interior with natural light. Opposite the main lounge, the television is discreetly concealed within bespoke joinery and rises electrically only when required, preserving uncluttered sightlines and a calm atmosphere.

The helm is contemporary and comprehensively equipped as a full glass cockpit, with 16-inch Volvo/Garmin displays fitted at both the lower helm and on the flybridge, supported by radar, autopilot and a reversing camera. Joystick handling is fitted to simplify close quarters manoeuvring and make berthing straightforward and stress free.

The flybridge is a standout feature of the F55, offering a spacious social deck, a comfortable helm position and a well appointed wetbar with grill — an ideal

environment for relaxed days afloat with family and guests aboard a premium flybridge yacht.

Below decks, accommodation comprises three elegantly appointed cabins and two bathrooms. The impressive full beam owner's suite benefits from large hull windows to port and starboard, amplifying the sense of space and welcoming ample daylight. Both bathrooms are fitted with underfloor heating, adding a further layer of comfort and refinement.

A hydraulic hi lo bathing platform provides effortless water access and greatly eases the launch and recovery of a tender or personal watercraft. This particular Princess F55 has been meticulously cared for and is extensively optioned, bringing together generous accommodation, up to date systems and exceptional onboard comfort within a refined planing motor yacht.

The yacht is entered in the Norwegian Ship Register, and she has been wintered indoors every season. For further details, a full specification, or to arrange a private viewing, please enquire.

DETAILED DESCRIPTION

Full specification

Power is supplied by twin Volvo Penta D13 engines, each producing 800 hp, linked to a Volvo Penta Joystick that includes a Low Speed function and Joystick Docking for intuitive, low-stress handling in tight quarters. Two 7-inch Volvo Penta displays present engine and systems information with clarity, while variable-speed bow and stern thrusters equipped with a Hold function provide assured station-keeping and pinpoint manoeuvrability. The hull is finished in a classic white that emphasizes the yacht's sleek, contemporary silhouette.

The interior is appointed in Rovere Oak with a satin finish, setting a tone of refined warmth, and is beautifully accented by walnut flooring that runs through the saloon, galley, helm area and aft saloon. The saloon table features folding leaves for versatile entertaining, and an additional access door from the passageway to the guest bathroom increases onboard practicality. The galley is specified to support extended cruising and social cooking, with a full-height refrigerator/freezer, a Carrara White worktop, a dishwasher rated for nine place settings and a combined washer/dryer.

Sanitary areas are finished to a high standard, with Avonite Carrara White worktops in gloss and Avonite Koko White flooring in a satin finish, complemented by underfloor heating in both bathrooms and heated towel rails for comfort in cooler seasons. Interior selections have been curated for restrained elegance: leather-upholstered helm seats, a deck saloon sofa in LOFT, carpets in LINEN, a bedspread in Peninsula Nuage 35500746 and the master cabin headboard and chairs upholstered in Molene Argile.

On deck, an electro-hydraulic bathing platform with a raise/lower function is rated to an SWL of 450 kg and is optimised for handling a tender with a maximum recommended weight of 300 kg. Practical deck features include a

lowered bulwark opening on the foredeck, a 25 kg stainless-steel anchor and an additional 20 metres of anchor chain giving a total chain length of 60 metres. Teak underfoot on the side decks, foredeck and flybridge contributes a warm, classic finish.

Systems and comforts are comprehensive, led by an ONAN 9.5 kW generator and Scandinavian 220V/240V sockets to accommodate varied shore-power arrangements. Hospitality on board is enhanced by an icemaker in the aft saloon, a flybridge wetbar complete with sink, grill and storage, and a flybridge cool box, all complemented by an upgraded exterior lighting package. Practical electrical enhancements include an extra 220V socket and a USB outlet at the lower helm and an additional USB outlet at the upper helm.

Entertainment is integrated with refinement, featuring a Samsung "The Frame" LED TV installed in the master cabin in 2022, an LED TV in the saloon and a Fusion audio system with DVD player serving both the saloon and flybridge, augmented by a DAB+ module for broader radio reception.

The navigation and communication suite is geared toward a professional helm, with a Volvo Penta autopilot and a Garmin Glass Cockpit 16-inch touchscreen chartplotter at the lower helm paired with a Garmin GRID keypad. The flybridge carries two Garmin Glass Cockpit 16-inch touchscreen chartplotters, again with a Garmin GRID keypad, and situational awareness is reinforced by a Garmin 424 XHD2 radar supported by a 4 kW open-array radar antenna. A Garmin Class B AIS transmitter and receiver are integrated with the chartplotter, and the fit-out is completed by a Garmin VHF and a reversing camera.

Comfort and environmental systems are specified for all-weather use, with windscreen demisters, an Eberspächer H16W diesel heater supplying warm air to all cabins and bathrooms and an Eberspächer D5W diesel heater serving the cockpit. Waste management is simplified by an electric discharge facility for the black water holding tank.

Exterior upholstery and canvas are specified in a sophisticated palette, with cockpit cushions in Vouge Eucalyptus accented by contrasting stitching and Earth-coloured details, a foredeck sunbed in Vouge Eucalyptus with reticulated foam for enhanced drainage and comfort, and a cockpit canopy in grey Sunbrella Plus.

These particulars are offered in good faith but are not guaranteed; the accuracy and condition of the vessel should be independently verified by prospective buyers or their surveyors. The vessel is offered subject to prior sale, price change or withdrawal without notice.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts.
