OVERVIEW

Built in 2012 and located in the United States, this 60 foot motor yacht combines a performance oriented hull with sophisticated onboard living. A generous 16 foot beam affords an expansive, airy interior, while the deep V hull and fiberglass composite construction ensure a composed, quiet passage across a variety of sea conditions. The result is a finely balanced sport yacht for owners who value both brisk runs and relaxed anchorages.

Propulsion comes from twin MAN diesel inboards that deliver smooth, dependable thrust, making extended passages feel effortless. A capacious 900 gallon fuel supply supports longer itineraries and confident offshore runs, and efficient systems along with considered engineering allow for straightforward single or couple handed operation. Fiberglass decks simplify upkeep, leaving more time for cruising the coast, weekend getaways, and treasured moments with family and friends.

Inside, the salon welcomes with bright, open volumes that set the tone for leisurely conversation or evening entertaining. The galley is positioned to serve both the interior lounge and the cockpit with ease, so breakfasts and sunset cocktails flow naturally. Accommodations are arranged for true comfort during extended voyages, offering sleeping for four and two well appointed heads that provide privacy and convenience for owners and guests.

On deck, the yacht's proportions create expansive social areas and safe circulation from bow to stern. Whether enjoying an alfresco lunch with a sea breeze, reclining on the foredeck, or savoring a starlit nightcap, the layout accommodates every occasion with poise. Thoughtful storage solutions keep equipment stowed without encroaching on living spaces, and a substantial 200 gallon freshwater capacity enhances self sufficiency on multi day cruises.

Underway, the deep V geometry rewards the helmsman with sure tracking

and responsive handling, making fast passages both capable and enjoyable. At rest, the stable footprint and high quality construction raise the onboard experience from first light to last glow.

This 2012 build presents a compelling option for buyers seeking a refined 60 foot platform that fuses performance, efficiency, and tasteful comfort. It is a modern motor yacht equally prepared for an impromptu afternoon sprint or a carefully planned coastal voyage.
