## OVERVIEW

---

The 2024 Viking 64 Convertible Fish Tank embodies the highest expression of modern sportfishing, delivered as an exceptionally specified and fully upgraded example of the model. Power is supplied by twin MTU M96X V12s, accompanied by an extended MTU warranty in force through 12/16/2028 (or 4,000 hours), and every system has been chosen for purpose and performance—from Seakeeper gyro stabilization and advanced navigation and electronics to a hand-crafted custom wood interior and premium finishes throughout. Built without compromise with an array of factory upgrades, Fish Tank is equally at home chasing tournament fish as she is providing an indulgent, well-appointed platform for luxury cruising, presenting a rare chance to own a truly one-of-a-kind sportfishing yacht that marries relentless performance, cutting-edge innovation, and refined comfort.

# GALLERY

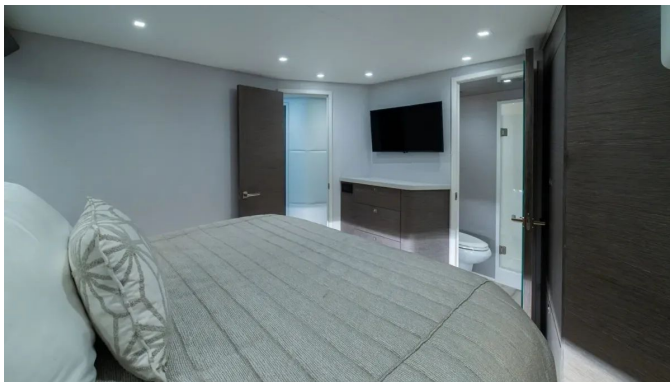

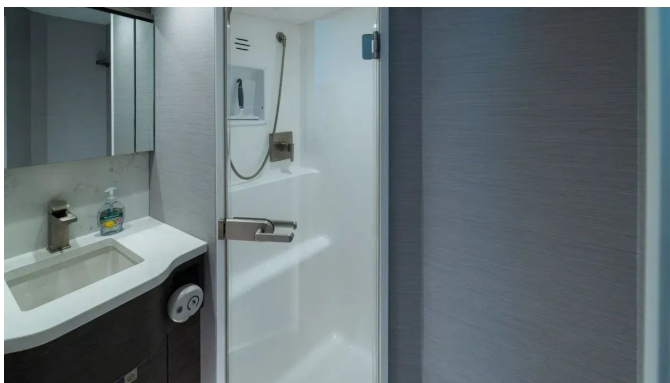

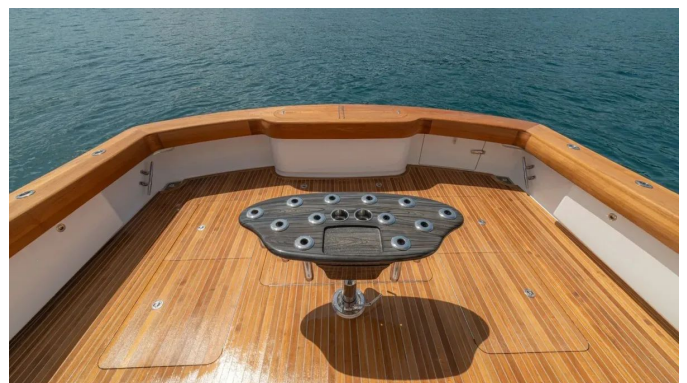

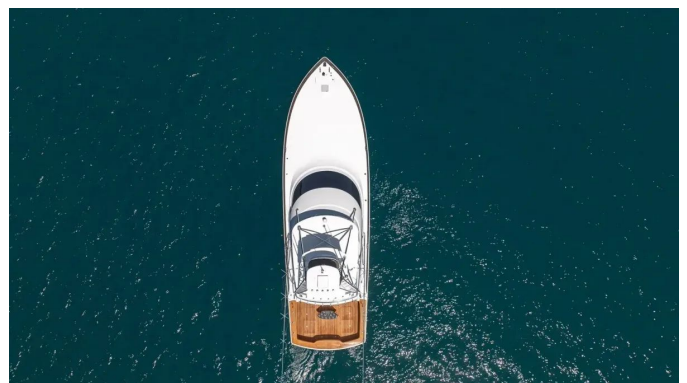

# DETAILED DESCRIPTION

---

## Layout

---

A meticulously planned four-stateroom arrangement defines the yacht's interior, where a satin finish flows across every surface and bespoke woodwork lends each area a welcoming warmth, refined elegance and timeless sophistication.

## Decor

---

The interior is finished in the Prestige decor scheme, with stateroom doors fitted with salon door-style catches and a wrapped hatch carpet installation for a clean, tailored appearance. Custom wallpaper material is paired with additional custom wallcoverings, while a bespoke headliner material and LED interior lighting are carried throughout every cabin and living area. Seating is refined with upgraded fabrics on the bridge cushions, mezzanine seating, helm chair and companion chair, and stateroom comfort is enhanced by mattress pads and the inclusion of a standard linen package. Custom flooring extends across the salon, dinette platform, salon entry, steps and companionway, staterooms and heads, and the décor is rounded out with barstools that feature backs. The heads are appointed with upgraded vanity stone tops and granite countertops fitted with square-style sinks in all heads, each finished with full-height backsplashes. A satin finish on all surfaces and satin interior hardware provides a subtle, sophisticated sheen, while Whisper walls, hull sealers and knees are incorporated throughout for acoustic and structural refinement.

## Salon

---

A refined, upgraded-style sofa serves as the salon's centerpiece, accompanied by convenient cupholders and pull-out drawers specifically engineered for bespoke bottle storage. Entertaining is effortless with a clear icemaker and an additional TV mounted above the dinette, while a Release Marine cocktail table lends a graceful focal point to the space. Practical details have been artfully integrated, including wood wire boxes to keep cables tidy and a USB plus 110V outlet located in the starboard corner beside the sofa. Atmosphere and comfort are further enhanced by dimmers on the overhead LED lighting, custom salon AC soffits, and a salon door fitted with an electric door opener for seamless access.

## Galley

---

Purposefully crafted to serve both leisurely cruising and elegant entertaining, the galley is appointed with an undercounter refrigerator and an undercounter freezer, each featuring drawer access, and topped by bespoke countertops tailored to the space. A Kohler sink with an integrated soap dispenser sits against a practical backsplash that conceals additional storage drawers, while meal preparation is entrusted to a Wolf cooktop, a Wolf steam oven and the Wolf MC24 convection unit. Ambient control is refined by a dimmer for the overhead LED lights, and convenience is provided by an electrical panel mounted up for easy reach, plentiful 110V outlets and a discreet pull-out trash can. Just off the work area, the dinette is fitted with four cupholders and a 43-inch TV positioned above, the entire entertaining space elegantly framed by a warm wood bar face.

## Companionway

---

A meticulously finished wooden handrail provides a secure, graceful guide through the companionway, while a discreet storage compartment positioned forward of the stereo cabinet offers a practical, concealed spot to stow essentials and keep them immaculately organized.

## Master stateroom

---

This tranquil suite centers on a queen-size berth appointed with a Viking Slumber #8 mattress to ensure truly restorative sleep, bookended by nightstands each fitted with a convenient charging port on its surface. Lighting has been thoughtfully designed, with overhead LED fixtures controlled by a dimmer and complemented by elegant wall sconces to craft the ideal ambiance. Entertainment is provided by a 12V CD/DVD stereo with Bluetooth capability paired to a 32-inch flat-panel TV. Practical luxury continues with a private en-suite head, a generously proportioned credenza and plush carpeting underfoot, while custom rod storage is neatly concealed behind the headboard.

## Forward stateroom

---

The forward stateroom is appointed with a queen-size berth crowned by a Viking Slumber #6 mattress for supremely restorative sleep, while dimmable overhead LED lighting allows the ambiance to be precisely adjusted, and a private en-suite head delivers discreet, effortless convenience.

## Port aft stateroom

---

This elegant port aft stateroom is furnished with a Viking Slumber #6 mattress

to ensure truly restorative nights, accompanied by a practical nightstand that keeps personal items within easy reach. The overhead LED lights are fitted with a dimmer, permitting a seamless shift from a soft, atmospheric glow to brighter, task-oriented illumination. For onboard entertainment and connectivity, a 12V CD/DVD stereo with Bluetooth capability delivers effortless access to music and films.

## Port stateroom

---

Meticulously crafted for both ease and indulgence, the port stateroom is centered around a luxurious Viking Slumber #6 mattress paired with an elegant nightstand. The atmosphere is adjustable to your preference via a dimmer that controls the overhead LED lights, while onboard entertainment is delivered through a 12V CD/DVD stereo with Bluetooth capability and a 22-inch flat screen TV. Generous locker storage maintains belongings neatly stowed, preserving a calm, uncluttered interior.

## Heads

---

Each bathroom has been finished with meticulous attention to detail, beginning with a single-piece, custom frameless glass shower door in the master head (MSR) and accented throughout by white Corian surrounds framing the shower entries in the master, forward and port stalls (MSR, FSR, PSR). The lower vanities are faced in sumptuous wood veneers for a warm, refined aesthetic across master, forward and port heads (MSR, FSR, PSR), while the master vanity is deliberately squared to present a crisp, contemporary silhouette (MSR). Discreet rope lighting set into the toe-kick of every vanity cabinet bathes the sole of the space in a soft, atmospheric glow, adding dimensionality and ambience to each head (MSR, FSR, PSR). A bespoke sink in the master further elevates the suite (MSR), and convenient routing provides

direct access to the companionway for enhanced practicality in the port head (PSR). Mirrored ceilings in the master and forward heads broaden the sense of space and multiply light for an overall bright, sophisticated finish (MSR, FSR).

## Flybridge

---

Take command from an exquisitely appointed flybridge crafted for precise handling and effortless comfort, where electronic single lever controls for the helm pod and a recessed compass establish an uncluttered, instinctive helm. Navigation and communication equipment sit neatly within recessed electronics boxes outfitted with split radio box lids and secure push button catches, keeping instruments protected yet instantly reachable. Entertaining is made simple with a dedicated bridge freezer box and a refrigerated bridge drink box, while the convenience of a fresh water outlet on the bridge and a watermaker control panel on the flybridge brings practical functionality to extended days on the water. After sundown, LED floodlights recessed into the hardtop bathe the deck in crisp illumination. Comfort and safety are enhanced by stainless steel gas springs on the flybridge bench seats, an upgraded jumpseat backrest for improved ergonomics, and a sturdy handrail along the side of the helm console, and a weatherproof 12V receptacle delivers reliable power exactly where it's needed.

## Hull and deck

---

A bespoke Pamlico Blue gelcoat envelops both hull and deck, elegantly contrasted by black bottom paint and a refined faux teak toe rail. Maneuvering is assured by a DC bow thruster supported by bow cleats installed fore and aft, while the Seakeeper Gyro SK 26 delivers exceptional underway stability. An additional fuel tank extends range, bringing the vessel's total to three tanks, and an AME-supplied sonar tube enhances exploration capability. The ground

tackle has been upgraded to a Lewmar Delta stainless steel anchor, routed through a removable stainless steel anchor fairlead and secured on an anchor bracket in the anchor locker, and practical service is provided by a freshwater washdown.

## Cockpit

---

Enter a meticulously appointed mezzanine cockpit where rich teakwork sets a warm, classic tone, the cockpit and mezzanine enveloped in elegant teak covering and coaming that speak to refined craftsmanship. Climate comfort is provided by the Cruisair "Cool Breeze" system, while a suite of chilled storage solutions—including a refrigerated cockpit step box, refrigerated port and starboard mezzanine compartments, and freezer space built into the mezzanine seat—ensure drinks and the day's spoils are kept perfectly cold. Whether underway or at anchor, a Costa cockpit sunshade with poles and a matching Costa cockpit cover delivers adaptable shelter, and ambient evening illumination is achieved through tri-color lights in the aft deck overhang complemented by tri-color rope lights discreetly mounted under the coaming. Serious anglers will welcome the Release Marine rocket launcher, extra rod holders and a cockpit grill, supported by practical storage lockers beneath both port and starboard coamings; the dedicated fish-handling suite includes a split lid for the cockpit fish box, removable fishbox dividers, and a solid transom coaming with an integrated fish box whose transom box is plumbed as a live well, with an ice machine that discharges directly into the fish boxes to preserve the catch. Systems are well provisioned with two 24V 30 AMP outlets forward and two 12VDC 30 AMP outlets, access is simplified by a single Seakeeper hatch with a power actuator lift, and plush mezzanine cushions invite relaxation atop a cockpit deck reinforced to accept fuel bladders, marrying luxury appointments with purposeful, go-anywhere capability.

## Bridge equipment

---

Crowning this 64' convertible is a tuna tower topped by a molded hardtop and finished with a polished pipe antenna, presenting a commanding profile on the skyline. The bullet-style radar pod features a sliding door, secure bracket and dedicated runs for teaser reels, while a molded standing platform with integrated coupler box offers a sure-footed vantage. The bridge rail is a three-sided arrangement with double aft sections, augmented by an aft flag staff and an air vent set into the forward top panel. Navigation lighting is comprehensive, with molded port, starboard and stern lights alongside a LOPO LED masthead/anchor light. Illumination throughout the bridge area is exceptional: recessed Lumitec tri color lights set into fiberglass pockets, tri color recessed lighting beneath both the platform and the tower sunshade, and a compact two in one Lumitec LED light pod mounted on the aft underside of the hardtop, neatly wired to a switch in the salon. Long-range and spread lighting is provided by a Rigid Industries 40" RDS LED light bar with defused lenses housed in a custom molded pod, a Rigid Industries 20" RDS LED light bar in its own molded pod, and matching Rigid Industries 20" RDS LED bars in custom pods facing outboard on each side of the platform; for focused distance illumination a Rigid 50" spot style LED light bar is molded into the front of the platform, with two additional spreader lights wired to a breaker and operated by separate switches. The helm is designed for both comfort and functionality, featuring a 63" control box with a flush mounted compass and a tailored control box cover, a recessed electronics box with lids and a molded recessed fixed tri side electronics box. An EZ2CY panel ensures clear visibility at speed, and a round wedge on the forward hardtop is ready to accept a FLIR camera. The molded tower sunshade incorporates internal tracks and welded antenna mounts, and the tower benefits from upgraded engineering, including a forward X brace, side diagonals and reinforced hardtop braces. Angling toward serious fishing capability, eight polished rod

holders are welded to the aft bridge rail and six polished rod holders are fitted to the aft legs, while fingertip command comes from electronic MTU Blue Vision controls and steering specified for the M96 Series.

## Outriggers and teaser systems

---

The yacht is equipped with forty-six-foot Rupp Big Riggs HD outriggers arranged in a refined four-spreader layout, enhanced with Rupp rollers in lieu of eyebolts and finished with teaser line collars for discreet, effective presentation; the package is rounded out by a Rupp center rigger, Rupp halyard grommets and fittings, and the AME Tower/Hardtop RUPP Mount Pak to provide uncompromising, rock-solid support. Hydraulic movement is delivered by the Rupp hydraulic outrigger system alongside an additional Rupp hydraulic system, both operated through intuitive outrigger hydraulic switches for effortless deployment and recovery, while MIYA EPOCH Super US9 electric teaser reels (24V) furnish smooth, reliable power for impeccable bait presentation and rapid resets.

## Radar & plotter systems

---

A meticulously specified navigation suite combines FURUNO and GARMIN systems to deliver commanding situational awareness with built in redundancy, centered on a FURUNO DRS25ANXT/6 radar with a six foot array that feeds the FURUNO TZT2BB NavNet TZTouch2, managed through the FURUNO MCU005 controller and referenced by the FURUNO GP330B GPS antenna. Helm ergonomics are refined with SEATRONX touch screen displays for crisp, intuitive control, while a comprehensive GARMIN package provides two GARMIN GPSMAP8612 TS MFDs powered by a GARMIN GPSMAP8700 black box and supported by a GARMIN 24XD GPS antenna, a GARMIN GAT 38 GPS/GLONASS antenna and a GARMIN GXM54 weather antenna. Long range

solid state target detection is handled by a GARMIN Fantom twenty four inch radome, and the onboard data fabric is neatly tied together with a GARMIN network cable and a GARMIN GMS10 network expander; everyday convenience is assured with a GARMIN USB card reader. The system's safety and traffic awareness are further elevated by the VESPER CORTEXM1 smart AIS transponder, creating a resilient, high performance navigation ecosystem.

## Sonar and sounder systems

---

Designed to inspire absolute confidence beneath the bow, the sonar suite combines the GARMIN GSD-26 Chirp video Sounder, the GARMIN GSD25 Premium Sonar module and the GARMIN Panoptix PS70 to provide instantaneous, high-definition target resolution and detailed structural imaging. Subsurface reach and wide-area coverage are extended by the AIRMAR PM411C-LWM Ultra-wide beam together with the AIRMAR PM275LHW 1KW Transducer, delivering exceptional clarity in a variety of sea states. For true 360-degree awareness, the FURUNO CSH8L Omni Sonar is integrated alongside the FURUNO NMEA2000-NMEA0183 interface for the CSH8L and the FURUNO F1918 CH300 Sonar Tube, while refined fingertip command is afforded by the FURUNO CSH7040 Remote control. Thoughtful AME engineering ties the system together—optimizing installation, hydrodynamics and ventilation through the AME Custom Sonar Shaft Fairing, the AME Custom remote mount for the FURUNO CSH7040 and the AME Custom Sonar vent for the FURUNO CSH8L—resulting in a seamlessly integrated, performance-driven sonar architecture.

## Autopilot & navigation

---

Outfitted with a Garmin Reactor 40 Corepack with GHC 50, the yacht enjoys pinpoint course keeping paired with exceptionally intuitive helm control;

installation is executed cleanly and dependably via a Garmin Autopilot Installation Kit, while the Garmin Interconnect Cable Steer-by-Wire ties the system into modern steer-by-wire architecture to produce smooth, responsive automated steering that inspires confidence underway.

## VHF & communication

---

An ICOM external VHF radio serves as the backbone of the yacht's communications suite, accompanied by both an ICOM-604 and an ICOM IC-M605 BLK VHF unit, all integrated with the ICOM OPC-1541 VHF and its accompanying ICOM OPC-1541 VHF Command Mic Extension. Intuitive fingertip operation is provided by the ICOM HM-195 Command Mic IV, while the equipment is presented with a refined, uncluttered appearance thanks to the ICOM MB75 VHF flush mount. Reception and speech clarity are enhanced by a COMROD AV90/2B VHF antenna and a Poly-Planar external black VHF speaker, and extended capabilities are delivered by a YAESU FTM-3100r transceiver mated to a DIAMOND X-30A antenna mounted on a bespoke support specifically engineered for the DIAMOND installation.

## Stereo & audio systems

---

A refined audio environment aboard the yacht is anchored by the Fusion MS-RA770 Apollo Series stereo, paired with a Fusion Apollo ERX400 wired remote for intuitive, tactile control, while satellite channels are delivered through a Fusion Sirius/XM tuner working via a Shakespeare Sirius antenna. High-fidelity output radiates from JL M6 Marine Lux speakers in 6.5-inch and 7.7-inch white configurations, underpinned by a JL M6 Marine Lux 8-inch subwoofer and driven with authority by a JL Audio M400/4 channel amplifier alongside a JL Audio M700/5 amplifier. For expanded coverage and added sonic detail a James Loudspeaker 42UE/OW 2-way unit enriches the soundfield,

and convenient wireless streaming from personal devices is enabled by a Russound BSK-2 Bluetooth module. System oversight and user interaction are gathered on a SEATROXN 17-inch touch screen display, with onboard voice communications handled by the EARTEC Ultrapack -3 headset package for clear, reliable connection.

## Camera & imaging

---

Engineered for complete situational awareness, the yacht's imaging suite places GOST Wide Angle 1080P Mini-Ball Cameras at its core, each mounted on precision PM MiniBall Camera Mounts to capture pristine, wide-field views of every critical zone. A VM-HD-4 TVI AHD Quad Processor consolidates those feeds into a single, seamless display for intuitive monitoring, while the FLIR M364C Thermal Camera System penetrates darkness and adverse weather to extend visibility, its operation refined through the FLIR M300 Series JCUI Control Unit. Network robustness and clean PoE power distribution are provided by a Tycon Ethernet POE Switch, with a Garmin Network POE Isolation Coupler protecting sensitive electronics, and Composite Video Distribution Amps ensuring strong, low-noise video delivery across the vessel's displays.

## Lighting systems

---

The onboard atmosphere is sculpted by Lumishore TIX803 Eos color changing lights, whose effects are directly accessible from the helm thanks to Lumishore to Garmin conversion cables that translate command inputs into effortless control. Fine-tuned operation is carried by a Lumishore DMX extension cable while a Lumishore RS232 trigger module provides instantaneous cues and seamless scene synchronization, all powered quietly and reliably by a Meanwell power supply 24V-25A. Network integrity is maintained via an Adam

6520 plotter Ethernet switch, and the entire lighting and navigational experience is enriched by Garmin Navionics Vision+ Chart, offering crisp cartography and an intuitive interface that harmonizes with the vessel's illumination and helm systems.

## **Safety & protection**

---

Fitted throughout the yacht, DINNTECO Lightning Protection Devices paired with DINNTECO Ground Filters and bespoke Mounting Kits create a seamlessly integrated defense network that shields the vessel and everyone aboard. This coordinated, yacht-wide system reduces exposure to lightning strikes and electrical disturbances, providing reliable protection and a reassuring sense of security in every condition.

## **Engine room and mechanical**

---

Propulsion is provided by twin MTU Series 2000 V12 M96X engines rated at 2002MHP, protected by an extended warranty in force through 12/16/2028, while electrical redundancy is assured by a pair of Onan 21.5KW generators. An Octoplex display gives the owner and crew an intuitive, centralized view of all onboard systems, and water quality is elevated by Electrosea and Spot Zero treatment systems alongside two 1800 Sea Exchange watermakers to ensure a plentiful supply of freshwater; a Headhunter fresh water pump maintains consistent pressure throughout the vessel. Fuel systems have been engineered for reliability, with a back-up fuel transfer pump plumbed in parallel and dedicated 24V fuel priming pumps to guarantee rapid starts and smooth operation, and blue silicone hoses run through the machinery spaces for durable, tidy routing and easy maintenance access.

# CONTACTS

---

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.

For more information and to view available yachts, you can visit the company's official website: <https://shestakovyachtsales.com>
