OVERVIEW

This exceptional high-performance motor yacht, conceived through a rare partnership between Tecnomar and Lamborghini, translates the sculpted vocabulary of an automotive icon into a finely engineered marine masterpiece. Built in an ultra-limited series and destined to be highly collectible, she combines breathtaking acceleration and a featherweight construction with unmistakable Italian style, capable of sprinting to an exhilarating 60 knots to deliver a thrilling, spine-tingling experience. The cockpit and cabins echo the marque's signature Y-shaped and hexagonal detailing, while the deck is arranged for maximum versatility with configurable seating, adaptable lounges and generous sunpads that define refined dayboat comfort. A bespoke Lamborghini Seabob is included to enhance waterside recreation, and the Smart Eco Set automatically adjusts systems underway to maximise efficiency for intelligent, fuel-conscious cruising. As a luxury motor yacht that offers true superyacht performance, she blends iconic detailing with a flexible layout, making a striking statement as both a glamorous sports cruiser and an unforgettable performance yacht on every horizon.

DETAILED DESCRIPTION

Tenders and watersport equipment

Aboard she carries two premier water toys: a Seabob that invites graceful, intimate exploration beneath the surface and a spirited jet ski built for fast, adrenaline-rich runs, together converting every anchorage into a secluded, private aquatic playground.

Audio/visual entertainment systems

Discreetly integrated speakers located in the salon, master cabin and guest cabin envelope each space in harmonically balanced, room filling audio, ensuring your preferred music and media accompany every moment aboard with pristine, effortless clarity.

Machinery

Twin MAN V12-2000 engines, model D2862LE496, provide the yacht's propulsion; engine hours recorded in September 2026 are 220 on the port unit and 220 on the starboard. This installation yields a practical range of 300 nautical miles at 42 knots, with fuel consumption at cruising speed averaging 450 liters per hour. Power is transmitted by fixed surface piercing propellers mated to a fixed surface drive system, with propeller shafts running into a ZF gearbox, and hydraulic steering delivers the precise, responsive control befitting a vessel of this caliber.

Generators & auxiliary equipment

A Dynamica Mini 120V serves as the yacht's primary generator, with the log

showing 540 hours of operation as of September 2026. Shore power is provided by a 63 A single phase shore cable, and all lighting aboard uses efficient LED fixtures, complemented by dedicated emergency lighting for added safety. Victron Energy battery chargers manage a substantial bank of four batteries, ensuring reliable engine starts and smooth, uninterrupted house power.

Ancillary equipment

Designed to make cruising effortless, the yacht is fitted with Seakeeper stabilisers to attenuate roll, a hydraulic steering arrangement complemented by electronic helm controls for exceptionally precise handling, and substantial rudders alongside a potent bow thruster to guarantee calm, confident manoeuvring at low speeds. Onboard comforts are equally well considered: twin water boilers supply plentiful hot water, a practical wash down system preserves deck cleanliness, and a high efficiency air conditioning system maintains an inviting interior climate. Ventilation is separately dedicated to the engine room and galley to promote fresh, clean air where it matters most, while sanitation is handled by an electric freshwater toilet system for dependable, hygienic operation.

Communication equipment

A dedicated fixed VHF installation guarantees crisp, dependable ship to ship and ship to shore connectivity, complemented by a handheld VHF that delivers portable convenience and a trusted backup whether you are on deck, below or out in the tender.

Navigation equipment

A meticulously appointed navigation suite — featuring autopilot, GPS, a high-precision compass, plotter, radar, AIS, wind instruments and an echosounder — operates in seamless harmony to provide pinpoint situational awareness, effortless course keeping and the assurance to navigate confidently in all conditions.

Deck equipment

Underwater lighting casts a luxurious glow along the hull, enhancing evening ambiance while the primary ground tackle is composed of one anchor secured to a 60 m chain and operated with finesse via an anchor winch and one anchor windlass. Two aft deck capstans aid precise, close-quarters handling, and a portable crane designated for a Jet Ski allows smooth, effortless launch and recovery. For comfort and safe access, an awning delivers cooling shade and a sturdy gangway ensures confident boarding.

Galley and domestic equipment

Meticulously arranged for extended passagemaking and effortless hospitality, the galley combines functionality with refinement: a precision oven delivers consistent culinary results, three chilled compartments keep fresh provisions and beverages neatly sorted, a pair of freezers secures long-range stores, an integrated dishwasher simplifies post-meal service, and a dedicated ice maker ensures every drink is served perfectly chilled.

Safety & security equipment

Engineered to instill complete confidence, the yacht is equipped with an

integrated alarm and communications suite that delivers dedicated alerts for the engine, generator, bilge and for fire. On-board protection is reinforced by a comprehensive complement of fire-fighting systems, complemented by medical equipment poised for rapid, professional intervention.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
