OVERVIEW

Located in Turkey, the 2022 Galeon 640 FLY flybridge motor yacht presents a revolutionary onboard environment, boasting an LOA of 20.80 meters and a beam of 5.00 meters that combine generous volume with elegant lines. Guest accommodation comprises three sumptuous staterooms in addition to a dedicated crew cabin, while propulsion is delivered by twin 1,000 hp Volvo Penta D13-1000s, currently showing 750 engine hours. Specified with the Beach Mode package, which features folding aft balconies, the Lounge Mode package with power-operated bow seating, and the Aft Dinner package that expands both cockpit and flybridge footprints, this yacht dramatically enlarges living areas when at anchor. Further appointments include a Seakeeper 9 gyro stabilizer for superior comfort underway, bow and stern thrusters paired with joystick docking for effortless maneuvering, a flybridge hardtop equipped with an electric sunshade, and a teak-laid swim platform rated to 700 kg for secure boarding and tender handling. This exceptional vessel is being offered at € 1,870,000.

DETAILED DESCRIPTION

Galeon 640

The 2022 Galeon 640 FLY presents as a pristine example of contemporary yacht architecture, offered from Türkiye under the Turkish flag at €1,870,000 and built to Category B standards. Measuring an overall length of 20.80 meters with a 5.00-meter beam, this yacht delivers expansive interior volume and a graceful, well-appointed onboard lifestyle across every deck.

The exterior expresses Galeon's hallmark transforming architecture. In Beach Mode the yacht creates a true waterfront living area through folding aft balconies, sliding-opening aft side windows and a side-cockpit bar that converts for entertaining at water level. Lounge Mode transforms the bow into a secluded terrace where electrically operated seats and a reconfigurable table convert into a large sunbathing area. The optional Aft Dinner Package further extends the aft cockpit and flybridge to accept larger seating plans and tables, adds an aft sunshade, gives direct access to the aft storage compartment and includes a 340 mm extended swimming platform to enhance boarding and waterside enjoyment.

Power and handling are delivered by twin Volvo Penta D13-1000 HP engines showing 750 engine hours, supported by seven-inch displays for engine monitoring. Comfort underway is enhanced by a Seakeeper 9 Gyro stabilizer and Humphree blade trim tabs with automatic trim and list control, while maneuvering is simplified by joystick-controlled bow and stern thrusters. Fuel and service capacities are generous with two 1,875 L fuel tanks, an 800 L fresh water tank, a 330 L grey water tank and a 300 L black water tank. Hotel power and climate systems comprise an Onan 22.5 kW generator and an 88,000 BTU chilled-water air-conditioning system with inverter heating to ensure comfortable conditions year round.

Below decks the accommodation plan comprises three guest cabins plus a dedicated Captain's cabin complete with its own air-conditioning, with the master suite positioned aft and a mid cabin providing a secondary private guest space. The interior is finished with elegant Matt Lati Grey furniture, wooden flooring in the saloon and galley, decorative bedspreads and aluminium blinds in the cabins. The saloon is bathed in natural light thanks to electrically opening windshield panels (opening towards the bow) and fixed glass roof panels above the lower helm station, while practical access is provided by a starboard side door and refined by a black manual pleated curtain.

The helm and electronic fit-out is comprehensive and navigation-focused. The main helm hosts twin Raymarine Axiom 16 RV Pro EU displays, complemented by an Axiom 12 Pro on the flybridge, all interfaced with a B744V transducer for high definition sensor data. A 4 kW 48 inch Magnum open array radar and a Raymarine Evolution DBW autopilot with two P70RS control heads deliver confident coastal and offshore navigation. Communications and situational awareness are covered by a Raymarine VHF Ray91 with AIS (with a second unit situated on the flybridge), Raymarine AIS700, and aft view and engine room cameras, while overall system management is handled through the IMIS integrated management and information system.

The flybridge is sheltered by a laminated hardtop with an electrically operated opening sunshade and includes a well equipped minibar with ice maker, a 62 L refrigerator and a 230 V electric grill. Tender handling and boarding convenience are supported by a teak laid swimming platform rated to 700 kg and a hydraulic passerelle (box system). Extensive teak decking flows across the swimming platform, cockpit, flybridge/skydeck, access stairs, lower and upper side decks and foredeck, creating a cohesive, warm exterior finish. Nighttime ambiance and safety are assured with seven underwater lights and full LED illumination across all exterior zones, while a galvanized anchor and chain with an anchor chain counter and a windshield washing system add

practical resilience. A comprehensive set of protective covers secures the flybridge helm station, seats, galley, aft and forward seating groups, cockpit seating and windshield.

The galley is arranged for extended cruising and entertaining, equipped with a refrigerator, freezer, dishwasher, wine cooler and a washer – dryer unit, while a large 270 L aft saloon refrigerator and an integrated ice maker support effortless hospitality. The audio – visual package includes a Fusion sound system (USB – enabled) with two speakers in the saloon and two on the flybridge, and a pop – up TV on a lift mechanism to complete a sophisticated onboard entertainment experience.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.
